

HERE AT STONY BROOK - Monday, April ~~1~~⁹ 1984

INTRO up and under

Hi, everybody. Our subject today is sports medicine. That's a field that may be as old as the first runner's ankle sprain but, as described in a recent national magazine's headline, it is also "medicine's new specialty." Just in the past five years, membership in the American College of Sports Medicine has more than tripled to nearly 13,000. We'll talk today with Dr. Stuart Cherney, an orthopedist who is, as the saying goes, a jock doc.

Later, we'll talk with a sociologist who is helping set up a symposium for ~~the~~ everyone interested in sports medicine, including athletes, trainers, ~~and~~ coaches and physicians.

Dr. Cherney is the team physician for the State University of New York at Stony Brook. That's saying something, considering that the University has about 18 teams. That gets him involved with ~~the~~ everything from tennis elbow to tired muscles. ^{why} Dr. Cherney, /is there a real need for the field of sports medicine?

- INTERVIEW CHERNEY:
- History of sports medicine
 - Fields encompassed: cardiology
orthopedics
psychology (goals)
podiatry
 - Disabled/handicapped
 - Playing with pain...good?
 - Any insurance problems for athletes?
and Does Sports Medicine help cut such problems?
 - General advice to weekend athlete?

BRIDGE UP AND UNDER

Sports medicine has become such a major activity that regional and national gatherings ~~are~~ are held regularly in order to help the practitioners stay current with new developments. Such a gathering will take place this spring at the State University of New York at Stony Brook. Among those heading up the planners is Dr. Colin Martindale, of ~~the~~ Stony Brook¹⁵ Physical Education faculty. Dr. Martindale, who is being invited to ~~your~~^{the} seminars?

INTERVIEW MARTINDALE:

- Details of conference: where, when, cost
- Types of seminars: lawyer
orthopedist
trainer
- Response to claims: Sports medicine is in the best interest of the athlete; Sports medicine helps further exploitation
- What are some of new equipments
- What are some of new techniques
- What advice to athletes, parents who worry

BRIDGE UP AND UNDER

~~11:55.0~~

Next week, we'll talk with a scholar whose field of expertise is the Scandanavian languages. He translates literature, and serves as the editor for books written in Norwegian, Swedish and other languages. You'll also hear a report from a group of young people, students for 16 or 17 years, on what they consider the best qualities in a teacher. They should know, right? Until next week then, this is Al Oickle. So long, everybody.
