

## SELECTED TOPICS IN GYNECOLOGY UPDATE

June 10-17, 2012

14 Credit Hours

**Faculty:** Todd R Griffin, M.D. FACOG  
Chief Medical Officer  
Clinical Associate Professor  
Fellowship Director – Minimally Invasive and Robotic GYN Surgery

**Objectives:** This seminar will review and update medical providers on selected topics which impact the female patient. Medical and technologic advances, as they pertain to the gynecologic patient, will be discussed. Emphasis will be placed on common office problems, e.g. infertility, ovarian failure, stress urinary incontinence, uterine fibroids and endometriosis. The series will be clinically oriented, but will include basic pathophysiology as well as new technologic advances as they pertain to the gynecologic patient. Upon completion of the course, participants should be able to describe current recommendations in the care of the female patient including: evaluation and treatment of patients with infertility, ovarian failure and uterine anomalies, evaluation and treatment of patients with an abnormal pap smear, dysfunctional uterine bleeding or genital prolapse. The information will be relevant to a wide variety of practitioners, including family medicine, internists, pediatricians and surgeons.

### Program

June 10	2:30-3:30 pm	Infertility
	3:30-4:30 pm	Endometriosis
	4:30-5:30 pm	Abnormal Uterine Bleeding
June 11	8:00-9:30 am	Primary and Secondary Amenorrhea
	9:30-11:00 am	Menopause
	11:00-12:00 pm	First Trimester Bleeding
	1:00-2:00 pm	Obstetrical Hemorrhage
	2:00-3:00 pm	Stress Urinary Incontinence
	3:00-4:00 pm	Vaginitis
	4:00-5:00 pm	ER Cases
June 16	3:30-4:30 pm	Cervical Intraepithelial Neoplastic and HPV
	4:30-5:30 pm	Robotic Surgery in Gynecology
	5:30-6:30 pm	Illustrative Case Studies
