Subject Message to the Campus Community

To the Campus Community:

The University has received information that a member of the campus community is being evaluated for a potential case of tuberculosis, a disease that is not easily transmitted and is completely treatable. No actual case of a disease has been confirmed and health officials inform us that there is no imminent danger. The Department of Health is conducting an investigation and we will continue to monitor the situation. We have an obligation to protect the privacy of the patient and the confidentiality of medical information. Be assured that we will provide additional information to you, if necessary, once it becomes available. Information on tuberculosis for the general public can be found at <http://www.cdc.gov> .
