

Lung Cancer Survey 2001

Figure 1. Smoking History - 131 newly diagnosed lung cancer patients at Stony Brook Hospital in 2001

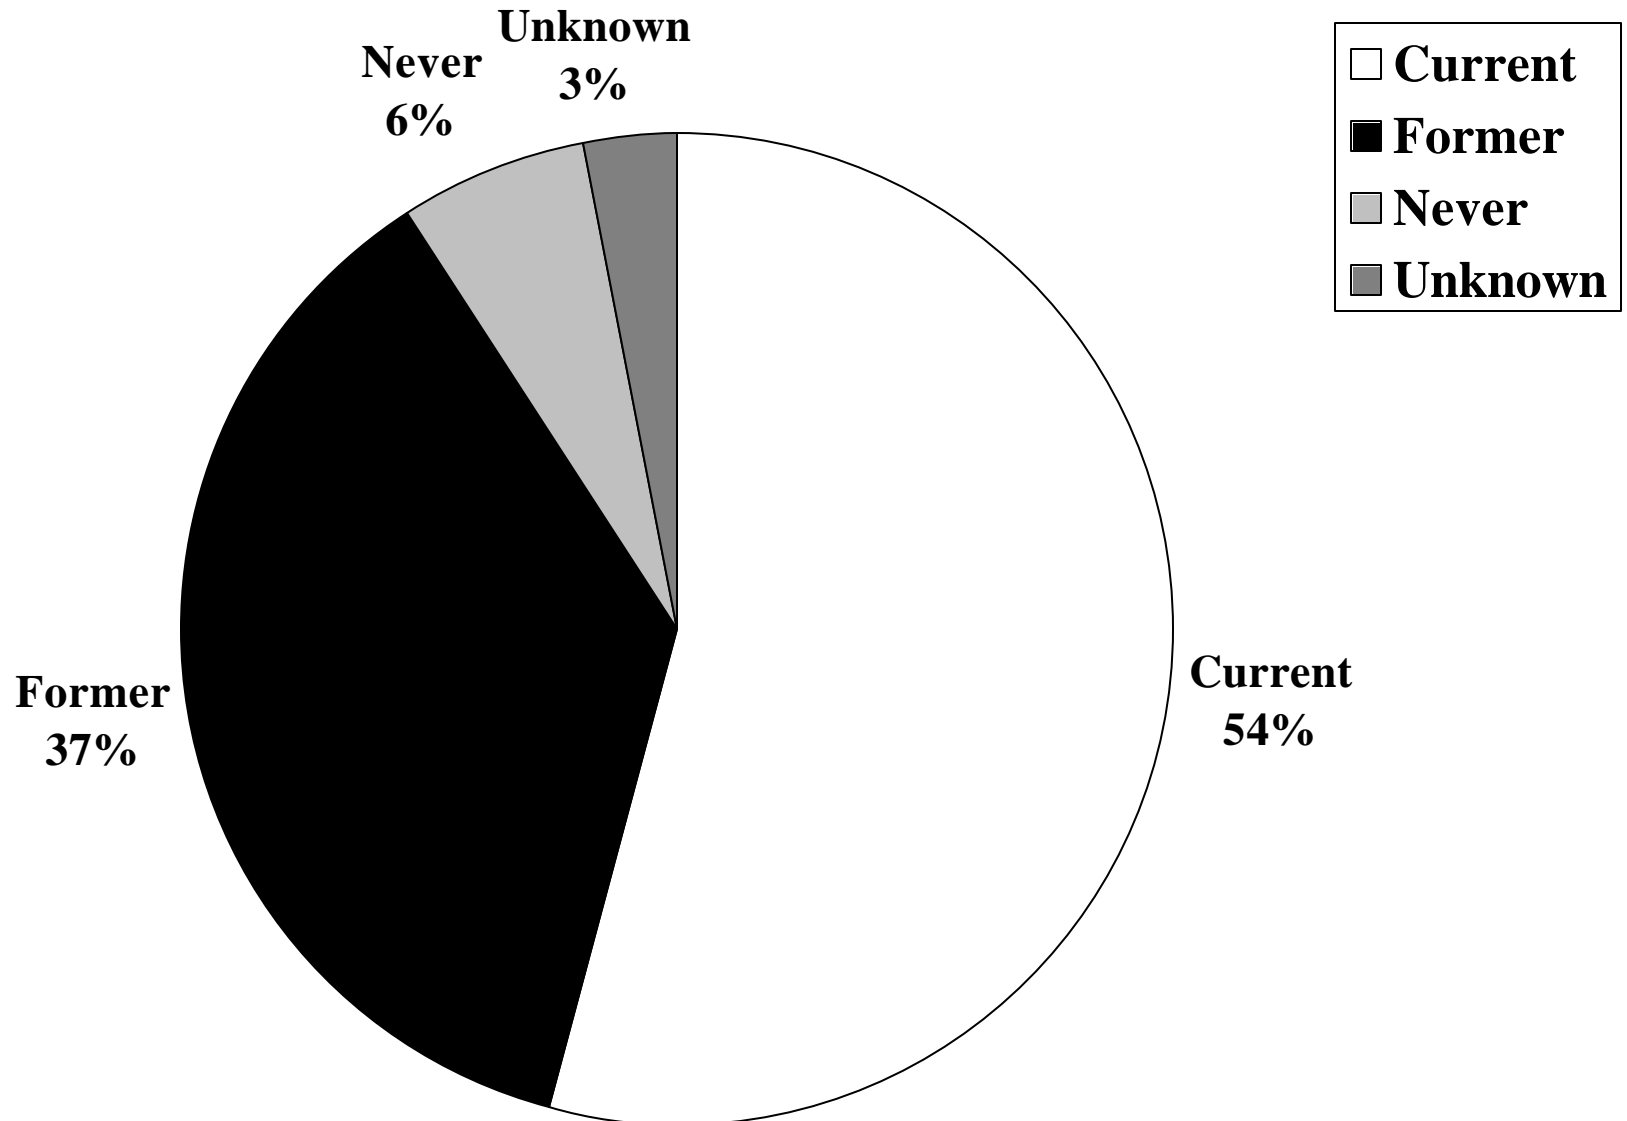

Figure 2. Gender distribution for lung cancer patients at Stony Brook Hospital in 2001 compared to National Cancer Data Base 1994-1998 benchmark report.

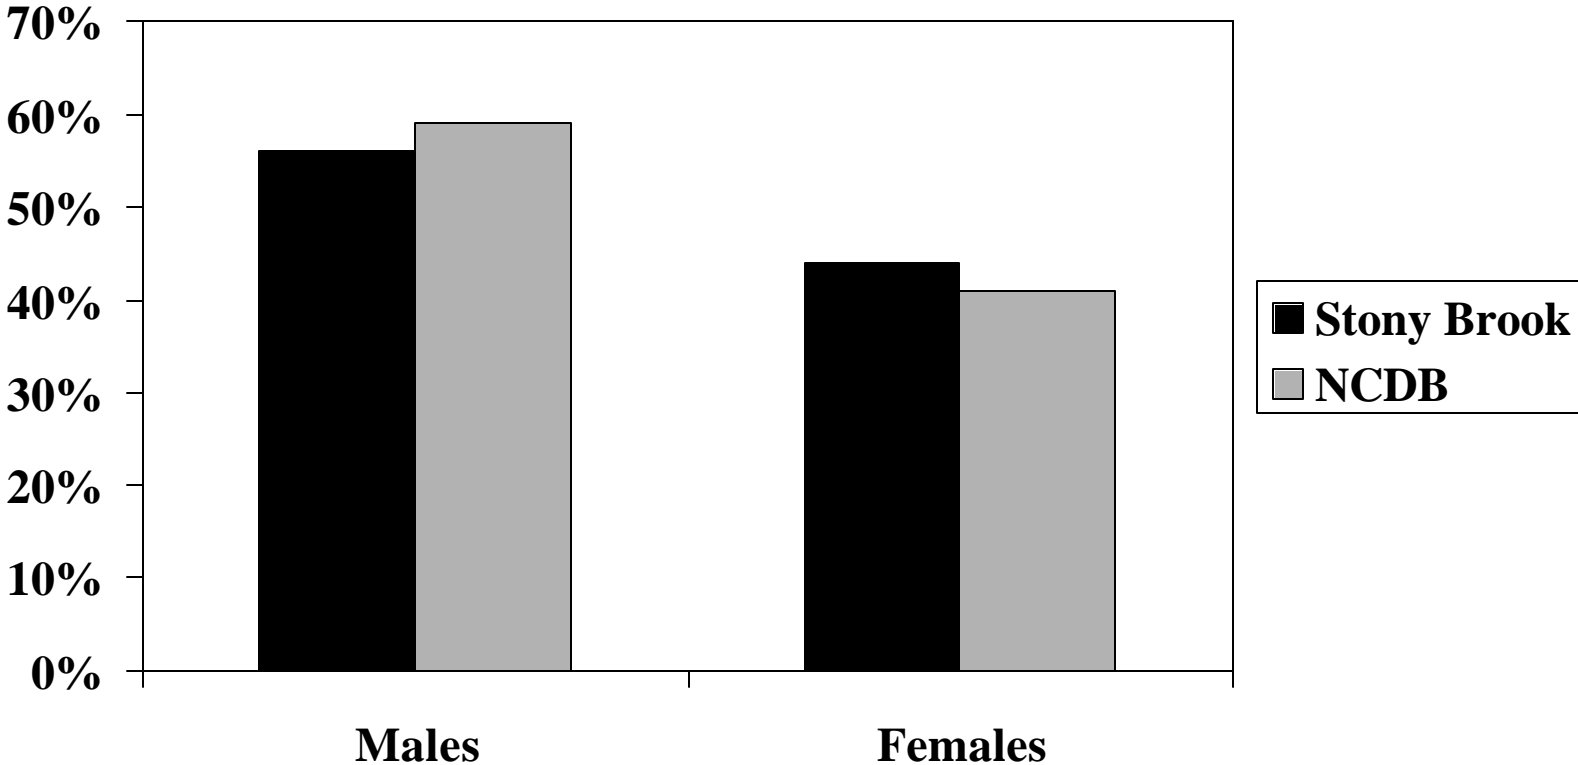

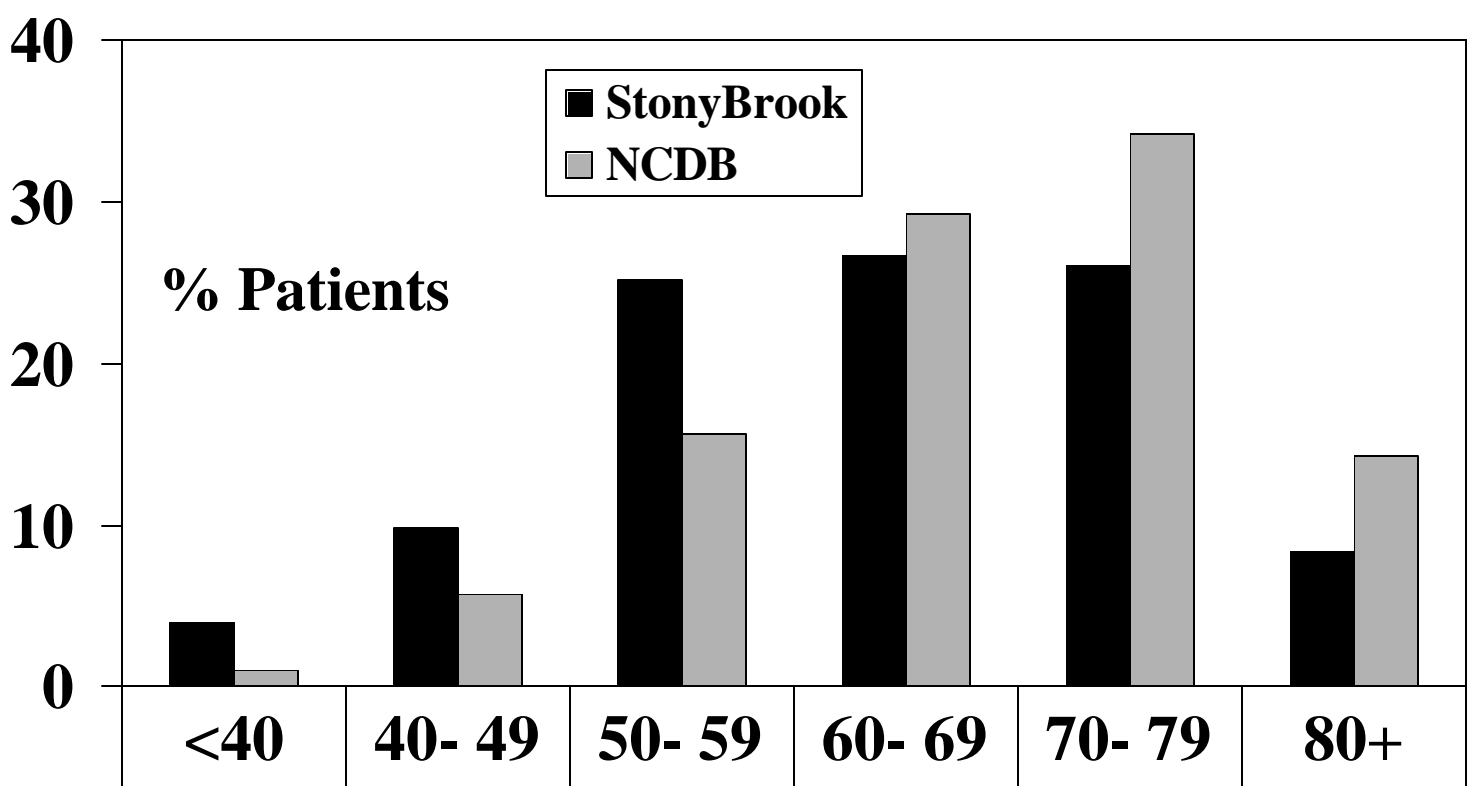

Figure 3. Age at diagnosis of lung cancer at Stony Brook Hospital in 2001 compared to National Cancer Database 1994-1998 benchmark report.

■ StonyBrook	3.9	9.9	25.2	26.7	26	8.4
■ NCDB	0.94	5.62	15.67	29.24	34.21	14.33

Figure 4. Lung cancer histology in 2001 at Stony Brook Hospital

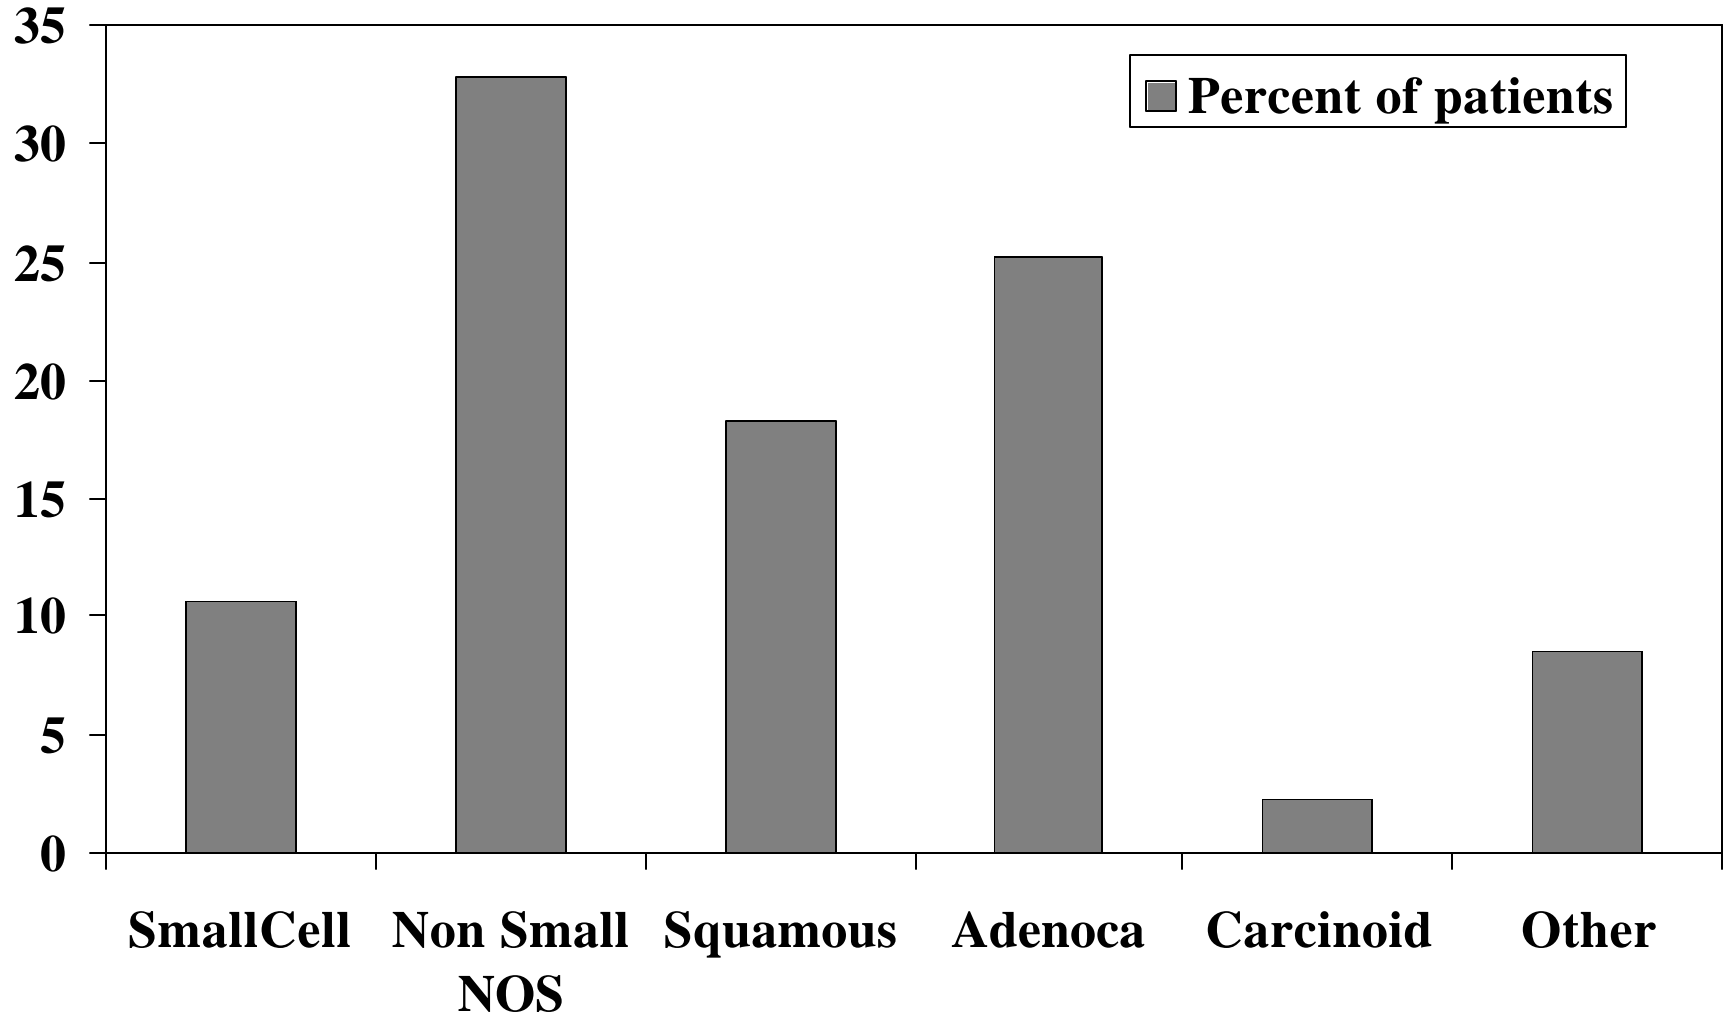

Figure 5. Diagnostic procedures in lung cancer performed at Stony Brook Hospital in 2001

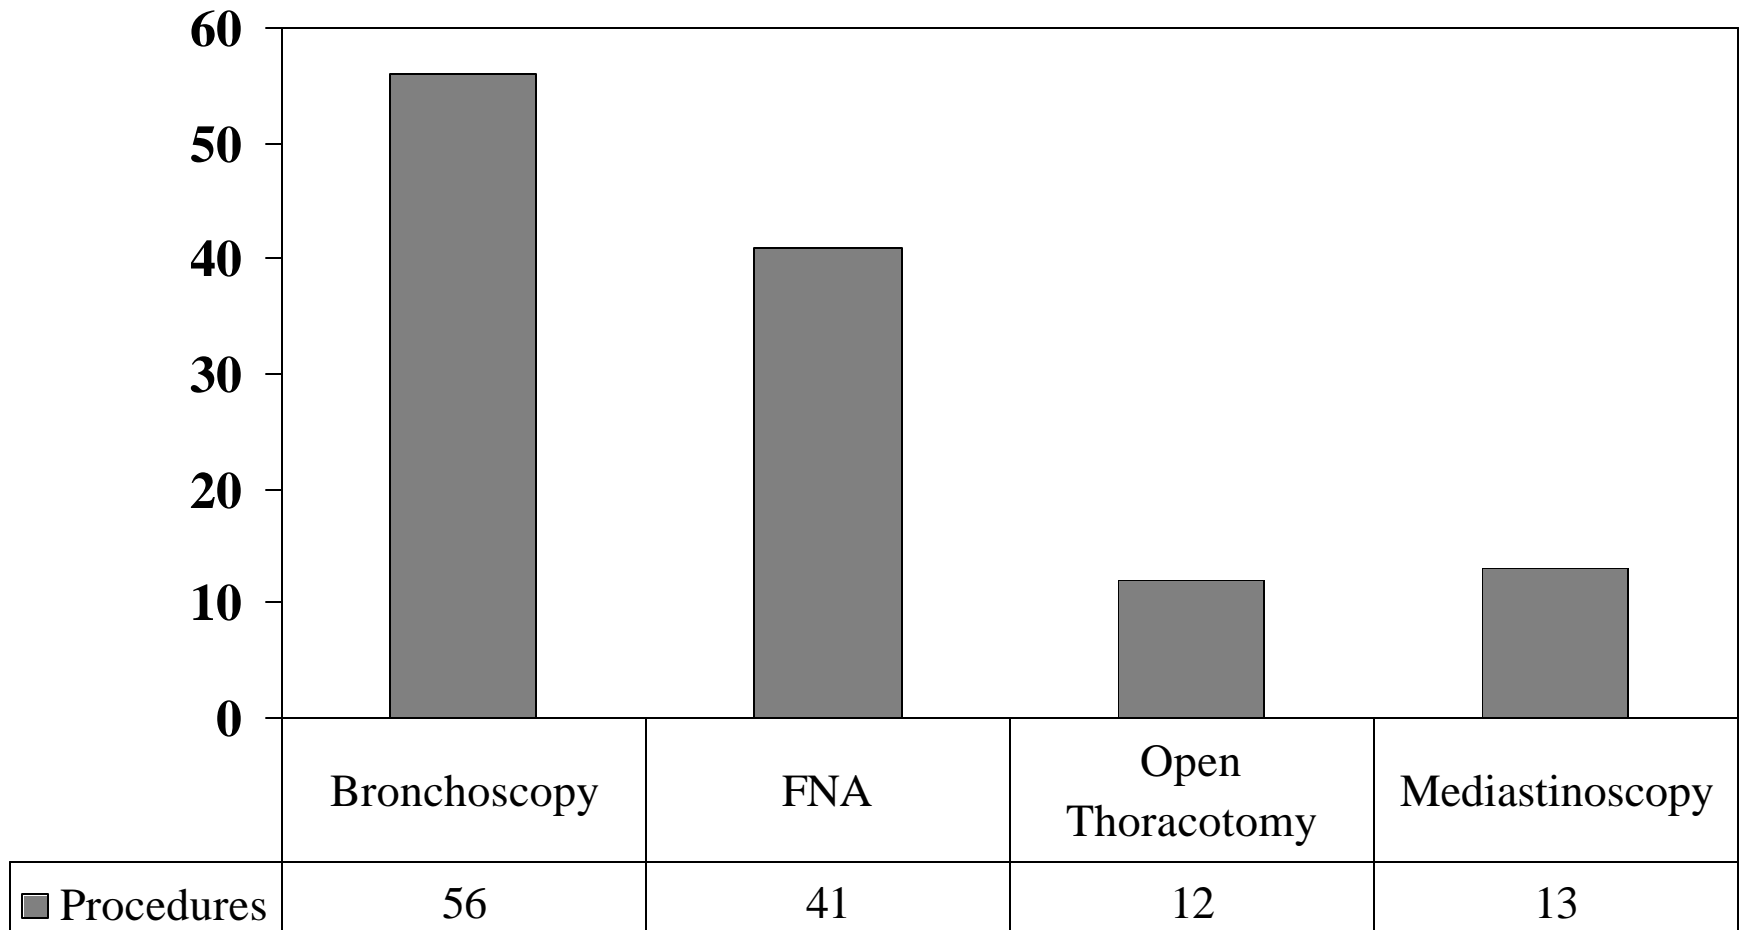

Figure 8. Lung Cancer AJCC TNM stage at diagnosis in 131 newly diagnosed cases at Stony Brook in 2001 compared to NCDB 1994-1998 benchmark report.

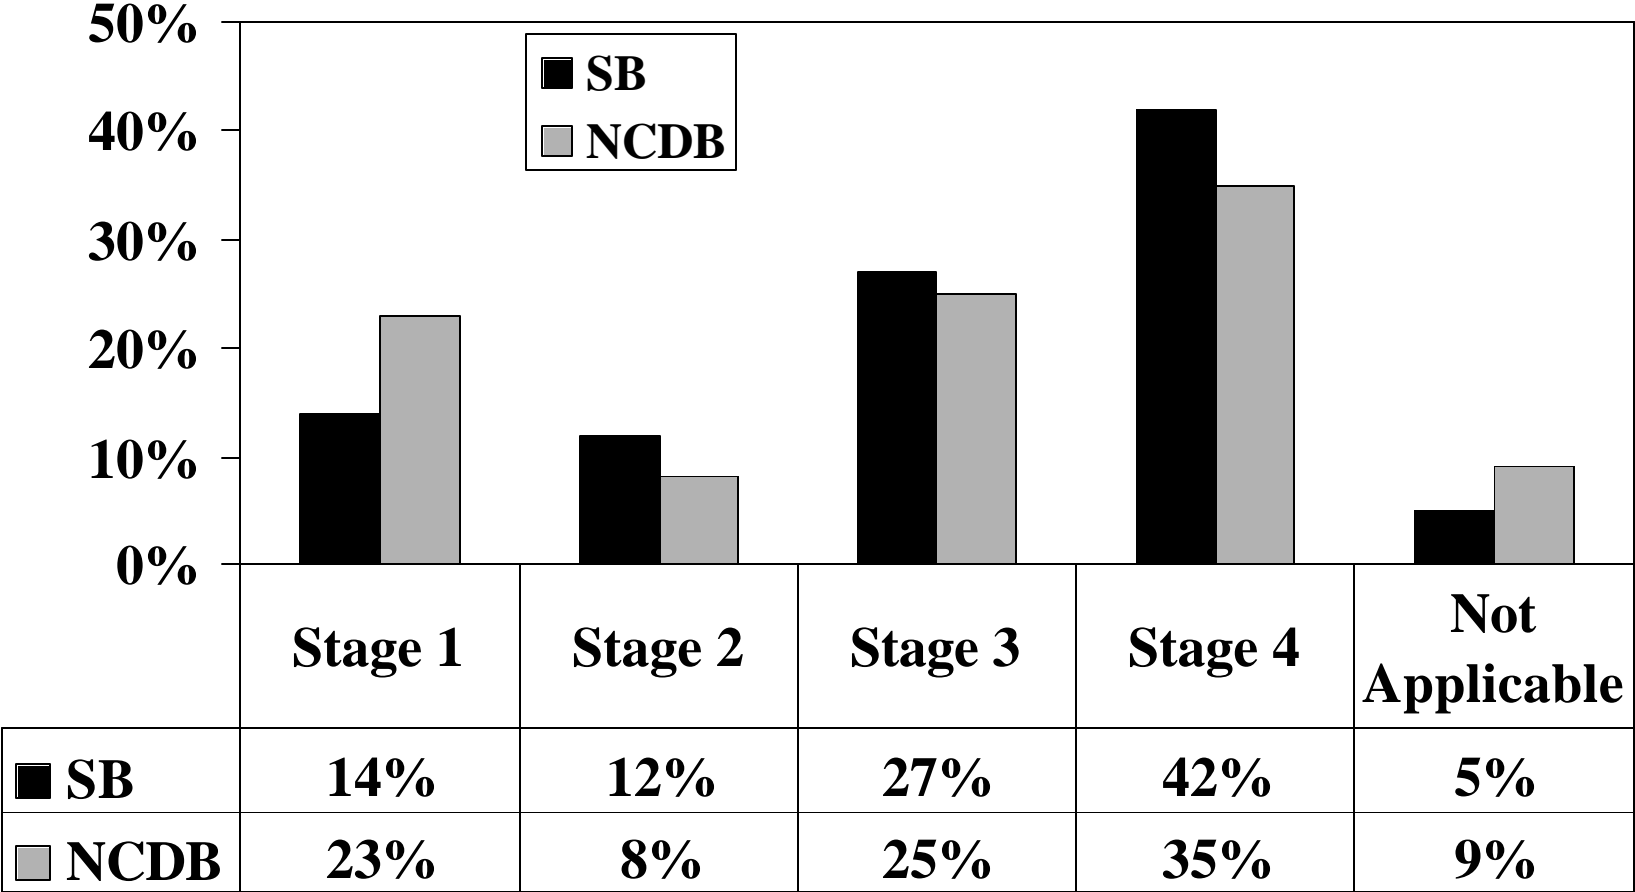

Figure 10. Radiation therapy volume treated in patients with primary lung cancer at Stony Brook University Hospital in 2001

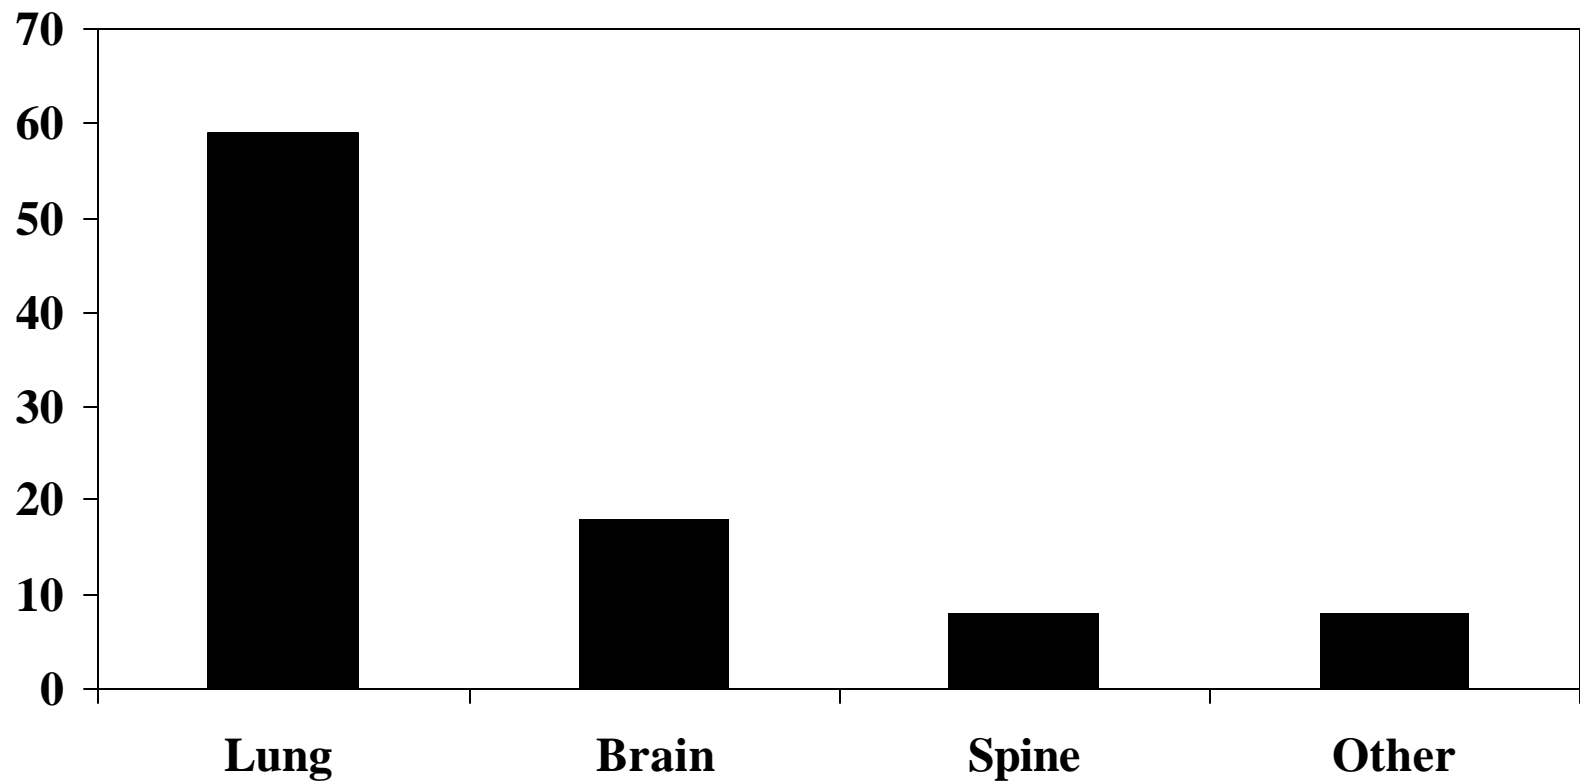

Figure 11. Treatment of lung cancer in 2001 for 131 newly diagnosed cases at Stony Brook Hospital

Surgical Resection Alone	14	10.7%
Radiation Alone	30	22.9%
Chemotherapy Alone	13	9.9%
Surgery + Radiation	5	3.8%
Surgery + Chemotherapy	2	1.5%
Radiation + Chemotherapy	41	31.3%
Surgery + Radiation + Chemo	6	4.6%
No cancer directed therapy	20	15.3%
