PREFACE.

It has been calculated that the cuneiform texts selected for publication in Series A of *The Babylonian Expedition of the University of Pennsylvania*, edited by me, will require from twelve to fifteen volumes. This number may be increased, if the importance of the new material to be obtained through our continued excavations in Nippur should require it. The first and second parts of Vol. I have been in the hands of Assyriologists for some time; Part 3 will be issued in the near future. Vols. II, III, VI, X, XI are in the course of preparation.

The Neo-Babylonian texts published in the following seventy-two plates form Vol. IX. They belong to the general class of the so-called "contract tablets." All of them being taken from the archives of a certain family well known as a flourishing business firm during the second half of the fifth century B.C., they possess a unique value, which is augmented by the fact that they constitute the first large collection of cuneiform documents dated in the reign of Artaxerxes I. Vol. X will bring a further selection of representative texts from the same archives, dated in the reign of Darius II., the successor of Artaxerxes.

Notwithstanding there are many points of contact between our tablets and the large amount of contract literature already published, the documents here submitted contain so much new material, otherwise inaccessible, that I do not need to offer an apology for their publication. A number of new words occur in our texts for the first time; other words, forms and phrases receive a new meaning, and Persian loan words appear more frequently than in earlier inscriptions. Many of the business transactions refer to the cultivation of the ground around Nippur, frequently mentioning the different plants and seeds used for orchards and fields; others deal with the lease of canals and facilities for irrigation, or furnish us important information concerning the payment of taxes by the different classes of the population. A large portion of the land is in the hands of Persians, who fre-

quently do not care to attend in person to their large estates in the hot and malarious Babylonian country, but lease their fields and other property to the firm of "Murashù Sons" and live from their revenues in the cities with their manifold luxuries and attractions. From Babylonian documents we are thus enabled to confirm and supplement what the Greeks tell us about the large number of Persians settled in the various provinces,¹ and from direct and trustworthy sources we can control the statements of the classical writers as to the heavy taxes levied by the Persian kings upon their Babylonian subjects. We get a glance of the life and local administration in the richest province of the large empire at the time of Ezra and Nehemiah, and we become familiar with the names and titles of Persian officers—among them the *databâr*² known from Daniel 3:2 f.—who were stationed all over the fertile plain between the lower Euphrates and the Tigris, to gather the taxes and to look after the interests of their government.

The numerous proper names of our documents prove of exceptional value. In order to make the rich linguistic material contained in them accessible even to those who are not familiar with the cuneiform writing of the originals, I have attached to this volume a complete "Concordance of Proper Names." For often enough it happens that the most important material is not found in the names of witnesses and scribes, usually given in similar publications, but in those of their fathers and in the many other names found in the inscriptions. With the intention of facilitating the tiresome but essential work of those who are engaged in the compilation of dictionaries of Babylonian proper names—at least three of them are in the course of preparation—I have cited every passage in which a name occurs. In gathering the scattered material I have been able to supplement a great number of mutilated names, enclosed in brackets, and to restore broken lines of the text itself. Where a name in its alphabetical order appears for the first time in the Concordance I have transliterated it syllabically or ideographically, according to the manner in which it is written in the cuneiform texts. In all the other places the syllabic writing has been abandoned, the name, if intelligible, being simply divided into the words of which it is composed. Whenever the etymology of a name appeared absolutely certain long syllables have been marked as such.

The numerous foreign names are characterized by a little asterisk placed before them. If foreign origin seemed doubtful, this asterisk has been omitted. For it seemed wiser to give rather too little than too much in a first attempt to discriminate between the Babylonian and foreign proper names of our inscriptions, especially as comparatively but little has yet been done for the analysis and understanding of ancient Semitic proper names.³ Every-

¹ Cf. also Eduard Meyer, *Die Entstehung des Judenthums*, p. 25.

² For the different ways in which this title is written in the cuneiform documents of this volume, cf. the Introduction, "Proper Names," p. 28, note 1.

³ Greater energy has recently been shown in the investigation of Hebrew proper names. Among the several

one who has occupied himself with their study, is aware of the extraordinary difficulties which are constantly encountered, partly because no satisfactory collections of all the proper names occurring in the inscriptions of the different Semitic dialects have been made, partly because certain words and phrases of which the proper names are composed, are met with in several Semitic languages, partly because accidentally names of entirely different origin may sound alike in languages which have little or no relation with each other. Much remains to be done before we shall enjoy works similar to those of which the different branches of Indo-European philology can boast. And here I acknowledge with particular pleasure and gratitude the valuable assistance which I have received from Justi's *Iranisches Namenbuch*, a monument of human patience, industry and scholarship, which ought to be in the hands of every Assyriologist. If it had been published a year earlier, when I began my collection of Persian names from the classical writers, I should have been saved considerable time and labor.

Many of the tablets discovered bear impressions of seals and seal cylinders, as illustrated by Plates V–VII, IX–XI, some of them of rare beauty and clearly betraying Persian influence in design and execution (cf. especially Pls. IX–XI). Others have brief Aramaic legends, either incised in the clay (Pl. VIII, Nos. 9, 11) or inscribed upon its surface (Pl. VIII, No. 10). The black color used in the latter case as writing material has mostly faded away, so that often little but faint traces indicates the former existence of letters. As I have a larger work entitled *Vorstudien zur Altersbestimmung Babylonischer Siegel und Siegelycylinder* in the course of preparation, the first part of which, containing the seal impressions of the tablets from our archives, will appear within a year, I have refrained from giving their complete reproductions in the present volume. Oppert, who was the pioneer in the interpretation of legal documents, was also the first to work successfully upon seals and seal cylinders. To him, Menant, and a few others, we owe chiefly what we know about Babylonian and Assyrian glyptology to-day. Their work and efforts, valuable in more than one respect, deserve our full appreciation. But we still lack the means of determining the age of most Babylonian seal cylinders even approximately. In order to obtain it, we must change the method hitherto employed. First of all we must undertake the tedious and often difficult task¹ of studying the seal impressions on the dated documents of the different periods, and we must gather, classify and publish all of them books and papers devoted to this subject, which during the last years have been added to the earlier publications of Olshausen, Nöldeke, Nestle, Stade, Schrader, Friedrich Delitzsch and others, I call attention to G. B. Gray, *Studies in Hebrew Proper Names*, and those chapters in Hommel's *Altisraelitische Vorstellungen* which deal with Hebrew and Arabic proper names.

¹ From lack of space on most of the earlier documents, especially on those of the second dynasty of Ur and of the first dynasty of Babylon, the seal cylinders were rolled over the inscribed portions of the tablets. In consequence of this peculiarity, the untangling of the bewildering mass of partly effaced wedges and feeble remains of pictorial representations appears often as a hopeless task even to the most experienced eye.

that are accessible in the public and private collections of Europe and America. Then it will be possible not only to determine the age of seals and seal cylinders more accurately, but also to trace the factors and influences which were active in the history and development of Babylonian seal engraving. The book announced above is intended as a beginning in filling a seriously felt gap in our present Assyriological literature.

The names of witnesses and other persons who left impressions of their seals, seal cylinders (both called *kunukku*), seal rings (*un-qu(qa)*, *un-qu hurāsi* (81 : L. E.)), or their thumbmarks (*su-pur*, *supur* = DUBBIN),¹ or seal impressions and thumbmarks (*kunukku u supru* (50 : R.), *supru u un-qu* (49 : R.)), or different seal impressions at the same time (*kunukku u un-qu* (32^a : Lo.E.)), have been published for various reasons with the text of the documents. They enable us to form a correct idea of the customs and rules observed in connection with the sealing of tablets ; they furnish us valuable variants for the reading of proper names and titles (cf. **Ki-na-aplu** (71 : 8) with **Kîna(DU)-aplu** (71 : L. E.), **E-a-bullit-su** (80 : 7) with **Ea(^aBE)-bullit-su** (80 : R. E., also li. 2), ^h*us-tar-bâr³-ri* (102 : 16) with ^h*us-tar-ba-ri* (102 : L. E.)) ; occasionally they are accompanied by the names of the fathers not occurring in the transactions proper (cf. 75 : 16 with R. or 80 : 2, 7 with R. E.) ; they supplement names and phrases mutilated or entirely broken off in the text (cf. 59 : 19 (end) with L. E., 86^a : 1 (beginning) with U. E. (*Ea-zittishu*), 94^a : 12 f. with R., 102 : 8 with O., L. E. & R. E., 107 : 9 with L. E.) ; and there are even cases in which persons not mentioned in the text at all left their names and seal impressions on the tablet (cf. 55 : R. (*Ardi-Bél*), 82 : L. E. (*Zitti-Nabû ^hdâtabâra sha Artarêmu*), 83 : Lo.E. (*Bél-nâdin-shumu*), 92 : R. E. (*Dannâ*), 102 : R. (*Aplâ*)), apparently corresponding to such cases in the Neo-Babylonian contract literature in which persons, for some reason present (cf. Kohler in Peiser, *Babyl. Verträge*, p. XLII, § 11, end), are introduced by *ina ashâbi sha*, “in the presence of” (cf. 48 : 37). The impression of the seal ring of a woman, *Amat-Bélit*, is found on 53 : Lo. E.

In accordance with the law of excavations enforced in the Ottoman empire, all the tablets rescued from the archives of Murashù Sons were originally sent to Constantinople, where most of them are now deposited in the Imperial Archaeological Museum.

¹ Cf. the fuller phrase *supur mBa-ga'-mi-i-ri aplu sha mMit-ra-da-a-ti ku-um kunukki-shu shu-um-da-a-tim*, “the thumbmark (made with the thumb-nail) of B., s. of M., was placed (impressed upon the tablet) instead of his seal.” Cf. 48 : 34. The pausal form of the permanisive III¹ of *emêdu* (*shumdâti*) is perhaps due to the preceding *Mitradâti*. We also learn the gender of *supru* (fem.) from our passage. Cf. also *un-qu parzilli* (Const. Ni. 558), *siparri* (565, 582).

² Still transliterated with *Bél* by Delitzsch, *Beiträge zur Assyriologie*, III, p. 391. So far as I know, *aBE* denotes exclusively *Ea* in the Neo-Babylonian contract literature, as can be shown from several parallel passages in Strassmaier’s text publications. Cf. the Introduction, “Proper Names,” p. 23.

³ Cf. Brünnow, *A Classified List*, 7768. The sign can be easily mistaken for *pa* in our text. Cf. also p. 28, note 2.

But several boxes of antiquities were presented by His Imperial Majesty, the Sultan, to the undersigned editor in recognition of his services in connection with the reorganization of the Babylonian Section of the Imperial Museum (1893-1897). With the exception of a few specimens retained as a souvenir, I, on my part, presented this collection with other antiquities to the Babylonian Museum of the University of Pennsylvania, where they will be on exhibition as soon as the new building is finished.

A word remains to be said as to the division of work in the present publication. After I had examined and selected the material which was to appear in this volume, my pupil and friend, Dr. A. T. Clay, formerly instructor of Assyrian and Hebrew in the University of Pennsylvania, began the copying of the tablets under my supervision. The experience which he had previously obtained in the exercises of the Assyrian Seminar conducted by myself, and the patient devotion with which he performed his task, enabled him to produce very satisfactory results. When he had finished his work, I examined sign after sign once more critically, comparing his plates with the originals and changing, adding or removing wherever this was necessary. Of especially difficult or effaced passages I furnished the copies myself. Large portions of Nos. 65, 86^a, 87, 88, 99, 102, the whole of No. 3^a, which presented exceptional difficulties (cf. the Introduction, Palaeography), and most of the shading in the texts, were added by my own hand, but it will be hard, I trust, to distinguish Dr. Clay's work from my own. For the names of witnesses and other cuneiform characters on the margin, for the Aramaic inscriptions, for all the critical notes printed on the plates, for the Introduction, Concordance of Proper Names, and Table of Contents, I am alone responsible. As each of us devoted more than a year of continuous work to the preparation of the plates, and as every line was transliterated and translated by myself,¹ before the last critical examination of the copies began, we lay this edition before the Assyriological world, with the belief that it will be found entirely trustworthy and prepared with the same care and exactness which secured for the previous publications of this Series such a favorable reception from all the critics.

Particular pains was taken again to imitate as faithfully as possible the different hands of the scribes, who frequently grouped the signs very closely together, writing scrawlingly and hastily. In the study of the history of cuneiform writing it is not less important to trace the factors active during the period of its decay than to untangle the mysteries which enshroud its beginnings. In any edition of Babylonian texts published for the first time, we must, in the interest of philological research as well as palaeography, aim at reproducing all the scribal peculiarities rather than at grouping and drawing the single cuneiform signs according to our own personal taste, thus furnishing a subjective

¹To be published later in Series C of the expedition work. Cf. also my articles in the *Z. A.*

interpretation instead of an objective picture of what is on the clay tablet or stone. The method to be employed must be different from what it was and is in the case of publishing Assyrian tablets from the royal library of Ashurbânapal copied by a comparatively small number of calligraphers from Babylonian originals in the well-established forms of cuneiform writing of the late Assyrian empire. Assyriology has gradually become Babyloniology, if I may coin this word for the present occasion. And in order to facilitate the study of the tens of thousands of Babylonian originals preserved in American and European museums, we must train the eyes of our students in connection with careful text-editions to see the handwriting of the scribes as it is rather than as we would like it to be.

I would here express my grateful recognition of the great kindness of Prof. Nöldeke, in examining the foreign names marked by an asterisk in the Concordance, and rendering his valuable assistance in the analysis and identification of those indicated by the letter (N.).

For the English rendering of certain legal terms and for the reading of the last proof I have had the support of my friends, Mr. Patterson DuBois of *The Sunday School Times*, Prof. Gibbons of the University of Pennsylvania, Rev. Dr. A. Long of Robert College, Constantinople, and Mr. John Sparhawk, Jr., treasurer of our Archæological Department; while the quotations of the first eleven pages of the proper names were compared with the originals by my pupils, Messrs. Koppe and Van Burkallow, at a time when my feeble health made this assistance especially desirable. To all of them I extend my hearty thanks.

With Messrs. Meynen & Co., D. Anson Partridge, and the Philadelphia Photo-Engraving Co., I made numerous experiments toward obtaining more satisfactory half-tone reproductions. The results reached by our combined efforts will greatly increase the usefulness of the book.

In conclusion I would record my personal gratitude most of all to Mr. Eckley Brinton Coxe, Jr., of Philadelphia, who, recognizing the importance of the work done by our expedition, placed a generous sum in the hands of Charles C. Harrison, LL.D., Provost of the University of Pennsylvania, for my own publications. I am thus enabled to submit this volume at an earlier time than I originally anticipated.

INTRODUCTION.

At the end of May, 1893, while occupied with the exploration of the central part of the northwestern ridge¹ of the ruins of Nippur, the Babylonian Expedition of the University of Pennsylvania discovered a room (5.5×2.75 m. wide) about 6 m. below the surface. Its ceiling had collapsed long ago; its side walls, for the greater part, were in ruins, and the clay floor was covered with earth and rubbish from above. A gang of trained Affej workmen was ordered to remove the débris that filled the room, when suddenly they noticed numerous clay tablets lying immediately upon the floor or very close by it. A few hours later, the whole room had been carefully searched and cleaned. Seven hundred and thirty tablets were gathered and safely stored in the "castle" of our fortified camp. Fortunately a considerable number of these cuneiform documents were intact and in a fine state of preservation, but the rest of them were cracked and broken or otherwise more or less damaged.

After a critical examination of the building itself and of the condition, position and contents of the tablets found therein, it became evident, that the excavated room had been once used as a business archive by the apparently wealthy and influential firm of **Murashû Sons of Nippur**, who lived in the time of Artaxerxes I. (464–424 B.C.)² and Darius II. (423–405 B.C.),³ in whose reigns the documents are dated. All these tablets, covering a period of more than fifty years and inscribed by many different hands⁴ in Nippur and other neighboring places, were made of an especially pure and soft clay and moulded and baked with greater care⁴ than is usual in the Babylonian tablets met

¹ Situated on the western side of the *Shatt-en-Nil*. Cf. the map in my first volume, Pl. XV.

² The reigns of these two Persian kings are given according to Eduard Mahler's "*Vergleichungstabellen der Babylonischen und Christlichen Zeitrechnung von Nabonassar (747 v. Ch.) bis 100 v. Ch.*," in his essay *Zur Chronologie der Babylonier*, p. 12, f. (reprint from *Denkschriften der Mathematisch-Naturwissenschaftlichen Classe der Kaiserlichen Akademie der Wissenschaften* in Wien, Vol. LXII). I agree with the results reached by Mahler entirely.

³ The 120 texts published in the present volume were written by 41 different scribes. Cf. the "Concordance of Proper Names," I, 3 ("Names of Scribes").

with in my experience, which rests upon an examination of over 40,000 cuneiform texts belonging to nearly every century of the last 4000 years B.C. In their regular form and beautiful appearance many of these tablets approach those of king *Ashurbânan-apal's* famous library, from which our young Assyriological science has chiefly drawn its material.

From a study of these documents we learn that Murashû had several sons (cf. *ahéka*, 25 : 4), *Bél-hâtin* and *Bél-nâdin-shumu*¹ being prominent among them. That these two persons, each of whom is called *aplu sha Murashû*, were children of the same father,² although never really designated as brothers, follows with probability from the following considerations: 1. All the seven hundred and thirty tablets excavated were found in the same room, and, according to form, color, contents, names of witnesses and scribes and seal impressions, belong closely together. 2. In all the texts here published, with the exception of Nos. 1, 42, 43, 54,³ either *Bél-nâdin-shumu* or *Bél-hâtin* (or their sons) transact the business recorded. This can be explained satisfactorily only if these two persons, whose documents were lying together, stood in close personal relation to each other, i.e., if they were brothers. 3. This result is confirmed by No. 12 and a tablet in Const. in which it is expressly stated that an officer who presents an order to *Bél-hâtin* receives his payment from *Bél-nâdin-shumu*. The latter, being mentioned in all but seventeen⁴ of the texts here submitted, was doubtless the more prominent member of the family; the former, who probably was the older brother,⁵ seems to have died at an early age (437 B.C. or soon afterwards), as I infer from the total absence of his name in connection with business transactions after *Tishrîtu* 13th of the 28th year of Artaxerxes (No. 12)⁶ and from the frequent mention of his son *Rímút-Ninib* (abbreviated *Rímút*, 61 : 3 ; 78 : 1) instead of him in the later documents. It is, however, of interest and importance to note that the latter has the apposition *aplu sha Bél-hâtin* only in one document (48 : 24, U. E.), where he appears as witness of his uncle, *Bél-*

¹ Once abbreviated into *Bél-nâdin* (19 : 12), unless a mere mistake of the scribe.

² A certain *Qudâ*, only once mentioned as a witness (48 : 23, U. E.), is also called *aplu sha Murashû*. But there is no reason for regarding his father as identical with our *Murashû* above.

³ It would be difficult to explain the presence of these four tablets among documents which exclusively relate business transactions of but one family, unless certain persons mentioned in these four texts were connected with this family as *hardu*, *hpaqdu*, *hmâr biti* or the like. For all the four documents such a connection can be proved or made very probable. *Bél-supé-muhur*, who, according to 1 : 2, was *hpaqdu sha Arsham*, appears later as *hardu* or *hpaqdu sha Bél-nâdin-shumu* (68 : 1, 5, 8); *Tîrakâm aplu sha Bagapânu* (54 : 2) is doubtless identical with *Zirikâmu hmâr biti sha Bél-nâdin-shumu* (68 : 1, 5, 8); *Ribât aplu sha Bél-erba* (43 : 2, 8) is probably the same person as *hardu sha Bél-nâdin-shumu* (52 : 1, 13, R); and a close personal relation between *Mûrânu aplu sha Iddina-Bél* (42 : 3) and *Bél-nâdin-shumu aplu sha Murashû* results from the phrase *sha qât* in 66 : 2.

⁴ His name does not occur in Nos. 1, 2, 3, 5, 42, 43, 46, 47, 54, 61, 73, 78, 87, 90, 92, 108, 109.

⁵ *Bél-nâdin-shumu's* name is not found in any of the four documents dated before the twentieth year of Artaxerxes I., while *Bél-hâtin* appears active in two of them, and the latter's son, *Murashû*, in one (Const. Ni. 525).

⁶ Nos. 2, 3, 5, 12 are the only tablets which show *Bél-hâtin* actively engaged in business.

nádin-shumu. In two tablets, written half a month before, he is called *aplu sha Bél-hátin* (46 : 4 ; 47 : 6) or *aplu sha Murashú* (46 : 2 ; 47 : 3), while in all the other inscriptions in which his name is mentioned he appears exclusively as *aplu sha Murashú*. It is possible to regard *Rímút-Ninib a. sh. Bél-hátin* (46 : 4 ; 47 : 6) and *Rímút-Ninib a. sh. Murashú* (46 : 2 ; 47 : 3, etc.) as two different persons (son and brother of *Bél-hátin*). But it seems more reasonable to assume that *Rímút(-Ninib)* taking his father's place in the firm of "Murashú Sons" after the latter's death, for obvious business reasons retained his father's designation, *aplu sha Murashú*, generally known to the public. A son of *Bél-nádin-shumu* originally also mentioned in 26^a : 1, was called *Murashú* (101 : 4 and Const. Ni. 542), and another son of *Hátin* (abbrev. from *Bél-hátin*) was likewise named after his grandfather, *Murashú* (Const. Ni. 525).

As stated above, all the seven hundred and thirty documents discovered are dated in the reigns of Artaxerxes¹ and Darius. My reasons for identifying these two kings with Artaxerxes I. and Darius II. are the following :

1. The place of discovery, the quality and color of the material, the size and shape of the tablets, the style of art, especially the frequent similarity and even identity of certain designs in the seal impressions, characteristic palaeographical peculiarities in a number of cuneiform signs, the apparent relation between certain business transactions dated in the reigns of the two kings, the employment of the same persons as scribes and witnesses during the reigns of Artaxerxes and Darius, and, finally, the fact that *Bél-nádin-shumu* appears as the leading member of the firm of "Murashú Sons" under both kings, indicate that Artaxerxes and Darius must have reigned successively, unless separated from each other by another king of a very brief² reign.
2. The circumstance that comparatively very few of the seven hundred and thirty documents are dated in the first half of Artaxerxes' and in the second half of Darius' reign, while the bulk of the tablets belongs to the close of Artaxerxes' and to the beginning of Darius' reign points to Darius as the successor of Artaxerxes, not *vice versa*.
3. All the documents of *Bél-hátin* are dated in the first twenty-eight years of Artaxerxes, those of his son *Rímút(-Ninib)* in the last six years of the same king and in the first years of Darius. This fact confirms the result at which we have arrived, that Darius must have lived **after** Artaxerxes.
4. The latest date obtained for Artaxerxes from our tablets is the seventeenth day of *Shabátu* in the forty-first year of his reign. As the number of documents dated in the forty-first year of Artaxerxes and in the first year of Darius is comparatively very large,

¹ For the eight different ways in which the name of Artaxerxes is written in our texts, cf. the "Concordance of Proper Names," I, 1 ("Male Names"), under *Artahshassu*. For Darius cf. Vol. X. The title given to the two kings in the dates of the tablets is always *shar mâtati*.

² As not a single document bears the name of this assumed ruler.

and, moreover, as all these documents were written at brief intervals from one another, it is safe to assert that the Artaxerxes of our tablets must have died at the end of the forty-first year of his reign. From this it follows that he is identical with Artaxerxes I., who ruled forty-one years, and that King Darius in whose reign by far the larger number of tablets is dated, can only be his successor, Darius II.

For the contents, translation and analysis of these texts cf. Series C. The only points which can be treated here are the following :

PALÆOGRAPHY.

On the whole the cuneiform writing of our tablets is identical with that known from Strassmaier's publications of Neo-Babylonian contracts. A constant development of the script, however, taking place, certain cuneiform characters become more simple, and differences formerly existing between several signs begin to disappear the more we advance in the latter half of the first Pre-Christian millennium. Traces of this development or degeneration are clearly visible in the texts here published. A complete list of all the variants in use will be attached to Volume X of Series A. For the present it will suffice to call attention to some more prominent features of the cuneiform writing of the time of Artaxerxes I.

1. Owing to the carelessness of certain scribes, a number of similar cuneiform signs became identical at all periods of Babylonian writing. It is, therefore, not very remarkable, that in our own texts the signs for *išu* (80 : 5) and *pa* (48 : 30), for *ma* (14 : 4, 7, 9) and *ash* (14 : 1), for *ma* (75 : 1, 8; 85 : 12; 94 : 6) and *ba* (75 : 2, 5, 11; 109 : 12), for *tú* (101 : 5) and *qa* (109 : 1), for *bar* (54 : 3) and *me* (99 : 2), etc., are frequently written alike. But it is worthy of note and important for the understanding of the degeneration of the cursive writing, that even **cuneiform signs which originally bear little resemblance to each other, fall frequently together**,¹ in consequence of an abbreviation of certain classes of signs—a peculiarity which becomes more common in the cuneiform texts of the fourth and third centuries B.C. Cf. e. g. *ilu* (63 : 4; 85 : *passim*; 36 : L. E. in *Bēl*) and *bar* (*passim*), *na* (62 : 12, 16; 63 : 6, 14) and *GISH* (= *līshir*, 17 : 20 end, cf. 26 : 19), *kan* (3^a : 14; 105 : 15), and *mu* (3^a : 15; 105 : 15), *kan* (85 : 27; 86 : 25) and *she* (*passim*), *sharru* (85 : 2) and *bi*² (85 : 8); *su* (85 : 24) and *ma* (85 : 11 f.);

¹ In some respects this period is not unlike that of the first dynasty of Babylon. Cf. the lists in Meissner's *Altbabylonisches Privatrecht*.

² The original picture of *bi* is a pointed vase with a spout (on the right!) in an **upright** position and filled with a liquid, designating *shikaru* (probably "date-wine"). The original form is fairly well preserved in I H. (abbreviation for the first volume of my inscriptions), Part 2, No. 105, li. 9, and No. 110, 6-4 f. c. This latter character together with others which represent almost the original picture and can be understood only if standing upright, go far to weaken Delitzsch's arguments recently set forth (*Der Ursprung der Keilschrift*, p. 24 f.) against the principle of the original position of the cuneiform signs defended by myself (l. c., p. 40, note 3). In view of the overwhelming mass of palæographical and archaeological material already published, it will be an easy

ni (85 : 23)¹ and *kak* (*passim*) ; *sha* (6 : 2, 10 ; 9 : 13 end) and *aplu* (=A, *passim*)—both written with three wedges—or *sha* (36 : 1 end ; 104 : 11 end) and *aplu* (=A, 36 : 14 ; 109 : 12)—both written with two wedges—and even *sha* (36 : 14 ; 64 : 14 in ^m**Sha-pi-kal-bi**) and *aplu* (=A, 31 : 2, 3, 15) and the determinative for man (*passim*), and others.

2. This general degeneration of the cuneiform writing, manifested by the frequent omission of important and characteristic wedges, can be traced in a number of other signs, cf. *tah* (104 : 15, one wedge at the beginning) or *qât* (81 : 5, followed by the dual sign expressed by one wedge). These two examples, like others, may be due to mistakes of the scribes. But there are other cases, like *ahu*, “brother” (85 : 18), *in* (85 : 20), *su* (85 : 24), ^a*Bélit* (63 : 4) or *AZAG* (86 : 1, in the ideog. for *kaspu*), *ha* (85 : 21), *as* (105 : 15), in which a certain regularity can be observed. There is, first of all, **a very decided tendency to write**  **instead of**  **in all cuneiform signs in which these double wedges occur.** The following examples may serve as an illustration :

a. **One perpendicular wedge is written instead of two** in the signs for A, used as a phonogr. (*a*, 31 : 7, 16) or as an ideogr. (*aplu* (31 : 16), especially in the phrase *aplu sha* (16 : 1, 2 ; 17 : 19 ; 26 : 15 ff.; 47 : 21 ; 90 : 6 ; 105 : 1 ff., etc.), or *apil-shu sha* (16 : 13 ff.), *mê*, “water” (16 : 3, 9) and the first sign of *nâru*, “river” (16 : 9 beg. ; 32 : 3 beg., etc.), for *e* (31 : 7), *ia* (54 : 12), *tir* (31 : 11), *sha* (36 : 1 ; 104 : 11), *za* (8 : 8 ; 31 : 19 ; 62 : 10 ; 93 : 7), *ha* (63 : 7 ; 86 : 6 ; 87 : L. E. ; 93 : 7 ; 103 : 4), *un* (81 : L. E.), etc.

In connection with this it may be mentioned that *a* (*aplu*) is written in four different ways,      (*passim*, resp. 36 : 1, 13, 14, resp. 36 : 14 ff.; 104 : 11, 14, resp. 31 : 2, 3, 15), two or three of the four forms frequently occurring in the same text (31 : especially lines 2 and 16) or even in the same line (36 : 13). Of *sha* the following six different forms are known      (*passim*, resp. 6 : 2, 10, 12 ; 9 : 13 end ; 14 : 11 beg. ; 28^a : 10 end, resp. 36 : 3, 6, 11 ; 82 : 16, 23 f., resp. 6 : 11 ; 104 : 2, 12, 15, resp. 36 : 1 end ; 104 : 11 end, resp. 46 : 4 ; 90 : 6 ; 100 : 13 ; 104 : 14 ; 109 : 11), of which sometimes two (6 : 4 ff., resp. lines 2, 10, 12) or three (44 : 3, resp. 8 ff., resp. 22, or 84 : 1 ff., resp. lines 8 beg. 14, 16, resp. lines 6 beg., 10, U. E.) or four (36 : 18, resp. 1 end, resp. lines 3, 6, 11, resp. 12 ff.) occur in the same text or even line (66^a : 4 ; 82 : 24, three different forms). Strassmaier, *Cyr.* 281 : 15, is correct (against *B. A.* III, p. 443, note 2).

b. **One oblique wedge instead of two** in the signs for *din* (*ina-an-din*=*inamdin*, 47 : 4 ; 62 : 9), *kan* (83 : 9, R. E.; determ. after numbers, 63 : 18 ; 64 : 17 ; 105 : 15), *mu* (62 : 13, 16 ; 76 : 13) and others.

task to show the entire correctness of my own theory. This will be done in my Introduction to Part 3, now in course of preparation.

¹ Cf. also my remarks in *I H.*, Part 2, p. 40, note 2.

c. **One horizontal wedge instead of two** in the signs for *a'*, *i'*, *u'* (47 : 4 ; 85 : 21), *ihu* (36 : L. E.; 63 : 4; 85 and 86 *passim*), *na* (62 : 12, 16; 63 : 6, 14), *kin* (= *DU*, 3^a : 9; 63 : 14; 87 : 11), in the second sign of the ideogr. for *náru*, "river" (7 : 8), etc.

3. Contrary to the peculiarity just treated, we sometimes find a **tendency to increase the two wedges of the group**  **to three, obtaining thereby** , doubtless arisen under the influence of the two corresponding forms for *sha*, in use at that time. Cf. e. g. the signs for *arhu*, "month" (53 : 4, 9; 58 : 5, 19; 66 : 5, 6, 15), *bábu*, "gate" (30 : 5; 55 : 3; 58 : 8), *dan* (53 : 6, 9), *e* (53 : 10), *karpatu*, "pot" (43 : 3), *kip* (70 : 4), *nadánu* (= *SE*, 66 : 7), *s(z)ab* or *núr* (47 : 19; 56 : 5; 57 : 4, 8; 65 : 28; 79 : 13), *GU¹* (35 : 10, 13), *GIG¹* (65 : 10, 15, 16), etc.

4. Occasionally **cuneiform signs of a much earlier period occur** in the midst of other signs regularly in use at the period of Artaxerxes I. Cf. especially No. 13, e. g. *su* (written with 5–7 horiz. wedges, 13 : 2, 3, 8, 9), *ú* (5–6 perpend. wedges, 13 : 1, 4), *la* (6 horiz. wedges, 13 : 4), *gal* (5 horiz. wedges, 13 : 4). Cf. also 14 : 8 (*ú*), 18 : 14 (*dupsar*) and others. This fact only confirms, what we knew before, that the scribes of the Persian period were acquainted with the so-called hieratic writing,² which continued to be used for religious purposes even to a later time.

5. In the cursive writing of all periods of Babylonian history we frequently meet with **extended and dissevered characters**. Sometimes in our own texts single portions of the same cuneiform sign are separated so widely from each other that they appear as independent characters and can be recognized as units only by the context. Cf. e. g. *a* (15 : 8, 12), *BAR* (54 : 3), *DI* (32^a : 14), *ishtén* (-*en*, 35 : 24), *ti* (7 : 16), *ia* (15 : 19 end), *it* (85 : 16, 21), *KAK* (= *ibni*, 85 : 9), *p̄t* (= *KA*, 7 : 24), *UR* (in *kalbu*, 7 : 24), *SAG* (43 : 14), *rabú* (= *GAL*, 85 : 5), and especially *shiglu* (85 : 1, 11).

6. The stylus employed for writing frequently became worn out, the sharp corners or points becoming gradually round, then flat and finally even concave. In consequence of this **the impressions** made by the scribes in the soft clay became rather indistinct, frequently **appearing as double wedges**. Examples of this kind of writing are not very rare; they occur in our own texts, cf. 61 : 1, 3, and especially No. 3^a. At the first glance the latter text seems to have been written in an entirely different cuneiform writing and language. The tablet was returned by my co-worker with the remark that he "could not recognize one character." It would have puzzled even older and more experienced Assyriologists. In the copy furnished by my own hand all the peculiarities

¹ Preceded by the determ. *she* and denoting a certain kind of grain. For *sheGIG-BA*=*kipatū* cf. *V. R.* 39 : 28 c. d. (Delitzsch, *Assyrisches Handwörterbuch*, p. 317a, reads *kibātu* in view of *K. 40*, col. II, 52.) and *K. 166*, 12–13 (cf. Jensen in *Z. A.*, I, p. 13), where *KU(ZID)GIG-BA*, synon. of *KU(ZID)SIS*=*ki-im* (𒂗𒃲) *kip-ti*, and *II R. 27*, 53 e. f., where *KU(ZID)GIG-BA*=*musarū marus*. Cf. also Strassmaier, *Cyrus*, 59, 54, and *B. 7. Peculiar is the plural sign *mesh* after *ilu* and "Shamash in the transliteration of foreign Semitic proper names. Cf. *A-qa(qab)-ilu^{pl}*, *Ba-na'-ilu^{pl}*, *Ba-rik(-ki)-ilu^{pl}*, *Ia-di-ih-ilu^{pl}*, *Ia-da-ar-ni'-ilu^{pl}*, *Ilu^{pl}-gab-ri*, *Ilu^{pl}-id-ri'*, *Ilu^{pl}-li-in-dar*, *Ilu^{pl}-qa-ta-ri*, *Ilu^{pl}-za-ba(d)-du*, *Na-tan-ilu^{pl}*, *Ra-ab-bi(Rab-bi)-ilu^{pl}*, *Ra-hi-im-ilu^{pl}*, *Sha-ra'-a-ilu^{pl}*, etc. and *Ba-rik (ri-ki)-Shamash^{pl}*, ^a*Shamash^{pl}-ba-rak-ku*, ^a*Shamash^{pl}-la-din-ni*, ^a*Shamash^{pl}-li-in-dar*, ^a*Shamash^{pl}-nûri'*, etc. Comparatively few are the cases in which *mesh* is omitted. Cf. *Ra'-a-bi-ilu Ra-hi-im(hi-mi)-ilu* (36: 11; 69: 1), ^a*Shamash-na-da-ri*. So far as the use and meaning of ^a*Shamash* is concerned, a plural is here out of question, and in names like *Ba-na'-ilu^{pl}*, *Ia-da-ar-ni'-ilu^{pl}*, *Sha-ra'-a-ilu^{pl}*, *Ilu^{pl}-li-in-dar*, etc., where the other element is a verbal form in the singular, the subject cannot stand in the plural. A similar result is reached by comparing these and other names containing the element *ilu^{pl}* with the corresponding names in the other Semitic languages. We find the singular **š** in use where the Babylonian scribes as a rule offer *ilu^{pl}*. It is, therefore, evident that in either case *mesh* cannot indicate a plurality of gods, but must have been employed for expressing a sound which appeared to the Babylonian mind as one of their own plural endings. From the fact that in a number of these or similar names the other Semitic languages have *ili*, "my god,"¹ it may be that the Babylonian scribes mistaking *i*, the pronominal suffix of the first person singular, in these foreign names for their own plural ending *e*, later pronounced *i*, rendered *ili*, "my god," and *shamshi*, "my sun," by *ili* (*ilu^{pl}*), "gods,"² and ^a*Shamshu^{pl}*, "suns." In the Concordance of Proper Names these two words are transliterated *ili* and *Shamshi*.

¹ Cf. especially the rich material furnished by the inscriptions from southern Arabia, as recently shown by Hommel, *Altisraelitische Ueberlieferung*, pp. 81 ff. Compare e. g. *Ilî-rabbi* with *Rabbi-ilu^{pl}* above, or *Ilî-shara'a* with *Shara'a-ilu^{pl}* above, or such Hebrew names as *Eli-ezer* with *Ilupl-idri'* above, *Elî-şûr* with *Ilupl-qatari* above, etc.

² The plural of *ilu* reads *ilâni* and *ilê(i)*, cf. Delitzsch, *Assyrisches Handwörterbuch*, p. 59b. The Assyrian plural *ili* may also be inferred from the wavering writing of such pure Assyrian names as *Ashur-etyl-ili* or *ili^{pl}*. This can be explained satisfactorily only by assuming that sing. and plur. were pronounced alike.

8. Of other palaeographical peculiarities may be mentioned the writing of *ishtēn(-en)* *alpu^{coll.}*¹ 67 : 7 (cf. also II *alpu* (49 : 6) II *alpu^{coll.}* (34 : 2, 11), IV *alpu^{pl.}* (35 : 8), XX *alpu^{coll.}* (65 : 4), etc.), the extraordinary writing of the numeral 162 in 1 : 3 and 16 (apparently to prevent confusion with 103),² the very frequent writing *ina-an-din* = *inamdin* (54 : 9; 62 : 11; 78 : 7 and often), the cuneiform signs for *pah* (14 : 13) and for *ād(t)* in *min-āt-ti (tum)*, 45 : 27; 59 : 12, etc., in the passage *la i-bat-taq, ina úmu (-mu) bit-qa ina lib-bi ib-āt-qa* (= *ibátaga*, 55 : 9) and in the frequent name **Ad-dan-nu**. *Ma-shi-hu*, "measure,"³ is always preceded by the determ. *isū* (cf. e. g. 17 : 5; 19 : 6; 22 : 4; 29 : 21; 45 : 14, 26; 65 : 11). The demonstrative pronoun *shu'atu*, frequently occurring in our inscriptions, is exclusively written *MU^{pl.}* = *shumáti* (cf. *shú-ma-a-tim*, Peiser, *Keilschriftl. Actenstücke*, p. 28, l. 26) = *shuFáti* = *shu'áti* = *shu'á'ti*, and used even for the plural *shu'atunu* (cf. *sheKUL^{pl.}* *MU^{pl.}*, 28 : 8; 30 : 18; for other examples cf. my *Assyriaca*, p. 6, note ll. 10 ff.). As I have pointed out in *Assyriaca*, p. 58, the length of the vowel *a* (in *shu'ati*) does not necessarily follow from this writing *MU^{pl.}* (against *B. A.* III, p. 431). We learn from it only that the accent, which in Assyrian may be expressed by lengthening the vowel or by doubling the following consonant (Delitzsch, *Assyr. Gram.*, § 53, c), rests upon the syllable *á*, which I regard as short (*shu'á'tu*) similar to the Ethiopic *wé'ě'tū* (cf. *Assyriaca*, pp. 55–58).

PROPER NAMES.

The transliteration of Babylonian proper names, for the greater part written ideographically, offers peculiar difficulties. In consequence of this the precise reading of a large number of them will always remain more or less doubtful. On the other side, many of the names found in the Neo-Babylonian contract literature can be read correctly, if certain laws underlying their formation are observed. The syllabic writing often existing alongside of the ideographic, not only furnishes us the key for the understanding and establishing of these laws, but it also provides us with the means of controlling, within certain limits, the correctness of our own transliteration.

This is not the place for discussing and grouping these laws, but a word must be

¹I distinguish between *ZUN* = *coll.* and *MESH* = *pl.*, for the former is generally used as a mere det. after singular nouns with a collective meaning (e. g. "wool," "food," "dust"), the latter is the regular plural sign. Owing to the close relation between a plural and a collective noun, *ZUN* takes frequently the place of *MESH*.

²That the scribe intended this group for 162 is plain from an addition of the single items. The scribe, however, made a mistake twice in adding the units, for the total sum is neither 1097 (li. 4) nor 1099 (li. 17), but 1095. The numeral 60 is written 6×10 in 65 : 13; 102 : 3.

³Cf. the phrases *ina isumashīhu (hi) sha Ipi* (72 : 6), *Ipi Iqa* (4 : 5), etc.; *ina isumashīhu sha B.* (17 : 5; 19 : 6–7 and often); *ina isumashīhu rabū sha B.* (86^a : 15, 22; 95 : 6), the frequent *ina isumashīhu sha ú-si-ish (shesh)-tum sha B.* (e. g., 29 : 21 f.; 52^a : 4, 7; 65 : 11, cf. p. 40), *ina isumashīhu tarṣi(u) sha B.* ("geaichtes Maass," 32^a : 6; 58 : 7). Cf. also *ina isumashīhu sha ku-ru-ub-bu*, Const. Ni. 496 : 6; 587 : 6; 603 : 6 f.

said as to the transliteration of certain ideograms frequently occurring in the personal proper names of the tablets here published.

Many of the personal proper names which we meet in the Neo-Babylonian cuneiform literature consist of two or three elements—subject and verb, or subject, verb and object. The subject, as a rule, is a deity. In dealing with their transliteration in the following pages, we keep these two classes of names separate.

I. In names consisting of **two** elements the deity (subject) may stand at the beginning or end. The other element, which represents the verb, can be transliterated by the præterite (with or without *lu*), present, participle or imperative. From our own texts only a limited number of examples written phonetically (or in part so) can be quoted, *e. g.*, *Mu-shal-lim-Bél*, *Mu-she-zib-Bél* (*Ninib*), *Na-shi-ilu*,—*I-shi*^a*-Shadú-rabû*,—*Bél-iq-bi*, *Bél-iqîsha(-sha)*, *Bél-épush(-ush)*, *Bél-ú-pah-hir*, *Bél-ú-shal-lim*, *Bél(Nabû)-ú-she-zib*, *Ninib-er-ba*, *Sin-ik-sur*,—*Bél-mu-tak-kil-[lu]*, *Bél-(Nabû)-na-din*, *Bél(Ninib)-na-ṣir*, *Nabû-ta-ri-iṣ*, *Ninib-ga-mil*,—*Bél-ki-shir*, *Gula-mu-gur*, ^a*Shadú-rabû-she-zib*. In names like *Bél-e-ti-ir* it is doubtful whether the verb is an imperative, a participle or the third person sing. præt. (cf. Delitzsch, in *B. A.*, III, p. 388). In several cases the particular verbal form to be chosen is determined by the usage of language, as becomes evident from a collection of proper names. More frequently, however, two or three or even four different forms of the same verb occur side by side in the same connection and position. Cf. ^a*Bél-ka-ṣir* (Peiser, *Babylonische Verträge* 61 : 19, Strassmaier, *Nabonidus* 803 : 15, *Cyrus* 188 : 26), *Bél-lik-ṣur* (Delitzsch, *Assyr. Handwörterb.*, p. 592a), *Sin-ik-ṣur* (cf. "Concordance"), or *Rammán-u-bal-lit* (Delitzsch, *A. H.*, p. 174b), *Nabû-bal-lit* (ib., p. 175a), *Marduk-mu-bal-lit* (Strassmaier, *Cambyses* 303 : 14), etc. In view of this condition it is impossible to give a definite rule for the transliteration of certain ideograms. Our decision must remain more or less arbitrary. In order to enable students to find the names consisting of a deity and a verb in the index without difficulty, I call their attention to the following manner of transliterating observed in these pages:

BA=*iqîsha(-sha)*; **DIR**=*ir=ātir(-ir)*; **GAL(IG)**=*shi=ushabshi*; **GI**=*ushallim*; **KAK**=*ibni*; **KAK**-*ush*=*épush*; **KAN**=*ērish*; **KAR**=*mushézib*; **KAT**=*kâṣir* (in *Bél-kâṣir*) or *iksur* (in *Sin-ikṣur*); **MU**=*iddina* (at the beginning) or *nâdin* (at the end); **PAP**=*nâṣir*; **SE**=*nâdin*; **SU**=*erba*; **SHE-GA**=*mugur*; **SHI-BIR**-*iq=mudammiq* (-*iq*); **SHUR**=*ētir*; **TIN** or **TIN**-*it*=*muballit(-it)*.

II. In names consisting of **three** elements—subject, verb, object—the deity, which is the subject, may stand at the beginning or at the end of the name. According to the place occupied by the ideogr. of the verb and according to the usage of language the verbal form differs. The names which have the deity at the end, occur comparatively rarely in our texts. Cf. *Aḥ-iddina-Marduk*, *Ú-bal-lit-su-Gula(Marduk)* and *Ilē'i-bullutu-*

Bél-máti. For the last name cf. Delitzsch in *B. A.*, III, p. 389. The following remarks refer exclusively to names where the deity stands at the beginning. We distinguish two classes.

a. If the ideogr. representing the verb stands in the middle of the name, it is always to be transliterated by the participle. Cf. such phonetic writings as *Bél-mu-she-zib-ahu*, *Nabú-mu-she-tiq-urru*, *Ninib-na-din-shumu*, *Sin-na-din-ahu*, *Shamash-na-din-zéru*. Exceptions of this rule are very rare. Cases like *Bél-tash-me-e-ri-ih-tú* ("O Bel, thou hast granted the desire"), *Bél-taz-kur-shu* ("O Bel, thou hast called him"), are, however, not exceptions, as *Bél* is not the subject but stands in the vocative. If the third element (object) is expressed by a suffix (*shu*, *ni*, *nu*, etc.), the verb may also stand in the (præs.-) præt. or in the imperative.¹ Alongside of *Ninib-mu-tir-(ri)-shú* (or *mutir=GUR*) we find in our text such names as *Bél-bul-lit-su*, *Bél(Nabú)-ú-sur-shu*, *Nabú-kusur-shu*, *Nabú-i-dan-ni* (= *Nabú-idanni* "N. saw (chose) me," cf. Delitzsch, *Assyrisches Handwörterbuch*, p. 305).

b. If the ideogr. expressing the verb stands at the end of the name, it can be transliterated by the (præs.-) præt. or by the imperative. Cf. *Bél-ah-it-tan-nu*, *Bél-shum-im-bi*, *Shamash-shum-iqísha(-sha)*, or *Bél-ba-a-ku-pi-tin*, *Bél-supé-mu-hur*, *Ninib-ahé-bul-lit*. Of some verbs only the imperative is found (e. g. *usur*) or at least in most cases; of others the præt. (*iqbi*, *ushabshi*), while of a third class, to which *bulluṭu* "to keep alive," *erébu* "to add," *nadánu* "to give" belong, either form is in use. But transliterations like "*Rammán-shum-naṣir*," given by Sayce (*Records of the Past*,² vol. II, p. 207), and Winckler (*Geschichte*, p. 102), or *Marduk(Nabú)-ukín-aplu(zér)*, which we read in *B. A.*, III, pp. 410 and 467 (Demuth, Ziemer), are an impossibility.

The cases treated under a. need no further comment. As to b., the verbal ideograms have been transliterated as follows: **BA**=*iqísha(-sha)*; **DU**=*ukín*; **E**=*iqbi*; **KAK**=*ibni*; **MU**=*iddina*; **SHESH**=*usur*; **TIN** or **TIN-it**=*bullit(-it)*.

If the second and third elements expressing verb and object are written with the same ideogram or with two different ideograms of which each has a double ideogr. value commonly occurring in proper names, the reading must remain doubtful in most cases. *Bél-MU-MU*, *Ninib-SHESH-SHESH*, *Nergal-MU-SHESH*, *Bél-SHESH-MU*, can be transliterated respectively either *Bél-nádin-shumu*, *Ninib-násir-ahu*, *Nergal-nádin-ahu*, *Bél-násir-shumu*, or they can be transliterated *Bél-shum-iddina*, *Ninib-ah-usur*, *Nergal-shum-usur*, *Bél-ah-iddina*. In view of the constant syllabic writing of the names *Ninib-na-din-shumu*, *Sin-na-din-ahu*, *Shamash-na-din-zéru*, etc., in our texts, I have transliterated **MU-MU** as *nádin-shumu*, **MU-SHESH** as *nádin-ahu*, **SHESH-SHESH**

¹Sometimes the imperative is also found, if the third element is *napishtim*, cf. *Nabú-u-sur-napishtim(-tim)*, Peiser, *Babyl. Verträge*, 69 : 14.

as *nášir-ahú*, and in view of the frequent ^{*d*}*X-SHESH^{pl}-MU* which must be read ^{*d*}*X-ahé-iddina* (resp. *idin*), I have transliterated **SHESH-MU** as *ah-iddina*. The fact that in all the examples of our texts in which the middle element is surely a participle, we never find the ideographic but always the phonetic writing (*na-din*, etc.), may be brought forth in favor of the rejected transliteration (*shum-iddina*, resp. *ah-usur*, resp. *shum-usur*). But I regard this fact as merely accidental, because there are examples enough known from other inscriptions where the middle element of the name of the same person (*nádin*) is written *MU* or *na-din*. The abbrev. name ^{*m*}*MU-MU* has been given as ^{*m*}*Shum-iddina*.

The transliteration of the ideograms apart from the two classes of names just mentioned is on the whole the same as that employed by Delitzsch in *B. A.*, III, pp. 390ff. The two gods most frequently found in the personal proper names of the inhabitants of Nippur and its surroundings are, as was to be expected, *Bél* and *Ninib*, who were principally worshiped in the temple of *Ekur*. There are a little over 300 names composed with *Bél* and about 150 which contain *Ninib* in the tablets here published. Whenever the name of a deity is written with different ideograms, their syllabic values are added in parenthesis, in order to facilitate the control. The ideograms in use for *Bél* are distinguished from each other by small numbers: *Bél*=^{*d*}*EN*, *Bél*¹=^{*d*}*EN-LIL*, *Bél*²=^{*d*}*L*, *Ninib* without any explanation in parenthesis is the transliteration of ^{*d*}*BAR*. For the other ideograms used for *Ninib*, cf. the list of gods given as section V of the "Concordance." In transliterating the ideogr. ^{*d*}*BE* with *Ea*, I differ from Strassmaier (cf. e. g. *Nabonidus*, 63 : 15, *Bél*(=^{*d*}*BE*)-*im-bi*), Peiser (*Babyl. Verträge* 2 : 15, cf. p. 330b, *Bél*(=^{*d*}*BE*)-*ibni*), Delitzsch (in *B. A.*, III, p. 390 middle) and others, who regard it as an ideogr. of *Bél*. I am acquainted with about a dozen cases in the Neo-Babylonian contract literature published by Strassmaier and others, in which the same name has the ideogr. ^{*d*}*BE* in one passage and is written with ^{*d*}*E-a* in another, but with no passage where ^{*d*}*BE* corresponds to any of the ideograms of *Bél*. For the present it may suffice to refer to the two different writings of the name *Ea-bullitsu* in one of our own texts (cf. 80 : 2 with 7) and in Const. Ni. 598 (cf. li. 16 with L. E.). ^{*d*}*BE* denotes the god *Ea* as *ilu naqbé* or the god of the subterranean waters.

There are many proper names of especial interest and value in the texts here published. I confine myself to the following five:

1. The name *Sha-me-e-ra-mu=Shamé-rámu* (75 : 6) is doubtless identical with the Greek Σεμίραμις. I am inclined to identify it also with Σειράμνης, the name of a Persian from Babylon, quoted in *Chron. Alex.* 88 : 24. Cf. Justi, *Iranisches Namenbuch*, s. v. Müller (Fragm. IV, 492) regards it as identical with *Seiramnes*, while Gelzer (*S. J. Africanus und die byz. Chron.* 1, 77) and Justi (*l. c.*) transliterate it "der Sumerier." Both interpretations are unsatisfactory, because too arbitrary in regard to the Greek

transliteration and ignoring Babylonian names actually existing. The Greek form is apparently corrupted, but much less than is generally supposed. It is simply due to a very common scribal error in Greek MSS. and inscriptions. Read ΣΕΜΗΡΩΜΟΣ instead of ΣΕΜΗΡΩΝΙΟΣ. (Cf. our well-known astronomical term *ZENITH*, which goes back to the Arabic *ZEMT*.)

2. The name *Bél-su-pi-e-mu-hur* (1 : 15) is once written *Bél-SIGISHE^{pl.}-mu-hur* (1 : 1). From a comparison of these two different writings of the same name and person we obtain the ideographical value *supū* for *SIGISHE*, hitherto unknown, so far as I know. In other Babylonian proper names this ideogr. has generally the value *karábi* "prayer," a synon. of *supū* (cf. *B. A.*, III, pp. 390 and 398, li. 6).

3. A name frequently occurring in the contract literature of the time of the Persian kings is *Bél(Nabû)-ID-DAN-nu*, also written *Bél-ID-DAN-ni* (Peiser, *Babyl. Verträge* 72 : 9) and *Bél(Nabû)-ID-DAN-na* (Peiser, *l. c.* 72 : 23; 113 : 29; *Keilschriftl. Acten-Stücke* 13 : 22). These different writings, in connection with the name *Nabû-ah-ID-DAN-nu* (cf. "Concordance" and Peiser, *Keilschriftl. Acten-Stücke* 17 : 15; 18 : 7; 19 : 7), in which the object is expressed by *ahu*, prove that *nu* and *ni* are not the suffixes "us" "me," as in the names *Marduk-iqîsha(-sha)-an-ni* (Peiser, *Babyl. Verträge* 107 : 22; 118 : 14) and *Marduk-iqîsha(-sha)-an-nu* (Peiser, *Keilschriftl. Acten-Stücke* 6 : 30; 7 : 23). The constant doubling of the consonant *n* indicates, that this name, which (being regarded as a compound substantive) could receive the nominal ending *u*, *i* or *a*, for a very simple reason had the accent on the syllable *DAN*. The name means "*Bél(Nabû)* gave." That this verbal form, however, cannot be transliterated *iddannu*, as is generally done, is proved by the Aramaic docket¹ No. 71, where our name appears as *נְבוּאַתָּן*, *i. e.*, *Nabû-ittan*. The verb, from which *ID-DAN-nu* is derived, is therefore not *nadânu*, but *natânu*, which belongs to the "Vulgär-Assyrisch" (cf. Delitzsch, *Assyr. Handwörterbuch*, p. 488).

4. Of the *ὑποκοριστικά* occurring in our inscriptions I mention only *Sillu-Ninib* and *Sillai*. From the two passages 70 : 13f. (*Shum-iddina*, s. of *Ina-sillu-Ninib*) and 58 : 2f. (*Shum-iddina*, s. of *Sil-lu-Ninib*) it results that *Sillu-Ninib* is an abbreviation of *Ina-sillu-Ninib*.² In view of the writing *Sil-lu-Ninib* I have transliterated names composed with

¹The first three words of Nos. 71 and 66^a are identical (אַרְכָּת שְׁמָר, "Urkunde über eine Landes Sea"). אַרְכָּת, apparently so called in distinction from a royal *Sea*, can only refer to the XXVI (No. 71) resp. XXV (No. 66^a) *GUR* mentioned in the two cuneiform inscriptions. From these two passages it would seem to follow that at the time of Artaxerxes II there was a *sea* in use which was equal to 25 or 26 Babylonian *GUR*—a result differing from what we know from other sources. Prof. Nöldeke kindly promised an article on the two Ar. dockets for *Z. A.*

²Names which have *ina* as the first element, drop this preposition frequently. Cf. *e. g.* *E-sag-ila-be-lit* (Strassmaier, *Cyrus* 337 : 5, 7, 14, 15, 18) and *Ina-E-sag-gîl-be-lit* (Strassmaier, *Cambyses* 215 : 6), *Esagil-zêru* and *Ina-Esagil-zêru*, *Eulmash-shurqi-iddina* and *Ina-Eulmash-shurqi-iddina*. For the passages of the latter two examples cf. *I H.*, part 1, p. 43, note 2.

^{isn} MI by *sillu*, instead of *sil* generally used by Assyriologists. Cf. also Delitzsch's remark on the transliteration of *ardi* instead of *arad* in proper names (*B. A.*, III, p. 387). That *Sillu-Ninib* may be still further abbreviated to *Sillai*,¹ follows from a comparison of two other passages. Two witnesses, *Ea-bullit-su* and *Bēl-ushallim* are called sons of *Sillai* in 83 : 20f. The same two persons appear as sons of *Ina-sillu-Esagila* in 80 : R. E. and Lo. E.

5. In connection with these names I offer a few remarks about ^m^d*BE-epesh(-esh)-AN* and ^m*Epesh-AN* or ^m*Epesh(-esh)-AN*, which accidentally are not mentioned in our own inscriptions. So far as I can see, all Assyriologists who translatable these names wrote "*Bēl-epesh-ilu*" and "*Epesh-ilu*," which can only be translated "Bēl is the maker of a god," resp. "Maker of a god," or if we assume that the plural sign is omitted after "*ilu*" (as is sometimes the case, cf. *Ashur-étil-ili* for *ilu^p*), "Bēl is the maker of the gods," resp. "Maker of the gods."² Very strong reasons speak, however, against such a transliteration. (a) The ideogr. of the deity, ^d*BE*, as we saw above, does not mean *Bēl*, but *Ea*. In addition cf. ^d*E-a-epesh(esh)-AN* (Strassmaier, *Darius* 266 : 15). (b) *Epêshu*, "to do, to make," as a rule, is not used in the sense of *banū*, "to create, to beget."³ (c) If *ilu* stood for *ilu^p* or *AN-AN* (= *ilâni*), we should expect to find either of these two writings at least once in the hundreds of passages where our name occurs. We have, therefore, to look for another transliteration, *Ea-epesh(-esh)-an*⁴ = *Ea-epeshân* (cf. *e-pi-sha-nu*, Strassmaier, *Nabonidus* 737 : 12, or *e-pesh-a-ni*, ib. 424 : 7, or *e-pesh-sha-nu*, ib. 456 : 5 and often, or *e-pesh-nu*⁵ (*Cambyses* 61 : 4; 66 : 7; 121 : 6 and often) = "Ea is the artisan" (or something similar), referring to the fact that Ea, who is *bēl niméqi* or *ba-an*

¹The ending *āi* occurs also in the *διποζορπιστικά* of Persian names, cf. Nöldeke, *Persische Studien*, p. 29 (also Horn in *Sassanidische Siegelsteine*, p. 36, 37c.).

²"*Epesh-ilu*" was translated even by "Ilu is creating" and used as a strong argument in support of the existence of a god *Ilu* in the Babylonian pantheon. We would better cover this interpretation with the "Mantel der Liebe."

³In names like *Shamash-épush(-ush)*, Strassmaier, *Nabonidus* 344 : 18 etc., *epêshu* does not necessarily mean "to create," but may have the more general meaning "Shamash did (it)."

⁴I call attention to a passage in *Ashurbânopal* (V R. 5: 120), where *an*, also generally misread as *ilu*, has been explained as a mistake of the scribe (cf. Delitzsch, *A. L.*³ and *A. H.*, p. 547b.). The passage must be translatable *ú-shap-shi ib-an ka-bit-ti bēl bēlē*. It is one of the few examples in Assyrian, where the old energetic ending *an*, so common in Arabic, is preserved in a verbal form not followed by a pronominal suffix. Cf. V R. 1 : 59 (Variant) *illikan* and the very common *ib-bak-kan*, *i-bu-uk-kan*, *it-tab-kan*, etc., in the contract literature—cases which must be regarded as doubtful in view of the double value (*kan* and *kam*) of the sign *KAN*. Cf. also Hommel, *Sumerische Lesestücke*, p. 112; *Südarabische Chrestomathie*, p. 23.

⁵According to Demuth (in *B. A.*, III, p. 438, Note 2) and Ziemer (ib., p. 480, Note 4) *sha* was erroneously omitted by the scribe. The frequent occurrence of the writing *epesh-nu* in texts written by different scribes speaks decidedly against this explanation. We have here rather the same syncope of an accented vowel that we find in *umnu* as over against *ummânu*, 35 : 17, in *râmnu* as over against *râmânu*, etc. Cf. Delitzsch, *Assyr. Gram.*, § 37c., and Hilprecht, *Assyriaca*, p. 45. After a preceding vowel the first *e* of *epeshshânu*, as it seems, may be dropped, cf. *a-na(sh)a-pi-sha-an-ni* (Strassmaier, *Nabonidus* 186 : 5; 213 : 2; 1029 : 7) = *a-na(sh)a-e-pi-sha-an-ni*. Tallquist (*l. c.*) and Delitzsch (*Assyr. Handwörterbuch*, p. 548b.) separate *pishanni* from *epishanni*, leaving the former untranslated.

ka-la (I H. No. 83, Rev., li. 16) or *ba-an kul-la-ti* (IV R., 56 : 59b) is also the *ummánu* or *'Ωávνης* (= *Uvvannu-Ummánu*)¹ who taught all handicrafts and arts to mankind. In view of its origin (*epesh-án*) and of the writing *e-pesh-a-ni* just mentioned the constant writing of our name as (*Ea-)epesh(-esh)-an* instead of *E-pi-sha-an* or the like (cf. Delitzsch, *Assyr. Gram.*, § 17) is not remarkable. The rejection of the final vowel in proper names is also very common. Cf. e.g. *Bél-u-sat* (Peiser, *Babyl. Vertr.* 33 : 12), *Itti-Bél-pa-shar* (cf. "Concordance"), *Ni-qud*(ib.) and the very frequent *Ri-mut*, etc. Whether in every case *Epeshán* is an abbreviation of the longer name *Ea-epeshán*, as in the passage quoted by Demuth (in *B. A.*, III, p. 415) is doubtful. It seems just as reasonable to regard *"Epishán* as an originally professional name which became later a proper name, in the same way as *Ashlaku*, *Ikkaru*, *Paharu* and others. That our interpretation is correct is proven by the fact that in genealogical statements (*X. apil-shu sha Y. apil "Epesh(-esh)-an*) this name appears as a rule in the third place, where professional designations are very common, and that at least in two passages we find the original determinative *amētu* (instead of *"*) preserved; cf. Strassmaier, *Darius* 257 : 5 (*Ubár*, s. of *Ardi-Bél*, s. of *amētu epesh(-esh)-an* and 15 (*Bél-muballit*, s. of *Marduk-erba*, s. of *amētu epesh(-esh)-an*).

From early days Babylonia was a country of many tongues, but at no other period of its varied history are we so impressed with the large foreign element living in the rich alluvial plain between the Euphrates and Tigris as during the centuries following the fall of Babylon, 538 B.C. Nebuchadrezzar's conquests in the West, accompanied by the removal of thousands of captives to his own land, the overthrow of the Babylonian empire by Cyrus' victorious armies and the gradual settling of Persian officers and merchants in the new province, the constant invasions of nomadic tribes roaming alongside the fertile banks of the two rivers and the rapid spread of the Aramean language over a large portion of Western Asia² affected the whole character and composition of the dense population very decidedly, changing the language, customs and life in this small country to a larger extent than the Arabian and Cassite occupations of the second millennium. The population of Babylonia at the time of Artaxerxes I. appears about as thoroughly mixed as that of the States of New York and Pennsylvania at our own time. And as the emigrants from Europe brought the local and personal names of their native lands to the different settlements in the New World, so Persians and Medians, Arameans and Sabeans, Judeans and Edomites, etc., transplanted those of their former abodes (cf. Ashkelon 86 : 8, Heshbon 86^a : 6) to ancient Babylonia.

¹ So far as I remember this correct interpretation of the name *'Ωávνης* goes back to Jensen. The exact place where he speaks about it I cannot at present recall.

² Cf. especially Eduard Meyer, *Die Entstehung des Judenthums*, pp. 8 ff.

The old Babylonian names begin to decrease and foreign names taking their place become very common. These new names are of inestimable value in more than one respect. Especially numerous are Persian and Aramean personal proper names. Cf. *Ahratush*, *Arabak*, *Arsham*, *Artâ*, *Artabarri*, *Artahshar*, *Artarêmu*, *Aspa'dasta'*, *Atru-manu'*, *Attamarga*, *Attarapâta*, *Bagâ*, *Baga'dâta*, *Baga'maha'*, *Baga'mîri*, *Bagapânu*, *Mânushtânu*, *Mitradâtu*, *Mitra'in*, *Pâpaku*, *Rushundâtu*, *Rushunpâti*, *Shatabarzana*, *Tirakâma*, *Tiridâta*, *Tiriiâma*, *Ushtabuzana'*, etc., on the one hand and *Abda'*, *Addu-na-tan-na*, *Addu-rammu*, *Appussâ*, *Aqabi-ilî*, *Atê-iana'*, *Attar-nûri'*, *Barîk-Bél*, *Barîki*, *Barîk-ilî*, *Barîk-Shamshî*, *Iâdahu-Nabu*, *Iâdîh-ilî*, *Ilî-idri'*, *Ilî-qatari*, *Nabû-dala'*, *Nabûhaqabi*, *Nabû-qatari*, *Nabû-zabad*, *Nadiru*, *Qus-dana'*, *Qusu-iâhabî*,¹ *Rahîm-ilî*, *Shamshî-barakku*, *Zabîdâ*, etc., on the other hand. Unusually large is the number of Jewish names known from the Old Testament, especially from the books of Ezra and Nehemiah, which we meet frequently in our own cuneiform inscriptions. Others are unknown in the O. T. *Ad-danu* (אָדָן) and *Adon* (אֲדוֹן), *Addu-rammu* (אַדְרָם),² *Ahîâma* (אַחִיָּה), *Ainâ*³ (עֵין) and *Ainâ* (אֲדָנָן), *Aqâbu* (אֲקָבָע), *Bisâ* (בִּצְׁיָה), *Gadalîâma* (גָּדָלִיָּה), *Gira'* (גִּירָּא'), *Haggâ* (הַגָּגָה), *Hadanna* (הַדָּנָה), *Hamada'* (חַמְדָה), *Hanana* (חַנָּנָה), *Hananiâma* (חַנְנִיאָה), *Hanûn* (חַנּוּן), *Jâhûlakim* (יְהֻלָּקִים), *Jâdîhu-ilî* & *Jâdîh-ilî* (יְהֻדִּים), *Jâhûlunu* (יְהֻלָּנוּ), *Jadîhiâma* (יְהֻדִּיָּה), *Igdaliâma* (יְגַדְּלִיָּה), *Ilî-idri'* (יְהֻדִּיָּה), *Ilî-zabadu* (אַלְזָבָד), *Al'ûr* (אַלְעָר), *Minahhîmmu* (מְנַחְמִים), *Miniamîni* & *Miniamé* (מְנַיְּמִין), *Nabundu* (= *Nabuntu* = *Nabuttu* = *Nabûtu* = *Nabûtu*) (נְבָנָה), *Niqûd(u)* (נִקּוֹדָה), *Nuhâ* (נוּחָה), *Natan-ilî* (נְתָנָה), *Natâbiâ* (נְתָבִיָּה), *Padâma* (פָּדָמָה), *Panî-ilî* (פָּנִיָּה), *Shabbatai* (שַׁבְּתָאי), *Shama-hânu* (שָׁמָהָנוּ), *Shamshânu* (שָׁמְשָׁנוּ), *Shilimmu* (שְׁלִימָה), *Zabdiia* (זָבְדִּיָּה), *Zabîna'* (זָבִינָה), *Zabûdu* (זָבּוּדָה), *Zimmâ* (זִמָּה), etc.

There is no doubt that a considerable number of the Jewish exiles carried away by Nebuchadrezzar were settled in Nippur and its neighborhood, where many of their descendants continued to live as long as this city existed, to judge from the many inscribed Hebrew vases excavated in the upper strata of its ruins. The Talmudic tradition, which identifies Nippur with Calneh (Gen. 10 : 10), gains new force in the light of these

¹The Hebrew בָּרוּקּוֹם (Ezra 2:53, Neh. 7:55), which is identical with ברקם (Euting 861) and the Assyrian Barqusu (cf. Delitzsch, *Prologomena*, p. 242), also contains the god קִים, for whom cf. Baethgen, *Beiträge zur Semitischen Religionsgeschichte*, p. 11. The first element is possibly not the Aramean word for "son" (Gray, *l. c.*, p. 68, note 2), but the god Bir (cf. *Bir-Dadda*, *bilid*). Parallel names are ברנבו (Vogué, *l. c.*, 73) (*Transactions of S. B. A.*, Vol. VI, p. 438). Hommel, abandoning Müller's erroneous explanation of Euting 861 as Bilqis (defended in his *Aufsätze und Abhandlungen*, p. 35) recently arrived at similar results.

² Point אֲדָרָם (ה).

³ Final *n* is frequently dissolved in a *spiritus lenis*, cf. *Shahyrin(i)* and *Shahri'*, *Miniamin(i)* and *Miniamê*, *Zabin(i)* and *Zabi*, *Hamada'*, etc.

The *aj* of proper names in (Bi.-)Ar. frequently corresponds to *â* in Assyrian, cf. *Bisâ*, *Haggâ*, *Eribâ*.

names, strengthened by the argument that Nippur, which played a most prominent part in the early history of Babylonia, could not well have been omitted by the writer of Gen. 10 : 10. It is also important to learn from No. 84 of our inscriptions that "the river Kebar, in the land of the Chaldeans," by which Ezekiel, while among the captives of his people at Tel-abib, saw his famous visions of the cherubims (cf. Ez. 1 : 1, 3 ; 3 : 15 ; 10 : 15), and for which we hitherto searched in vain in the cuneiform literature, is doubtless identical with the *náru Kabari*, a large navigable canal not far from Nippur. Cf. also No. 4 : 9.

It is natural to suppose that men of so many different nationalities living together in a comparatively small country should finally amalgamate and become one new people, to whose language and literature, customs and religion each nation represented contributed its own larger or smaller share. This process of gradual amalgamation is clearly visible in the language (cf. e.g., the Persian words *amélu dátabári*,¹ *amélu us(z)tarbári*² (cf. also *uz-barra*, 28 : 1, and *uz-ba-ri*, 73 : 1), *amélu pitipabaga*³) and proper names of our inscriptions. That captives and slaves without regard to their former position and nationality, as a rule, received a new name from their Babylonian masters, is illustrated by the large number of slaves with pure Babylonian names in the Neo-Babylonian contracts (cf. *B. A.*, III, p. 452). Cf. also Daniel 1 : 7. But also Persians, Arameans and other immigrants from foreign countries who had settled in Babylonia adapted themselves more and more to their new surroundings, frequently giving their children Babylonian names. Cf. *Nidintum-Bél*, son of *Bagána'*; *Bél-ittannu*, son of *Ushtabuzana'*; *Iqísha-aplu*, son of *Karsakka'*; *Marduka*, son of *Arabak*; *Bél-bullitsu*, son of *A(?)da'mamiasta*; *Bél-éfir* and *Shum-iddina*, sons of *Shara'a-ilí*, etc. On the other hand we find Persian, Hebrew and Aramean names borne by children of persons with ordinary Babylonian names. This fact is doubtless due to the frequent marriages between Babylonian men and foreign women,⁴ also to fashion and—in the case of Persian names—to the powerful influence exercised by the ruling class in all affairs of public and private life. The following ex-

¹ Written *amélu da-a-ta-ba-ra* (82 : L. E.), *amélu da-ta-bar-ra* (84 : 11, Lo. E.), *amélu da-a-ta-ba-ri* (107 : 15), *amélu da-bar-ri* (83 : 18, R.). Identical with דָתְבָרִי (Daniel 3 : 2).

² Written *amélu us(z)-ta-ar-ba-ri* (102 : 8, O. Lo. E. & R. E., Lo. E.), *us(z)-ta-ar-bar* (=UD, not *pa*)-*ri* (102 : 16) *us(z)-tar-ba-ri* (1 : 29, 30 ; 50 : 11), *us(z)-tar-ba-ru* (28 : 4)

Several times we find *ba-ru* (cf. . . . *qi-me ba-ru gam-mar*, 5 : 1), *ba-ra* (*il-ki qi-me sha sharri ba-ra u mimma na-da-na-a-tú sha bit sharri*, 95 : 11f.), *ba-ar-ra* (XVI *ma-na kaspu il-ki gamrúti qi-me ba-ar-ra ū mim-ma na-da-na-a-tú sha bit sharri*, 82 : 1f.), *bar-ra* ([I] *ma-na kaspu hṣâb sharri qi-me sha sharri bar-ra ū mim-ma na-[da-na-a-tú] sha bit sharri il-ki gam-ru-tu*, 83 : 1f., 12f.) or *ba-a-ri* (13 : 1 ; 23 : 1 ; 44 : 2) in connection with *qime* "flour" and "all kinds of gifts for the royal palace." This word does not seem to be Semitic. Is it Persian?

³ Written *pi-ti-pa-ba-ga* (15 : 4, 8, 16, L. E.).

⁴ The opposite case happened in No. 48, where a Persian by the name of *Mitradâta* married a Babylonian wife, *Ekur-bélít*, daughter of *Bél-balâtu-ittannu*. The fruit of this marriage was a son, who received the Persian name *Baga'miri*.

amples may serve as illustrations : *Artammara* (Pe.), son of *Bél-ibni*; *Mitra'in* (Pe.), son of *Marduk-nádin-shumu*; *Shatabarzana* (Pe.), son of *Bél-ibni*; *Tiridáta* (Pe.), son of *Ninib-étil*; *Miniamíni* (He.), son of *Bél-abu-uṣur*; *Miniamé* (He.), son of *Bâniia*; *Hanún* (He.), son of *Bélshunu*; *Igdaliáma* (He.), son of *Naná-nádin*; *Aqqabi-ilí* (Ar.), son of *Ah-iddina*; *Bél-barakki* (Ar.), son of *Marduk-étil*; *Šamshí-nadari* (Ar.), son of *Bél-étil*. (In many cases former slaves who regained their liberty may have given their children names peculiar to their own people from which they were carried away.) Similar examples can be quoted from much earlier times. I remind my readers of *Rammán-shum-uṣur* and *Marduk-apal-iddina*, father and son of *Mili-Shípak*, a member of the Cassite dynasty, and of the names *Apil-Sin* and *Sin-muballit* borne by members of the so-called first dynasty of Babylon, whose Arabian origin was recently demonstrated by Sayce and Hommel. All these examples, which could be easily multiplied, teach us how difficult and impossible it is to determine the nationality of a person living in ancient Babylonia merely from his name.

The two proper names אַנְדָּרְבֵּלִת (71) and מַנוּבָּרֶךְ (66^a), which do not occur in the corresponding cuneiform inscriptions, have been excluded from the "Concordance of Proper Names" because their reading is doubtful. If בְּרֵךְ (71) were certain, we should expect the name of a deity in the first half, but a deity מַנוּ is unknown to me. Besides, the two letters נ do not appear to be quite certain. The last three consonants in the second name represent the Babylonian goddess *Bélit*. The first part is perhaps *indi-imdi* ("support is Bélit"). The Aramaic transliteration of a Babylonian י (scarcely distinguished from נ in the pronunciation) by נ would not offer particular difficulties.

Contrary to the custom prevailing in the large number of Neo-Babylonian contracts, we find the phrase X. *apil(már)-shu sha* Y. *apil(már)* Z. only exceptionally in our own texts. In 48 : 35 we meet with the expression N. *aplu sha* A. *aplu sha* Nu. and in 73 : 3f. with N. *aplu sha* B. *már I.* As a rule only the father's name is added, the phrase in use being *aplu sha* (*passim*) or *máru sha* (6 : 1, 2, 10 ff.; 9 : 2; 10 : 2 and often) or *apil*¹ (*már*) (13 : 2, 5, 7 ff.; 62 : 13 f. and often) or rarely *apil-shu sha* (16 : 13 ff.; 22 : 1 f.; 31). Sometimes two of them are found in the same inscription, cf. 12 : 9; 14 : 9 (*aplu sha*) with 12 : 3, 8, 13, 16; 14 : 12, 16 (*máru sha*) or 27 : 9 ff. (*aplu sha*) with 27 : 11 f. (*apil-shu sha*). In 100 : 2, 3 (*Bél-ittannu*) and 8 : 19 (*Ninib-nádin*) father and son bear the same name.²

¹ *Apil-shu* in 13 : 11 is a mistake of the scribe for *apil-shu sha* or *aplu sha*.

TRANSLATIONS OF SELECTED TEXTS.

A complete transliteration and translation of the texts here published will be found in Series C. The most of these documents present but little difficulty to the translator. The few difficulties occurring in them are, for the greater part, confined to a number of new words or to certain titles of officers and technical terms more or less known from other inscriptions, and which have not yet found a satisfactory explanation. At the especial request of some gentlemen who have been instrumental in sending out this expedition, I add the transliteration, translation and a brief analysis of a few representative texts, in order to illustrate the general character of the hundred and twenty documents here published.

Translation:

Bēl-ah-iddina and Bēlshunu, sons of Bēl , and Hātin, s. of Bazūzu, spoke unto Bēl-nádin-shumu, son of Murashū, thus: As concerns the gold ring set with an emerald, we guarantee that for twenty years the emerald will not fall out of the gold ring. If the emerald should fall out of the gold ring before the end of twenty years, Bēl-ah-iddina, Bēlshunu (and) Hātin shall pay unto Bēl-nádin-shumu an indemnity of ten mana of silver.

For the names of the seven witnesses and of the scribe cf. the "Concordance of Proper Names."

Lines 15, f.: "Thumb-nail mark of Bēl-ah-iddina, Bēlshunu and Hātin instead of (supplement ku-um) their seal."

Annotations: No. 1, L. 1. For the transliteration of the various ideograms for Bēl, cf. p. 23. L. 4. For tamlù, "setting" ("Besatz"), cf. I R. 35, No. 1, 20; more frequent is tamlītu (cf. Delitzsch, A. H., p. 411). That unqu, "ring," is fem., is shown by the suffix sha (in sha tamlù-sha).—Bar-ra-aq-tum, ba-ar-ra-aq-tum (l. 5), ba-ar-raq-tum (l. 6), "emerald," known only from this passage, cf. Translation:

Bél-ah-iddina, son of *Bél-ná'd id*, of his own free will spoke to *Bél-nádin-shumu*, son of *Murashú*, thus: Deliver unto me *Nidintum-Bél*, son of my brother *Eshé-é̄tir*, who is held in prison. I shall become bail for him that he does not go from Nippur to any other place. Whereupon *Bél-nádin-shumu*, son of *Murashú*, granted his request (literally “listened to him”) and delivered unto him *Nidintum-Bél*, son of his brother *Eshé-é̄tir*, who was held in prison. If *Nidintum-Bél*, son of *Eshé-é̄tir*, should go from Nippur to any other place without legal process (*i. e.*, without having obtained legal permission), *Bél-ah-iddina* shall pay to *Bél-nádin-shumu* ten mana of silver.

The phrase *dînu u ragâmu*, so far as I can see, confined to the language of the time of the Persian kings, means literally “entering complaint and judgment,” or rather “judgment and entering complaint” (the more important word of the phrase being placed first), describing the “legal process” (“*Gerichtsverfahren*”) according to its two principal features. *Udarna' (=Hydarnes), son of Rahím-ili, of Nippur, spoke to Bél-nádin-shumu, son of Murashù, thus: Thy bondslaves, thy messenger and thy servants, in collusion with Zabdiia, my brother, and Bél-ittannu, his son, have entered my house and carried off my property and my household goods. Whereupon Bél-nádin-shumu examined his bondslaves, his messenger, his servants, Zabdiia and Bél-ittannu, took that property away from them and returned it to Udarna'. That property Udarna' has received from Bél-nádin-shumu, his bondslaves and his messenger and his servants. There shall be no legal proceedings of Udarna' and his children on account of that property against Bél-nádin-shumu, his bondslaves, his messenger and his servants *in perpetuo*; Udarna' and his children shall not bring suit again on account of that property against Bél-nádin-shumu, his bondslaves and his messenger and his servants *in perpetuo*.*

nadânu mabâru (cf. Turkish *alysh werish*, "Buying and selling," and the similar phrases in Arabic and Persian), "Selling and buying," *i. e.*, "business," "*Handel, Geschäft*" (where also the more important word stands first in Assyrian). Cf. for our expression, *dínu u ragâmu*, No. 69 : 9 (7 : 19) and Peiser, *Babyl. Verträge*, CXIII, §0 (Darius). In the latter two passages this phrase is used for the more common single word *rugummû*.

Sixty *gur* of dates, due from *Itti-Bēl-abnu*, slave of *Artahshar*, to *Bēl-nādin-shumu*, son of *Murashū*. In the month of Kislev of the twenty-second year of King Artaxerxes he shall deliver (give) the dates, that is to say sixty *gur*, in Susa, according to the measure of *I pi I qa* (=37 *qa*). If at that time he shall not have delivered the dates, *i.e.*, sixty *gur*, he shall give 120 *gur* of dates at the canal Kabaru in the month of Shebat of the 22d year.

Outside of the inscriptions of Artaxerxes I, where *TUR-E* occurs frequently (mostly preceded by the determinat. *amētu*, cf. 14: 6, 13; 15: 3, 11; 45: 30; 50: 7, [13]; 59: 7, 8, 15; 68: 2; 83: 9, 15; 84: 4, but also without it, cf. 1: 6, 20, 29 f.), I have not met with this expression except in a proper name (Strassmaier, *Cyrus* 146: 10), which apparently is not to be transliterated *iuTUR-E-iddina* (“the god *TUR-E* has given,” Demuth in *B. A.*, III, p. 416, No. 24), but *Ilu-mār-bītī-iddina* (“God has given a *mār bīti*”). *amētu mār bīti*, “one born in the house,” I regard as the Assyrian equivalent for the Latin *verna*, “a bondslave,” in distinction from slaves captured in war, purchased or acquired in another way. **L. 3.** *m. d.Bēl-it-tan-nu* for *it-tan-nu* instead of *id-dan-nu*, cf. The more common phrase is *rugummū ul i-shi*.

No. 4, L. 7. *mā (A-AN)* or *'a*, generally translated “im Betrage von,” corresponds in its usage rather to “namely” (*i.e.*) or to our parenthesis cf. 29: 17f.; 35: 18; 36: 9 f.; 66: 4 f.). **L. 8.** For the river *Ka-ba-ru*, if here a river, cf. Introduction, p. 28.

Annotations: **No. 6, L. 1.** *libittu^{coll.}*, not *libnáti*. Cf. the instructive passage Strassmaier, *Nabon.* 256, li. 1 (*II M libittu^{coll.}*) with li. 6 (*II M li-bit-tum*). As stated above, p. 20, note 1, *ZUN* is principally a mere determinative after nouns in singular with a collective meaning. It is also frequently placed after substantives like *alpu*, "ox" (67: 10), *libittu*, "brick," which in themselves are no nouns with a collective meaning, but often occur in a larger number (herd, school, etc.). Substantives commonly counted, such as *mana*, *shiqlu*, *alpu* (49: 2), *libittu*, etc., stand in singular after numbers, as in Hebrew, except they are to be taken individually (IV *alpu^{pl}*=IV *alpè*, 35: 8). **L. 6.** *ina ki-si i-man-nu-u' i-na-an-din-u'*, "they shall count them with the *kisu*" or "at the *kisu*"? As to the writing of *ki-si* another partly effaced passage is of importance (Strassmaier, *Cyrus* 255: 10 f., left untranslated by Demuth in *B. A.*, III, p. 432), which is to be restored as follows: *ina[ki]-is-su i-man-ni-[ma] a-na* ^m*Ardi- dBél [i-nam-din]*. The precise meaning of the word *kisu* must remain undetermined for the present, it can, however, scarcely be separated from another word used in connection with bricks, Strassmaier, *Nabonidus* 264: 1 f.: IV *shiqlu kaspu a-na ka-si-e sha libittu^{coll.}* In view of such expressions as *ina ḥasāri inamdin*, "he shall deliver (the dates) at the storehouse," I am inclined to see in *kisu* the place where bricks are delivered, counted and stored, *i.e.*, "the brick shed," deriving it from *kasù*, "to cover." All sun-dried bricks had to be protected from destruction by rain and apparently were stored under a shed in the same way as they are stored with us before they are baked.

Annotations: No. 7, L. 5. *Haṣāru* has been translated differently, “pflücken(?)” by Peiser, “viell. der Ort der Palmenpflanzung, wo die frischgepflückten Datteln gesammelt werden” by Delitzsch. The latter explanation is nearly correct. From 19:7 we learn, however, that the *haṣāru* is not confined to the “Palmenpflanzung” (Delitzsch), but that it may be situated in a gate (*ina haṣāri sha ina bâbi Hanbara*). In all probability, therefore, it denotes the storehouse of the dates in general. **L. 6.** *Egilshunu zaqpu*, *i.e.*, *eqilshunu gishim-marê zaqpu* (cf. Strassmaier, *Nabonidus*, 116:2; 178:1; 964:1 f.). *Bit amâluBAN* (81:2, cf. also 13:2, and *bîl BAN*, 10:4; 36:4), *bit BAN* (10:2; 36:8), *bît isuBAN* (19:8; 31:8; 37:7 and often) and, most frequently of all, *isuBAN* (8:2 ff.; 12:2 ff.; 74:2 ff., etc.), expressions wanting in the earlier language, occasionally found in the contracts of the sixth century, and very common at the time of Artaxerxes I. and Darius II., seem to have been introduced into Babylonia with the Persian conquest. They are synonymous terms, in all probability applying to a piece of land subject to a certain royal tax and military requisition generalized under the technical term of (*bit*) *gashtu* “a property (subject to the requisition) of the bow.” For *bit isuqashtu* as a synon. of *bit eshrû* cf. 30:3 with 45:9f. In what this royal tax consisted we learn from texts like 5:1; 13:1; 44:1 f.; 82:1 f.; 83:1 f.; 95:11 f. (cf. p. 28, where these passages were transliterated, except 44:1 f., which reads: IV. *ma-na kaspu il-ki gam-rû-tu* [*qime*] *ba-a-ri u mim-ma ni-din-tum sha bit sharri*). According to these passages it consisted of men (soldiers), flour, *bâri* and different other gifts, varying according to the size and value of the taxed property. As in the case of lands held in fief, perhaps originally the term (*bit*)*gashtu* applied to certain property allotted by the crown (Persian kings) to certain persons under the condition of furnishing a fixed number of bowmen (*gâlê gashti*) and of rendering other military service. Cf. the frequent expression *hbîl qashti* (8:2, 11; 10:4; 12:4; 38:4; 60:10, 18, etc.). **L. 7.** *mash-ka-nu*, “pledge, security,” plural *mashkanâti* (cf. *mash-ka-nupl.-ti* (25:9), *mash-ka-na-ti* (60:6), *mash-ka-na-a-tú* (82:11)); the length of the second vowel, *mashkânu*, inferred from the Aram. **אַשְׁׁנָה**, is proved by the writing *mash-kan-nu* (19:10). **L. 10.** ^h*Râshú-su* (9:10; 22:11; 95:10) = *ra-shu-us-su* (100:9) = *râshût-su*, alongside of *ri-shú-ut-su* (19:12 and Strassmaier, *Nabonidus* 17:16, cf. II R. 27:43, e. f.).

Baga'miri, son of Mitradátu, spoke of his own free will to Bél-nádin-shumu, son of Murashú, thus: My orchard and uncultivated land and the orchard and uncultivated land of Rushundátu, my deceased uncle (literally "brother of my father"), situated on the bank of the canal Sin and (on the bank) of the canal Shilihtu, together with the dwelling houses in the town of Galia, on the North adjoining the property of Nabú-ahé-iddina, son of Ninib-nádin, and (adjoining) the property of Banani-érisch of Nippur, on the South adjoining the property of Minú-Bél-dána, son of Balátu, on the East the bank of the canal Sin, on the West the bank of the canal Shilihtu and (adjoining) the field of Rushunpáti, secretary (?) of Artarému—all I will give to thee for sixty years for rent

and for planting it with trees, hold thou the orchard for a rent of twenty *gur* of dates per annum and the uncultivated land for planting it with trees. Whereupon *Bél-nádin-shumu*, son of *Murashú*, accepted his offer (literally "hearkened unto him"), and for sixty years he took over (literally "held") the orchard and the uncultivated land, his (*i. e.*, *Baga'míri's*) portion and the portion of his deceased uncle *Rushundátu*, the orchard part for a rent of twenty *gur* of dates per annum, and the uncultivated part for planting it with trees. Each year in the month of *Tishri*, *Bél-nádin-shumu* shall pay the twenty *gur* of dates to *Baga'míri*, as rent of that property.

The entire rent of his property for sixty years *Baga'míri*, son of *Mitradátu*, has received from *Bél-nádin-shumu*, son of *Murashú*, he has been paid. If before the end of the sixty years *Baga'míri* should take away that property from *Bél-nádin-shumu*, *Baga'míri* shall pay one talent of silver to *Bél-nádin-shumu* as compensation for his work expended thereon, and for the trees which he has planted thereon. In case any claim should arise concerning that property, *Baga'míri* shall settle the claim brought against that property (redeem it) and pay for *Bél-nádin-shumu*.

From the month of *Nisan* of the 37th year of King Artaxerxes that property is held for sixty years for rent and for planting it with trees by *Bél-nádin-shumu*, son of *Murashú*.

L. 34: The (print of the) thumb-nail of *Baga'míri*, son of *Mitradátu*, was placed [upon the tablet] instead of his seal.

L. 37: In the presence of *Ekur-bélít*, daughter of *Bél-balátu-ittannu*, mother of *Baga'míri*, the writing has been written.

Names of thirty witnesses (lines 22–33) and the scribe (l. 35). Eleven of these witnesses left their seal impressions, accompanied by their names, on the four edges of the tablet.

Annotations: No. 8, L. 2. The orig. meaning of the phrase (*eqlu* or *shezérū*) *pì shulpu*, plur. *shezérupl. pì shulpu* (86^a:2 f., 16), is not quite clear (cf. also Peiser, *Keilschriftliche Actenstücke*, 101), although it often occurs in our texts, either alone (*e. g.*, 3:5; 40:3; 86^a:2 ff.; 88:2; 102:1 ff.) or more frequently in connection with *eqlu* or *shezérū zaqpu* (*e. g.*, 9:6; 10:1; 28:1; 31:8; 32:2; 72:1). That it is to be transliterated *pì shulpu* (Peiser) not *shab-pu* (Ziemer in *B. A.*, III, p. 456, No. 8) is settled by Strassmaier, *Nabonidus* 4:12, *pi-i shú-ul-pu*. As to its general meaning there can be no doubt that it denotes a piece of land which at the time of the transaction is not under cultivation ("unbebaut, brach liegend"). This may be inferred from the manner in which it is used in connection with *shezérū zaqpu* (and *ziqpu*, above l. 8), from which it is carefully distinguished, and from different references made to (*shezérū*) *pì shulpu* in a number of texts. In our text the *shezérū pì shulpu* is given to a man *ana zaqipitu* (lines 7, 9, 12; cf. also *zaqipânu*, Strassmaier, *Nabuchodonosor* 115:12), *i. e.*, "to be planted with trees" (cf. above, p. 36, annot., L. 6). In 10:4 ff. we read *shezérū zaqpu ana hamél-urqûtu pì shulpu ana irrishâtu . . . iddinù*, "they gave the orchard to be taken care of" ("zu gärtnerischer Pflege," Delitzsch, *B.A.*, III, p. 386), "and the uncultivated land to be cultivated." In 101:5 (*shezérū shu'âtu ana hamél-urqûtu . . . iddin* "that piece of land he gave to be taken care of") *hamél-urqûtu* was likewise originally written with reference to *shezérū zaqpu* (l. 1) only (cf. 99:1, 4), for *pì shulpu* was added above l. 1 after the contract had been written. We have, therefore,

No. 86^a is especially instructive: Several pieces of land, designated as *shezérū pî shulpu*, are leased with seventy-two trained oxen for eighteen works of irrigation (four for each) and with several kinds of seeds to be sown upon these fields, in addition to 150 *gur* of *sheBAR* given extra for digging the necessary canals carrying the water over those fields (cf. lines 11, 19: *ana hirûtu narâte*). Cf. also Nos. 88, 89 and other texts of the present collection. **L. 3.** *mítânu* (cf. also l. 11), “deceased, dead,” instead of the common *mítu*, so far as I remember, known only from this inscription. **L. 4.** *bitâti shubat áli* “houses, dwelling places of the town,” i. e., “dwelling houses situated in the town.” The apposition (*shubat áli*), as a rule, stands in the singular, cf. Delitzsch, *Assyr. II₁=*kil*+*u*, the vowel *u* being added to avoid a monosyllabic word in the pause. In l. 12 we read the preterite II₁ (*u-kil=ukil*) of the same root **לִכּ**, for which cf. Delitzsch, *A. H.*, p. 319^b. Cf. also 30 : 11, *lik-ki-il=lukil=lu+ukil*, “I will hold.” In view of the fact that a form *likkil* would be without parallel in the Assyr. grammar (*lu* in connection with the *u* of the first person II₁, etc., never appearing as *i*, cf. Delitzsch, *Assyr. Gram.*, § 93, p. 257), I regard the first sign of this verbal form to be rather *lu*, than *lik(ur)*, reading therefore *lu-ki-il*. **L. 13-19** contain the statement that *Bél-nádin-shumu* paid to *Baga'miri* the unusually small rent for sixty years in advance, the latter guaranteeing against any loss of the former. Our document is therefore a lease and a receipt combined, differing in this regard from other documents of the same kind in the present collection, cf. Nos. 72, 88, 107, also 65, 67, 89, etc. **L. 19.** For the meaning of *marâqu*, generally found in II₁ (cf. *ú-mar-raq-qa am-ma*, 82 : 18), but also in IV₁ (*im-me-ri-ik-ku-u*, 64 : 9; cf. Strassmaier, *Nabuchodonosor* 64 : 22) cf. Peiser, *Babyl. Vertr.*, p. xlvi, § 11, end.

Every year in the month of Iyyar they shall give the barley, i. e., seventy-five *gur*, according to the standard measure of *Bél-nádin-shumu* in *Hussétu-sha-Kalbá* on the canal *Harripiqudu*. They are each and severally responsible for the repayment of the loan of barley, oxen and implements.

Names of thirteen witnesses and the scribe. Prints of the thumb-nails of *Bél-ittannu* and *Marduk*, accompanied by the seal impression of *Bél-ittanu*.

Annotations: **L. 2.** *II alpu ummānu* "two oxen, *ummānu*," (apposition), i. e., "two trained oxen," i. e., "oxen trained for irrigation," cf. 35: 8 f., 17 (IV *alpē um(-man)-nu sha IIIa narṭabu*, "four trained oxen for two works of irrigation"), 86^a: 9 f., 17 (*LXXII alpucoll. um-man-nu sha XVIII narṭabu ir-bit-tu a-di ú-nu-ti-shu-nu gamir-tim*, "seventy-two trained oxen for eighteen works of irrigation, four for each, with all their implements"), 88: 4 f., 10 (IV *alpu um-man-ni a-na ishtēnit(-it)*, one perpendicular wedge omitted by the scribe) *narṭabu a-di ú-nu-tu-shu-nu gamir-tim* (l. 11: *gamri*), "four trained oxen for one work of irrigation with all their implements"). These works of irrigation ("Bewässerungsanlagen," called *narṭabu*, cf. Delitzsch, *A. H.*, p. 618, and *ar-ṭa-bu*, cf. Strassmaier, *Cambyses* 316: 1, 6) varying in size, were worked by two (49: 2; 35: 8 f., 17), four (86^a: 9 f., 17; 88: 4 f., 10), six or eight oxen respectively. Cf. K. 2014 and Delitzsch, *Assyriol. Miscellen (Abhandl. der Kön. Sächs. Gesell. der Wissenschafts.*, 1893, pp. 193 ff.). Probably they resembled the present *nâ'urah* of Western Asia, being worked by means of wheels turned by oxen. Where there was enough current to turn the wheel, as along the banks of the upper Euphrates to-day, no oxen were needed. While in Babylonia I noticed two other simple methods of irrigation, doubtless also employed in ancient times. 1. An ox walks up and down, lifting and lowering a large skin (or several sewed together), fastened at one end to a beam and at the other to a long rope passing over a pulley and drawn by the ox. As soon as the ox approaches the canal, the rope being slackened, the skin dips into the water. By turning away from the elevated embankment, the ox draws up the other end of the skin filled with water, emptying it into a wooden box, from which it flows out in wooden troughs to the irrigation channels. 2. The other kind of irrigation is practiced by the poorest class. Two men standing close at the edge of a canal, and each holding the end of a skin with both hands dip it into the water, bring it up filled and empty it into a trough, from which again it is conducted into the irrigation channels. **L. 3.** *ana shezérū*, not "for a field," but "for seed." That *shezérū* is to be understood literally in this connection becomes evident from passages like 86^a: 10, 17, where notwithstanding the fact that several fields are leased, *sheBAR, shamashshammu*, etc., are asked *ana shezérū* (sing.), i. e., "for seed" (not "for the fields"—*ana shezérupl. shu'átu*).—*i bi-in-na-nish-shim=î binnannáshi-ma*, "O, give us!" The particle *i*, on which cf. Hilprecht, *Assyriaca*, pp. 48-53, is almost always found in connection with *bi* in our inscriptions, cf. 40: 6 (*i bi-in-nam-ma*), 65: 5, 10; 89: 3 (*i bi-in-na-am-ma*), 43: 6 (*i bi-nam-ma*), 16: 5; 86^a: 12; 109: 4 (*i bi-in-na-an-na-shim-ma*), 88: 7 (*i bi-in-na-an-shim-ma*), 45: 14 (*i bi-in-na-na-shi-ma*), etc. **L. 8.** *ina isumashílu sha ú-si-ish-tim* (52: 6, 11; 52^a: 4; 65: 6, 11; 18; 67: 5; 89: 4, 7, etc.), or *ú-shesh-tum* (29: 21; 30: 24) is an expression like *mashílu sha imitti* (Strassmaier, *Nabonidus* 162: 2; *Nabuchodonosor* 436: 10), *mashílu sha sattuk* (Strassmaier, *Cambyses* 61: 1; 62: 1), *mashílu sha tar-ṣi* (58: 7) or *mashílu tar-ṣu* (32^a: 6). Cf. on *imitti* and *sattuk* Delitzsch in *B. A.*, III, pp. 385 ff., and on *tarṣi* above, p. 20, note 3. *Uuseshtum*, dissimilated from *usheshtum*, is derived from *ashášhu*, "to fix, to establish, to found;" *mashílu sha useshtum sha B.* is "the measure fixed by *B.*" i. e., "his standard measure."

Translation :

Twenty-five *gur* of dates and one jar of the best date wine, one lamb, sixty *qa* of flour, rent for half a field and a stable for horses, lying in the town of *Bít-Balátsu*, for fields, canals, different kinds of seeds, machines of irrigation and oxen to work them. All the objects, etc., desired are specified by the person or persons who apply for them. Whereupon the owner "*ish-me-shu-nu-ti-ma náru dBél sha ina du Ku-ḥur-du, shezérū shu'átu sha ina muh-ḥi-shu, alpē 'a IV um-nu for ummaunu=ummánu through syncope, (cf. above p. 25, note 5) sha IIta isunartabu, SHAG-EN 'a a-na shezérid-dash-shu-nu-ti-ma*," *i. e.*, "accepted their offer and gave them the canal of *Bél* in the town of *Kuljurdú*, that field which lies on it, the oxen, *i. e.*, four, trained for two works of irrigation, (and) the *SHAG-EN*, *i. e.*, for sowing" (35 : 15ff.; cf. also 26 : 9f.; 29 : 16ff.). *SHAG-EN* represents here all the different kinds of seeds asked for by the applicant for *sowing*, and including cereals (preceded by the determ. *she*, "grain") and vegetables like *shumu*, "onion," etc. It is evident that in this connection *SHAG-EN* must be regarded as a general expression for seeds, corresponding to the German "Sämereien," or, as we shall presently see, more closely to the Greek *σπόρος* (Plut., *Symp.* 4, 5, 2). 2. More frequently it is found in the same class of contracts after *gur* in passages where the total number of *gur* of the different kinds of cereals and vegetables offered and to be paid as *rent* to the landlord, is quoted. The different names of cereals and vegetables instead of being repeated are designated by one word as *SHAG-EN*. Cf. *naphar IICLV gur SHAG-EN . . . nid-dan-ka* (35 : 14f.) or *i-nam-din-nu'* (35 : 22ff.), "totally 255 *gur* *SHAG-EN . . .* we will pay unto thee," or "they shall pay." Cf. also 26 : 8, 10^bff.; 29 : 15f., 21f.; 30 : 16f., 23f.; 52 : 11f.; 65 : 6f., 11f., 14ff.; 67 : 5f., 9f.; 86^a : 14ff., 21ff.; 80 : 8ff., 14ff. Here it corresponds to the Assyrian *balátu*, "produce," the German "Ertrag," and to the Greek *σπόρος* in the sense in which it is used Soph., *Phil.* 700. 3. In the passages quoted under No. 2, and particularly in No. 71 above, the meaning of "produce" is about to go over into that of "Pacht," "rent." It denotes not "produce" in general, but "a fixed portion of the produce." "Twenty-six *gur* of dates of the produce of a field," stands for "twenty-six *gur* of dates, rent of a field," *SHAG-EN* being used as a synonym of *isu**BAR* (for which cf. Peiser, *Babyl. Verträge*, pp. XXff.). There is no English word exactly corresponding to *SHAG-EN* with its different meanings, "produce," or "revenue," being perhaps nearest to it.

the thirty-ninth year of Artaxerxes, king of the countries, belonging to *Mushézib-Bél*, son of *Eribá*, and leased to *Bél-nádin-shumu*, son of *Murashú*, *Ardiia*, slave of *Eribá*, in accordance with an order bearing the seal of *Eribá*, father of *Mushézib-Bél*, and *Mushézib-Bél*, has received from *Bél-nádin-shumu*, son of *Murashú*, he has been paid. The dates, i. e., twenty-five *gur*, one jar, one lamb, and the flour, i. e., sixty *qā*, the rent for half a field, which *Ardiia*, slave of *Eribá*, has received from *Bél-nádin-shumu*, he shall leave with *Eribá* and *Mushézib-Bél* delivering the same for *Bél-nádin-shumu*.

Names of seven witnesses and the scribe. Print of the thumb-nail of *Ardiia* and impressions of the seals of three witnesses.

For the Aramaic docket cf. p. 24, note 1, and p. 29, and an article by Prof. Nöldeke in one of the next numbers of *Z. A.*

No. 88, Artax. I., year 40th (month and day broken off).

Contents: An official's receipt for one year's entire taxes on three fields, embodying the obligation to account to his superior for the payment made to him.

Annotations: No. 11, L. 2. Instead of *ishtēn immeru*, "one lamb," we read *ishten(-en) ni-qu-u*, "one sacrificial lamb," in the same connection 28^a: 2. Cf. also 45 : 16f. (24f.), II *alpu coll. sha r̄i-i-tum ū XX LU-ARADUSH r̄i-i-tum* with 86^a: 15 (23), *ishtēn(-en) alpu, XV zi-kar*, from a comparison of these two passages we learn that *zikaru* alone may be used in the sense of *LU-ARADUSH* (i. e., *immeruzikaru*) "ram." L. 4. Observe the three different ways in which the cuneiform sign for *sha* is written in this line (with two wedges, three wedges and one wedge), cf. p. 17. In Strassmaier, *Cyrus* 281 : 15f. (*sha eli isuBAR sha dShamash*) and in other passages of his editions of contracts *sha* is written with one wedge as frequently in our own inscriptions. Demuth's conjecture (B. A., III, p. 433, No. 35, note 2) is therefore out of place. L. 6f. *aki shipirtum u kunukki* (cf. 75 : 6f.), "in accordance with the message and seal," i. e., a message or order (in other words, a cuneiform tablet) which bore the seals of *Eribá* and *Mushézib-Bél*. *Shipru*, *shipirtu* and *nashpartu* are synonyms, *nashpartu* being most commonly used in the contract literature. As *nashpashtum* is used alongside of *nashpartum* (cf. 73 : 5 and Strassmaier, *Cambyses* 338 : 19) we find *shipishtum* (32 : 1) alongside of *shipirtum* (47 : 11). The peculiar writing *ina-na-ash-shi-par(pir)-tum* (Strassmaier, *Nabonidus* 55 : 8), which Tallquist apparently regarded as a proof of the correctness of his reading *na-ash-shi-ut-tum* (*Die Sprache der Contracte Nabûna'ids*, p. 108), is evidently due to a little mistake of Strassmaier, who wrote *shi* instead of the similar sign for *pi*. I read, therefore, *na-ash-(pi-)pir-tum*, cf. *na-ash-(pa-)par-tum* (Strassmaier, *Cambyses* 127 : 5). The sign *pa* (*pi*) is not written erroneously (Ziemer, in B. A., III, p. 467, notes, 1. 4), but is the phonetic complement of *par* (*pir*) placed before the polyphonic sign *UD*, *PAR*, *PIR*, *LAH*, etc., to secure its correct pronunciation. For the correct definition of the Assyrian phonetic complement cf. Hilprecht, *Assyriaca*, p. 70, note 4. Delitzsch's definition (*Assyr. Gram.*, § 23, end) will have to be abandoned, if examined in the light of the large material at our disposal. More on this subject in *Assyriaca*, Part 2. L. 10f. supplement 'a, "namely," "i. e.," after *dannu*, *immeru* and *qime*. L. 12. *ma-bi-ir* instead of *sha mah-ru*. L. 13. The phrase *itti mX ushazzaz-ma ana mY inamdin* is found in a number of our inscriptions where a slave or officer receives rent or taxes for his master. We can translate the two verbs best by one "he shall deliver to X for Y" ("abliefern für jemanden an einen andern"). Cf. 12 : 10f.; 44 : 19ff.; 50 : 9ff.; 59 : 9ff., etc.

Translation :

One *mana* of silver, a soldier for the king, flour for the king, *barra* and all kinds of gifts for the royal palace, the entire taxes until the end of the month of Adar of the fortieth year of King Artaxerxes from the *qashtu* of the slave(?) *Umumushsha* and all his household in the town of *Bît-Ha* tum, from the *qashtu* of *Ea-dânu*, from the *qashtu* of *Nabû-re'ûshunu*, son of *Shamash-erba*, *Rê'a-nu*, son of *Kalbi-Bau* and *Hashdai*, son of *Nabû-re'ûshunu*, in Larak—the silver, *i. e.*, one *mana*, *Unnatu*, overseer of the *shushanné* (a certain class of slaves) of the treasure house, servant of *Mânushtânu*, *mâr-bítí* (of the king), son of *Artarému*, has received from *Bél-nádin-shumu*, son of *Murashû*,

Annotations: **No. 12, L. 1.** On the different ways in which *bar-ra* (meaning unknown) is written, cf. p. 28, note 2. **L. 2.** *ilku* in our inscriptions seems to be used exclusively for royal taxes resting upon property designated as (*bít*) ^{isu}qashtu, in distinction from ^{isu}BAR, the rent which may be paid to any person leasing or letting a field or something else to another. For passages cf. p. 28, note 2. **L. 4.** ^hki-na-at-ti (cf. also 31: 14) and ki-na-at-ti (without det. *umêlu*, 77: 2, 6), “Gesinde” (cf. Delitzsch, *A. H.*, p. 338^b) adds the plural ending *âti* to the femin. *t* of the singular (cf. Delitzsch, *Assyr. Gram.*, §69 note), ^hki-na-ta-ti (5: 3; 22: 7) and ^hki-na-at-ta-ti (45: 6; 106: 5)=*kinatâti*. **L. 8.** The meaning of ^hshú-sha-ni-e is unknown. ^hShú-sha-nu (81: 11; 94: 3) or ^hshu-sha-an-ni (12: 5, 8), *i. e.*, ^hshushannu, plur. ^hshushanné (written ^hshú-sha-ni-e, *passim*, cf. below, or ^hshu-sha-nu plur. 81: 11; 94: 3, once ^hshú-sha-nu-e, 83: R. E., and once ^hshu-sha-an-ni-ia, 44: 17) occurs frequently in our inscriptions in the genitive plur. after ^hshaknu (*passim*) or ^hlatri (written *la-at-ri*, cf. 82: 10; 94: 3; 94^a: 2; 95: 4), “Aufseher,” cf. 7^a: 4; 8: 15; 44: 17; 75: 5. It denotes, therefore, apparently a class of persons occupying a low position in life. Frequently we find another genitive or an opposition or a coördinate substantive (connected by *u*) after ^hshushanné. Cf. ^hshaknu sha ^hshushanné sha (*h*)ki-ri-ki-e-ti (12: 5, 8), ^hsha[knu] sha ^hshushanné sha ^hma-sha-a-ka (107: 9), ^hshaknu (*latri*) sha ^hshu-shanné mârê *hîrîshê* (81: 11; 82: 10 ff.), ^hlatri sha ^hshushanné mârê *hi-sa-a-nu* (94: 3 f.), ^hshaknu sha ^hshushanné u ^hma(ba?)-ak(*q?*)-tu-tu (23: 14, R., cf. also 1. 9 and 5: 4, R. for the latter word). From all these passages in connection with our own above we learn that the ^hshushanné were employed for various kinds of menial service; were therefore, in all probability a certain class of slaves or persons who had formerly been slaves. This assertion is corroborated by the fact that in Strassmaier, *Darius* 212: 9 (a document referring to the sale of a slave) we meet with the abstract noun ^hsushannûtu in connection with *b(p)ut hsihû hpaqirrânu arad-sharrûtu u mât-bânâtu*. The abstract noun ^hshushannûtu is also found in the interesting text Const. Ni. 560, which is dated in the third year of Darius II. It refers to the sale of four slaves closing as follows (lines 12-19): 12. *b(p)u-ut la hsi-hi-i la hpa-ki-ra-nu*

he has been paid. *Unnatu*, the overseer, shall leave the silver, *i. e.*, one *mana*, the soldier for the king, the flour for the king, the *barra* and all kinds of gifts for the royal palace, the entire taxes until the end of the month of Adar of the fortieth year, with *Mānūshṭānu mār bīti* (of the king), son of *Artarēmu*, delivering them for *Bēl-nādin-shumu*, son of *Murashū*.

The word *hshushannu* being so far found only in contracts dated in the time of the Persian kings we would infer that it was not used in the Babylonian language before the Persian conquest.

§ The Palmyrene form of the common Semitic god is *Bēl*. But he was also worshiped under the name of *Bēl*, *Bēlōs*, cf. Waddington, *Inscriptions* 2606a). This latter cult was introduced from Babylonia. Cf. Baethgen, *l. c.*, p. 86.

† *DIR* (-ir). Cf. *Nabū-at-ri-ilāni*, II R., 64 : 53a.

‡ Cf. *Ba-ku-ú-a*, Strassmaier, *Cambyses*, 84 : 16, and such names as *Bēl-pat-ta-nu*, "B. is protector;" *Bēl-e-dipitīn* (or with the nominative ending *u* attached to the name, which is regarded as a compound substantive = *Bēl-ēdi-pitnu*), "B. protect the only (child)." That the meaning of the root נִתְּנָה, left untranslated by Delitzsch (*Assyrisches Handwörterbuch*, p. 553 b) is "to strengthen, support, protect," becomes certain from the parallelism of *nu-pa-ta-an-u* (1 pers. plur. Praes. II¹) with *nu-da-na-nu* (55 : 17). The Hebrew word נִתְּנָה denotes the threshold as "the place of protection," according to the widely prevailing idea of the sacred character of the threshold in the ancient world. The protecting power of the snake (נִתְּנָה "protector") and its close relation to the threshold are equally well known. Cf., e. g., the snake surrounding the opening of the marble vase from Sidon preserved in the Royal Museum of Berlin (cf. Pietschmann, *Geschichte der Phönizier*, p. 225); the large snake usually carved upon the boundary stones of Babylonia; the enormous snakes of bronze (*sirrushshū*) set up by Nebuchadrezzar II *ina sippē abullē*, "at the thresholds of the gates" of Babylon, etc., etc. According to Hommel's doubtless correct theory (in Trumbull's book, quoted below, p. 314), the Assyrian word *sippū*, "to pray," itself is a verb, denomin. from *sippu*, "threshold." Cf. on the whole question the work of H. Clay Trumbull, *The Threshold Covenant*.

§ Cf. Vogüé, *l. c.*, 35. The Babyl. ideogr. is perhaps to be read *Bōl*, cf. Hilprecht, *Assyriaca*, p. 78, note 2.

TABLE OF CONTENTS

AND DESCRIPTION OF OBJECTS.

ABBREVIATIONS.

C. B. M., Catalogue of the Babylonian Museum, University of Pennsylvania (prepared by the editor); **Ca.**, Cast; **cf.**, confer; **cyl.**, cylinder(s); **E.**, Edge; **f. e.**, from (the) end; **foll(ow).**, following; **fr.**, fragment, fragmentary; **frs.**, fragments; **h.**, height; **impr.**, impression(s); **inscr.**, inscription; **l. or li.**, line(s); **L.**, Left; **Lo.**, Lower; **M.I.O.**, Musée Impérial Ottoman; **No.**, Number; **O.**, Obverse; **perpend.**, perpendicular; **Pl.**, Plate(s); **R.**, Right; **R(ev).**, Reverse; **U.**, Upper.

The tablets here published are baked and of light brown to grayish color. In most cases there are black spots on one or more sides. The Obverse is nearly flat, the Reverse slightly rounded, sometimes both are convex. They were found lying on the clay floor of a room (5.5×2.75 meters wide), a little over 6 m. below the surface in the central part of the northwestern ridge of the ruins of Nippur, on the western side of the Shatt-en-Nil (cf. Vol. I, Plate XV). They are all dated in the reign of King Artaxerxes I.

Measurements are given in centimeters, length (height) \times (width) \times thickness. Whenever the tablet (or fragment) varies in size, the largest measurement is given.

This image shows a page of handwritten cursive script practice. The page is filled with rows of cursive handwriting, likely for the letter 't'. The handwriting is in black ink on white paper. There are several numbered lines on the left side, starting from 0 at the top and increasing down to 25 at the bottom. There are also some letters and numbers on the far left and right edges. A small portion of the word 'Erasu' is visible on the right edge.

L.E. 

This image shows a fragment of a cuneiform tablet, labeled 'O.' at the top left. The tablet is made of dark clay and features four columns of cuneiform script. The script is written in a single direction, from left to right, with some vertical strokes. The characters are wedge-shaped and vary in size and orientation. The background of the tablet is textured and shows signs of age and wear.

PLATES.

Owing to the Editor's absence, the following corrections and additions could not be made in the plates without considerable delay in publication :

- Pl. 1, No. 1, lines 4 and 17, add the marginal note "Mistake of the scribe for V" (referring to the sixth cuneiform sign of each line).
- Pl. 6, No. 9, li. 4, to the fourth sign from the end add the marginal note "ma mistake of the scribe for *isu* (read *isu-ma-shi-hu*)."
- Pl. 11, No. 17, the numbers 10, 15, 20, are each one line too high.
- Pl. 14, No. 23, li. 14, middle, add the marginal note "the sign *MESH* omitted by the scribe after *ni* (read *hshá-sha-an-nipl*, cf. No. 12: 5, 8)."
- Pl. 18, No. 29, read li. 30 instead of li. 50.
- Pl. 18, No. 30, li. 11, end, read *lu-ki-il* instead of *lik-ki-il*.
- Pl. 24, No. 39, li. 5, end, read *IVkan* instead of *IIIkan*.
- Pl. 29, No. 46, li. 11, place a small circle over *ki* in the cuneiform text and a comma after *di* in the marginal note.
- Pl. 43, No. 71, li. 4, end, read *m.d.Bèl(=L)-nâdin-shumu* instead of *mIlu-nâdin-shumu* (cf. Pl. VIII, No. 9, li. 4).
- Pl. 53, No. 88, li. 4, to the third sign from the end add the marginal note "one perpendicular wedge omitted by the scribe (read *ishtênit(-it)*)."
- Pl. 62, No. 104, li. 10, end, add the marginal note "*aplu sha* omitted by the scribe."
- Pl. 70, No. 66^a, li. 9, place a small circle after *ü*, adding the marginal note "ma omitted by the scribe (read *ma-hir*)."
- Pl. 71, No. 86^a, lines 14 and 21, place a small circle after 2700, adding the marginal note "gur omitted by the scribe."
