STATE UNIVERSITY OF NEW YORK AT STONY BROOK

November 16, 1987

Gym Parking Lot Lost to Fieldhouse

There are changes afoot at the Gymnasium parking lot.

Due to forthcoming construction of Stony Brook's new fieldhouse, fencing will go up around the existing 300-space Gym parking lot, from Nov. 16 to Nov. 23. During that time, faculty and staff will still be able to park in the lot. Starting Nov. 23, the lot will be closed permanently; the fieldhouse will be built where the parking lot now stands, adjoining the gym.

The fieldhouse is scheduled to be completed in late 1989/early 1990. A new parking garage, to be finished shortly after completion of the fieldhouse, will be built near the tennis courts.

Faculty and staff who need to park in that area of the campus will still be able to park in the Earth and Space Sciences and Engineering lots, as well as in the gravel lot across from Kelly Quad. There will be Public Safety officers posted at those locations each morning until 10 a.m., to check parking permits.

Condom Machines To Be Installed In Residence Halls

Check Yourself, Inc., a non-profit corporation, has been awarded a contract by the Faculty Student Association (FSA) to install condom vending machines in all residence hall laundry rooms.

According to the FSA, the manufacturer of the condoms to be available on campus has been registered with the FDA since 1977 and the condoms are of the highest quality.

The U.S. Surgeon General's advice on the use of condoms will appear on each package as well as on the dispensers.

Proceeds and commissions from the sale of condoms will go for AIDS research and education.

Honorary Degree For C.N. Yang

Dr. C.N. Yang, director of the Institute for Theoretical Physics, will be receiving an honorary degree on Nov. 21 from the Technical University of Switzerland in Zurich.

Dr. Yang is Einstein Professor of Physics and a Nobel Prize winner in physics. He holds a Ph.D. degree from the University of Chicago.

No Currents Next Week

There will be no issue of *Campus Currents* Thanksgiving week Nov. 23. The next issue will be Monday, Nov. 30. Have a good Thanksgiving.

DIGGING IN. President Marburger, with the help of Congressman George Hochbrueckner, turns shovels full of soil east of Nicolls Road. Over the next few months others will help until a new Veterans Home is completed.

Ceremony Breaks Ground For Veterans Home

By SUE RISOLI

A bone-chilling autumn rain couldn't dampen the spirits of approximately 200 veterans, politicians and University administrators who gathered on campus Nov. 10 to celebrate the groundbreaking of a 350-bed nursing home for veterans.

Though the storm forced the cancellation of an appearance by Governor Mario Cuomo, there were smiles on the faces of those who had participated in an eight-year effort to secure funding for the \$25.4-million facility. "This is a way to give something back to the veterans," said Ray Desmond, New York State Commander for the organization Disabled American Veterans. U.S. Representative George Hochbrueckner (D-Coram) agreed, quoting President Theodore Roosevelt's assertion that "a man who is good enough to shed his blood for his country is good enough to have a square deal afterward."

The home, scheduled to open in 1990, will be located on the campus's East Loop Road. It will be operated by the University's Health Sciences Center, and will be the second veterans nursing home in

New York State (the other is located in upstate Oxford, New York, and is operated by the New York State Department of Health).

Medical services will be provided by the faculty of Stony Brook's School of Medicine. Nursing staff of the veterans home will work closely with the faculty of the University's School of Nursing. When necessary, patients who need acute care would be transferred to University Hospital, or to the Veterans Administration Medical Center in Northport.

The Stony Brook home will contain two special-care units, each containing 25 beds; one will provide respiratory care and the other will be reserved for patients with senile dementias such as Alzheimer's Disease. There will be day care for up to 50 community patients a day.

In a feasibility study conducted for the Veterans Administration in 1982 by Steinle Associates, it was estimated that there will be 293,554 veterans in Nassau and Suffolk by 1990. Of those, 88,477 will be aged 65 or older.

New Program for Children With Language Problem

Children who have only a few words in their vocabulary but who seem to understand full sentences may have a condition called expressive language delay.

Two departments are conducting a research-based program of screening and therapy for these otherwise normal two-year-old children.

Grover Whitehurst, Ph.D., professor of psychology, said the Departments of Pediatrics and Psychology will conduct the screening program at the outpatient clinic at University Hospital.

Parents of all children participating in the initial screening will receive reports. For some, therapy sessions will follow. There is no cost to parents for these services.

Parents may receive further information by calling 632-7870.

Toy Boxes For the Holidays

Four collection boxes for toys have been placed around the campus to collect toys for the Brookhaven Town Toys for Kids Drive. President Marburger has encouraged members of the university community to join in this effort to celebrate the spirit of the season.

The boxes, which will be available through Dec. 16, are in the second floor lobby of the Administration Building; the first floor lobby of the Melville Library; at the cafeteria entrance in the University Hospital; and in the second floor hallway near the rear escalator in the Health Sciences Center.

Toys should be new and placed unwrapped in the boxes.

SAN FRANCISCO, HERE I COME. Theresa Mackin, center, of the Marine Sciences Research Center, won two round-trip tickets to any United Airlines destination in the continental United States (she chose San Francisco). Ira Persky, right, director of the Faculty Student Association, conducted the drawing at the new campus travel agency. The entrants were more than 250 university staff members who attended October seminars designed to introduce the new agency, Omega World Travel, and its personnel and services. At left, Scarlett Goldstein, Omega's office manager, shows off travel opportunities.

Three Have New Titles at Health Sciences

George Tyson, M.D., associate professor of neurological surgery, who has served as acting chair of neurological surgery since May 1986, has been named chair of neurological science.

The School of Medicine has named Patrick A. Sibony, assistant professor of ophthalmology and neurology, acting chair of

the department of ophthalmology.

Sidney E. Mitchell, formerly University Hospital deputy director for clinical services, was recently appointed chief operating officer of University Hospital by William T. Newell, Jr., executive director of the University Hospital.

Stony Brook

Sleep Disorders Center Offers Drug, Hope

By DENISE ARNOLD

Imagine being awakened up to 300 times a night. For individuals with sleep apnea, this is their normal sleeping pattern. They stop breathing many times at night and awaken each time. It may be life threatening and always causes daytime sleepiness.

Wallace B. Mendelson, M.D., a professor at the School of Medicine and director of the Sleep Disorders Center at University Hospital, is testing a new drug to treat sleep apnea. The drug, fominoben, is a cough suppressant and a respiratory stimulant, and is used in studies for pulmonary diseases.

Stony Brook's Sleep Disorders Center is the only sleep center in the country licensed to administer and test this new drug for sleep apnea. The center is looking for adult volunteers with sleep apnea on which to test this drug. Individuals should have no major physical or mental illnesses and should be in good general health.

The volunteer will go through the following steps: 1) a telephone interview to determine the individual's eligibility; 2) a personal interview with nurses, researchers and Mendelson which will include a discussion of the individual's sleep problems, medical history, a physical exam, routine blood tests, and an explanation of the study; and 3) six nights over a three-week period in the sleep laboratory, at-

tached to an electroencephalograph.

There are two types of sleep apnea, obstructive apnea and central sleep apnea, and their causes are as yet unknown. However, researchers attribute the disorders to a complete relaxation of the upper respiratory organs which obstruct breathing. Mendelson will be testing individuals with the more common obstructive apnea.

With obstructive apnea, there is an abnormal loss of tone of the muscles in the throat and tongue during sleep. At the onset of sleep, the throat completely collapses, resulting in a blockage of air flow.

When an individual with the central sleep apnea falls asleep, the diaphragm (the muscle which moves air in and out of the lungs) stops because the sleeping brain fails to send a message of movement to the diaphragm, also causing a stoppage of breathing.

Individuals with sleep apnea usually tend to snore heavily, be overweight, and over 40 years old.

Present treatments for sleep apnea include medications, surgery, or using a device called a continuous positive air pressure instrument while sleeping. Other treatments include weight loss, lifestyle changes and learning not to sleep on one's back. All have limited degrees of success.

Mendelson hopes that fominoben will be highly effective in alleviating sleep apnea.

Sleep disorder medicine is a clinical specialty that deals with diagnosis and treatment of patients with sleep disorders and problems of alertness during the day. These problems require specialized diagnostic evaluation, which is available at the Sleep Disorders Center, the only accredited sleep center in Suffolk County and one of 150 nationwide.

For more information, call the Sleep Disorders Center at 444-2916.

EVERYONE'S A WINNER. Hundreds of athletes participated in the second annual Suffolk County Fall Special Olympics Adult Games Oct. 25 in the Gym and Stony Brook Union. The games provide athletes 20 years old and older to experience sports training and competition. The emphasis is on participation; everyone receives a medal and is considered a winner.

FACULTY/STAFF

On the Road

Sheldon J. Reaven, Department of Technology and Society and the Waste Management Institute in Marine Sciences, gave the keynote address at the 6th National Recycling Congress held in Austin, Texas on Oct. 13-17. His talk was titled "Long Island's Garbage Barge: What Really Happened—and Why?"

Herbert Herman, Department of Materials Science & Engineering, gave a series of three lectures Oct. 19-21 at the University of Utah in Salt Lake City on thermal sprayed protective coatings and the plasma spraying of oxide coatings. The lectures were part of the university's Special Lecture Series in Metallurgy.

Elaine Kaplan attended a meeting of

the Association for Continuing Higher Education in Indianapolis on Nov. 8-10. She presented a paper in the "New Directions in Adult Learning" session titled "Joint Admissions and the Adult Learner."

Dr. Rose Walton will deliver a lecture titled "AIDS—Educational Imperatives, Social Implications" at an AIDS symposium sponsored by the Mental Health Association in Suffolk County and The Touro College School of Law on Nov. 17 at Touro College in Huntington.

Philip Heinegg, assistant professor of clinical family medicine, delivered a talk titled "New Thoughts on Menopause" at Oceanside High School on October 19.

William Oberst, editor in the Publications office, gave a talk and demonstration on desktop publishing on October 26 at the State University of New York/Council for University Affairs and Development Annual Conference in Syracuse.

Joseph Pequigney, professor, Department of English, took part in "The Body and Literature: An Interdisciplinary Conference" at the State University at Buffalo on November 12-14. A session of the conference was devoted to a panel discussion of his book *Such Is My Love: A Study of Shakespeare's Sonnets*.

Frances Zak, lecturer, Department of English, gave a paper titled "Responding to Student Papers: Are We Wasting Our Time?" at the Second Basic Writing Conference at St. Louis. The paper was quoted extensively in a book review written by Peter Elbow, former director of Stony Brook's Writing Program, published in the Fall 1987 edition of the ADE Bulletin.

Appointments

The Department of Public Safety announces the appointment of two new staff members: **Richard Young**, assistant director of public safety for night operations; and **Susan Riseling**, assistant director of public safety for crime prevention.

Patricia Baker has been hired as assistant to Associate Dean Jo Fusco, Center for Continuing Education. She received both her bachelor's and master's degrees from Stony Brook joined CED's advising staff.

The Frank Melville, Jr. Memorial Library announces these appointments to its staff: **Evelyn Chironis**, library clerk, Serials; **Maureen Greslin**, library clerk, Cataloging; **Mary Ann Hannon**, keyboard specialist, Circulation; **Daniel Kinney**, assistant head, Cataloging; **Jonathan Matthews**, technical assistant, Music Library; and **Ruth Regan**, technical assistant, Collection Development.

Corrections

An article in our Nov. 9 issue on the availability of American Express corporate credit cards to university business travellers incorrectly identified the service as the Business Travel Account. Actually, the Business Travel Account is a second service that American Express is providing Stony Brook research travellers that permits air transportation to be charged directly to grants. This account does not involve the use of a credit card.

The Topics in Art lecture by Stephen Lares titled "The World of Computer Imagery" will take place at noon in the Fine Arts Center Art Gallery on Tuesday, Nov. 17. The phone number to call for information is 632-7240.

PHYSICAL THERAPY AWARDS: The Long Island Chief Physical Therapists Forum recognized three physical therapy students at Stony Brook for their writing and documentation of case studies. Cathy Kleinhenz, Debbie Krublet, and Amy Rubinstein (above) each received checks of \$250 on Oct 21 for outstanding papers related to "Recurrent Anterior Shoulder Dislocation," "Multiple Sclerosis," and "Cardiovascular Accident."

Each year, the Long Island Chief Physical Therapists Forum presents awards to physical therapy students who have completed exceptional case histories in their junior clinical affiliation. All physical therapy junior students attending an APTA-accredited program on Long Island are eligible for the awards.

EVENTS

We welcome contributions to this calendar. To be considered all events must take place on the campus and be open to the campus community.
