

THE WIKIPEDIA ANIMATION: HOW TO USE IT IN CLASS

The point of this is largely visual. You see a tiny entry grow bigger and bigger, get hacked, get repaired, and continue changing.

Each time you click, something happens. At each stop, we have provided notes you can use to explain what you want students to notice. Each bullet below is the notation for a stop.

(Slide numbers are on this list for digital editor's convenience. You don't need to pay them any mind.)

Here's the article created 06:18, 11 March 2011, **32 minutes after the main quake in Sendai, Japan**

- Slide 2 Article created 06:18, 11 March 2011, **32 minutes after the main quake.**
