

**STATE UNIVERSITY OF NEW YORK
COLLEGE AT OSWEGO**

2009 CAMPUS STATEMENT

Established in 1861, today SUNY Oswego is a comprehensive liberal arts institution enrolling 8,300 students, 6,500 of whom are full-time undergraduates. Approximately 3,700 students reside in 11 residence halls on Oswego's spacious campus, located along the beautiful eastern shore of Lake Ontario. The city of Oswego, itself rich in cultural history, is 45 miles northwest of Syracuse, New York. An education at SUNY Oswego offers endless possibilities. Students take advantage of more than 100 majors and minors in arts and sciences, education and business. An outstanding, supportive faculty of more than 400 teacher/scholars engages students in challenging programs that encourage interaction and the vibrant exchange of ideas. The College's learner-centered approach stresses a high quality educational experience, both inside and outside the classroom. SUNY Oswego provides essential tools to help students shape their lives, prepare for careers, and discover ways to make a positive impact on their communities.

The College's academic facilities include: Penfield Library, the largest library in Northern New York with over 2.8 million books, periodicals and other materials, and vast electronic information databases; state-of-the-art research and teaching labs; print and broadcast facilities for student-run media as well as a professionally-directed National Public Radio affiliate; Tyler Hall, an acclaimed 550-seat theater; Rice Creek Field Station, offering 400 acres of trail-crossed fields, streams and forests, a 26-acre Rice Pond, and a study facility with classroom and laboratory space and an indoor viewing gallery.

The 690-acre main campus encompasses 56 buildings in an inviting and dynamic Great Lakes shoreline environment. It includes five dining centers, the Hewitt Union student center, two athletic complexes, two fitness centers, the Fallbrook Recreation Center and the Mary Walker Health Center. In addition to the main campus, the College maintains the SUNY Oswego Phoenix Center in Phoenix, New York and the SUNY Oswego Metro Center in Syracuse. The campus's learning technology infrastructure includes a robust campus-wide fiber optic network, the broad application of wireless technology, and the completion of award-winning Advanced Technology Classroom infrastructure and interior design projects. An extensive computer network supports more than 1200 personal computers available for student use, as well as Internet access within every residence hall.

Recent capital improvements at the College at Oswego include full renovation of three residence halls – one beautifully conceived facility houses the College's First Year Experience programs, and the other is home to an internationally themed Global Living and Learning Center. Current residential projects include a 350-bed townhouse apartment complex that is under construction and will open Fall 2010. Academic capital projects include: a School of Business facility that combines the academic program with an active Center for Business and Community Development; an award winning Humanities Center; a unique and attractive library café; renewal of campus underground power distribution systems and central heating plant; and improvements to building exteriors and building fire/safety systems. In October 2007, the campus opened a new and transformative 260,000 square foot Campus Center. The Center acts as the heart of the campus, linking an innovative academic planning center with social, intellectual and recreational functions in one exciting, new, state-of-the-art home. Exciting projects now in design which will similarly transform the eastern Sheldon Quad of the campus are a new home for the natural sciences and mathematics that will also house the College's first engineering program, and the renovation of two buildings that will be the consolidated home of the School of Education. The exterior historic preservation of Sheldon Hall will also restore the campus's founding building. The College is now advancing planning initiatives and addressing critical maintenance needs through program and feasibility studies for the Hewitt Quad, and through energy and infrastructure projects, as well as beginning work on future facilities initiatives through a comprehensive Facilities Master Plan process started in 2009.
