

The Greening of Stony Brook

The campus landscape looks better and better, thanks to everyone who took part in last month's annual Pride Patrol, and to Olsen's Discount Nursery of Smithtown. (Olsen's is maintaining a garden of donated mums and other flowering plants outside the Humanities Building.) The planting, raking, and weeding was all part of the "Green Team" efforts of the University and the community to beautify our 1,100-acre campus.

James Simons Endows Math Department

James Simons, president of Renaissance Technologies, announced a major gift to Stony Brook's math department to create a program of instructors in math. The gift will enable six new Ph.D.'s from the nation's very best universities to come to Stony Brook for a post-doctoral period of teaching and research. The gift guarantees that the best young mathematicians in the country will bring their talent and vitality to Stony Brook's classrooms and research seminars.

From 1969 to 1972, Simons chaired the math department at Stony Brook, where he helped the program grow from relative obscurity to international acclaim. Today the math department is one of the finest in the country. The faculty boasts four members of the National Academy of Sciences, including John Milnor, formerly of the Institute for Advanced Study in Princeton and winner of the Field's Medal (the equivalent in mathematics of a Nobel Prize), and Dennis Sullivan, Einstein Professor and former member of the prestigious Institut des Hautes Etudes Scientifiques in France.

"This new program puts us on our way to becoming the best mathematics department in the country," says math chair Anthony Phillips. The new instructorships will give young Ph.D.'s an opportunity to develop their research in a rich environment, and substantially enhance the quality of the undergraduate program.

Simons is also a renowned research mathematician. In 1976 he won the coveted Veblen Prize of the American Mathematical Society for his pioneering work in differential geometry.

Calling All Callers

The new Faculty/Staff Telephone Directory is at the printer now, soon to be followed by the updated Student Directory. Both books will list phone numbers, as well as campus addresses, e-mail addresses, and some off-campus numbers and addresses.

The new directories should be in the mailroom in about two weeks. Check your mailbox.

In the meantime, individual campus listings can be consulted via the University's Web site at <http://sbnews.sunysb.edu/phonexhtml>.

Health Resource Center Opens

You just found out you have a serious illness. You want to learn everything about it—the latest research, treatment options, who gets it and why, support groups, associations, expected cost—everything. There is a wealth of information out there, but gathering it can be a daunting task. Where do you start?

Now you can find out all you want to know in one place: University Hospital's Health Resource Center. Created specifically to educate the layperson, the Center has it all: literature on every illness imaginable, UH services and programs as well as national programs, directories, educational videos, internet access, physician referrals and more. Like a medical library for the layperson, the Center enables people to get a quick education about a particular illness or condition.

"It makes people feel better when they come in here and see how much information and help there is," says Connie Hall, coordinator of the Center. The Center also offers notary services, blood-pressure screening, and doctor referrals. It is open to the public Monday through Friday from 9 a.m. to 5 p.m., and is located in the lobby entrance to the Hospital. For more information call 444-1020.

Rosemary Keefe, ACE Fellow

Dr. Rosemary Keefe, professor of English and head of the English department at Southwest Missouri State University, is currently spending the academic year at Stony Brook as an ACE (American Council on Education) fellow. An ACE fellow observes the president and other upper-level administrators to gain insight into educational leadership. By observing different styles of leadership, management, and decision-making, a fellow is able to return home the following year with fresh ideas. "The ACE program provides fellows with the marvelous opportunity to be participant observers at the highest level of academic administration," says Dr. Keefe.

The fellowship program, the foremost higher educational leadership development program in the country, chooses about 30 fellows each year. Dr. Keefe is the first ACE fellow at Stony Brook, and the only one in the SUNY system this year. Dr. Keefe selected Stony Brook to host her ACE fellowship and President Kenny as her primary mentor.

"The University at Stony Brook has made such amazing progress since its beginning 40 years ago and especially during the past three years under President Kenny's leadership, that I wanted to learn the secret of its success. Even though the SUNY system has suffered the most severe budget cuts in the country, Stony Brook keeps coming out on top.

"It's a great privilege to learn how the dynamic and famous faculty and administrators at Stony Brook can grow with shrinking state support. Right now Missouri seems to be supporting education more generously than New York. My home institution is about the size of USB, but phasing in selective admissions and thus shrinking from 20,000 students at the beginning of the decade to a target enrollment of 16,000 at the end of the decade. The English department at SMSU is a good bit larger than the one at Stony Brook."

President Kenny has asked Dr. Keefe to be "Mission Central" for Stony Brook's 40th Anniversary celebration. The President is asking everyone on campus to send Dr. Keefe their plans to celebrate 40 years of Stony Brook growth and success so that she can compile a calendar of events. Provost Rollin Richmond has invited Dr. Keefe to work with him on reviewing faculty evaluation procedures in the various colleges. Dr. Keefe has devised a mentoring program for new faculty in her department, which has become a model for the other 43 departments at SMSU.

Tale of Teenage Angst Wins 1997 Fiction Contest

Sifting Through, a story about a shy teenage boy who finds himself in the spotlight and must struggle to find his identity after he saves several children and their babysitter from a burning trailer, was the winning entry in Stony Brook's 1997 Short Fiction Contest. The author, Mitchell Cullin, an English major at the University of Houston, Texas, was awarded the \$1,000 cash prize. Little Brown, a major New York publisher, is including Cullin's work in an anthology.

The deadline for submissions for the 1998 Short Fiction Contest is March 2, 1998. Only undergraduates enrolled full-time for the academic year 1997-98 in American and Canadian universities and colleges are eligible. Students with an Asian background are particularly encouraged to participate. Submissions should be sent to C. McGrath, Department of English, Humanities Building, SUNY/Stony Brook, Stony Brook, NY 11794-5350.

New Lecture Series Off to a Good Start

"At Stony Brook I hope to learn new ways of integrating general education in learning communities, mentoring faculty and graduate teaching

assistants, improving public relations and building community, making efficient use of technology for teaching and research, providing wider access to education for disadvantaged students, incorporating global concerns into the whole curriculum, and more. Where significant concerns about Stony Brook's future are being discussed, I am eager to listen and learn. Please invite me to your meetings, lectures, performances, receptions, and parties."

Correction

The October 1 issue of *Happenings* inaccurately stated that total enrollment was up by 25%. In fact, only freshman enrollment has increased by that figure.
