CAMPUS CURRENTS

STATE UNIVERSITY OF NEW YORK AT STONY BROOK

The wondrous capabilities of the new digital system are explored by Donald Marx, director of communications management engineering, (left) and Dr. Paul Madomina, assistant vice president for administration.

By Alvin F. Oickle

The State of New York, on Stony Brook’s behalf, has awarded a contract for $11 million to a Long Island subsidiary of IBM to provide one of the largest and most technologically advanced telecommunications installations in the United States.

Officials representing ROLM Corporation of Jericho and the University have agreed to a contract for a major integrated voice/data telecommunications system that will be installed over the next three years to serve a campus community of nearly 25,000.

The ROLM CBX II-9000 Business Communications System will provide a single digital network including all voice, data, voice messaging and LAN (local area network) access for students, faculty and staff at Stony Brook, including the Health Sciences Center and University Hospital.

The network, including more than 10,000 lines, each capable of carrying both voice and computer signals simultaneously, will provide the campus with an all-"new century" telephone system. This means that a telephone and a personal computer in the same room, for example, can be "hooked up" over a single set of wires. In addition, the telephones will provide a variety of modern telecommunications features such as call forwarding, conference calls, etc.

Dr. Paul Madomina, assistant vice president for administration, said the entire cost will be offset over the next decade by allocations already budgeted, "after which we expect a substantial annual savings of operational funds."

Don Marx, director of Stony Brook’s Department of Communications Management Engineering, said, "The use of a digital ROLMphone, equipped with integrated data communications modules, will enable users to access multiple on-site host computers and LANs as well as remote data services via modem pooling. Proprietary ROLM software will be utilized with IBM Personal Computers to provide a database directory hook-up system for University employees."

The University’s Educational Communications Center will house central equipment for the entire system. Smaller hubs will be stationed throughout the campus with the capabilities of the ROLM system. A node is comprised of one or three equipment cabinets, each containing its own fully redundant central processing unit, memory and control electronics. Nodes can be located adjacent to each other or, as in the Stony Brook campus design, distributed to key sites. CBX II-9000 nodes can be connected via coaxial cable, microwave T-span or fiber optics and can be located up to 50 miles apart.

ROLM Corporation, a wholly owned subsidiary of the IBM Corporation, is a leading supplier of digital business communications systems with more than 18,000 systems installed worldwide. Products include the CBX II and VSC/5X PBXs, the ROLMphone family of digital telephones, advanced workstations and voice messaging systems.

Card System Starts, Parking Crunch Continues

To prevent long lines that formed as University employees and students renewed their paid parking privileges each month, Stony Brook instituted a card entry system that will enable users to renew their permits through mail. However, the campus community continued its attempts to deal with a more serious problem—an insufficient number of parking spaces.

The problem had been particularly acute for those who park at University Hospital. Several hundred University Hospital employees staged a rally Wednesday, Sept. 11 in front of the Hospital to voice their concerns.

"People were very frustrated and there were a lot of rumors," said stationary engineer Denise O’Callahan, one of those who attended the rally. "We hope this dramatizes what we consider to be a desperate problem."

Preparatory work has already begun on campus after more than three years of planning and negotiations. As part of its orientation program, Marx’s department has requested heads of more than 200 academic and administrative areas to appoint a representative from each department to help coordinate the complex activities of the changeover from an American Telecommunications Corp. telephone system, in use on the main campus since 1982, and from Stony Brook’s own centerx system in the Health Sciences Center, in place since 1977. Unlike this equipment, the ROLM system will provide high-speed data transmission capacity.

The changeover will be accomplished in three phases:

• 1985-86: for startup next summer, the main campus and South Campus.
• 1986-87: for startup in summer 1987, Health Sciences Center and University Hospital.
• 1987-88: for startup with the fall semester 1988, student residential buildings (a total of 4,000 cubicles).

This number represents more than half the 7,000 residents; about half of them each semester rent phones in their rooms.

While all existing telephone sets, conduits and cabinets will be reused, the tunnels and other facilities provided in the original campus construction will be used. Some digging will be necessary, but all efforts will be made to do so when it will least inconvenience campus activities, said Marx, who designed the system with the assistance of Carol Cooke. As telecommunications manager, she coordinated Stony Brook’s RFP (request for proposal) development.

Cari Hanes, Stony Brook’s vice president for administration, said: "This is the largest single equipment contract ever awarded in the SUNY system, in part to meet a need to develop RFP specifications and another year to negotiate and award a contract. We’ve faced every possible problem. This was one of the most difficult documents we’ve had to write, but it’s also one of the best."

"We’ve bought the future" Marx said, "and the ability to provide voice and data capabilities to the student dormitories was a key element in the contract.

Added Madomina, "Stony Brook is committed to enhancing the service provided to the student population and staff via the capabilities of the ROLM system. We’ve just bought the future."
Pope John Paul Meets SB Students

Ten Stony Brook students had an audience with Pope John Paul II in St. Peter's Square this summer and experienced Italy's cultural heritage. They were part of a group of 52 Stony Brook's fifth annual monthlong academic Summer Program in Rome.

They were accompanied by Dr. Mario B. Mignone, professor of French and Italian. Dr. Mignone is founder and director of the program. The trip was sponsored by the University's Division of International Programs.

The students attended classes daily and earned from three to six academic credits. They were required to speak Italian throughout the trip. Courses included the Italian language, culture, civilization and art, only the art courses given in English.

The exit of the Administration Building parking garage and Health Sciences Center parking garages, he said. Shortage of parking was particularly evident during the opening days of the fall semester. Francis said, because of a combination of factors. "It was payday and opening week. Also, grand round and orientation meeting and a couple of conferences had been scheduled."

Upcoming Issue: more on the parking problem.

More lanes will be added to the entrance of the Administration Building parking garage and Health Sciences Center parking garages, he said.

(continued from page 1)

Welcome New Faculty

This semester Stony Brook welcomes more than 75 new faculty. The names of these new members of the campus community are listed below:

Anthropology: Lawrence B. Martin, associate professor; Alex Weingrod, visiting professor of anthropology and sociology (fall semester only).

Art: Michi Ilnam, associate professor; Molly Mason, associate professor; Stephen Rotka, associate professor.

Computer Science: Arie Kaufman, visiting associate professor; Grace V. Leeve, lecturer; Eliezer L. Lomnitz, visiting associate professor.

Ecology and Evolution: William Ash, visiting professor; Jessica Gurvitch, associate professor; Charles Helmker, associate professor.

Economics: James Brown, associate professor; Boyan Jovanovic, visiting professor; Teresa Garcia-Mila, associate professor; James E. Rauch, associate professor.

Electrical Engineering: Hon-sun Don, associate professor.

French and Italian: Angelica Fort-Lewis, associate professor.

Liberal Arts: R. Huffer, associate librarian; Christine King, associate librarian; Virginia Raisbold, associate librarian.

Linguistics: Daniel L. Finner, associate professor.

Marine Sciences Research Center: Howard L. Chang, research associate professor.

Applied Math: Rabab Amir, associate professor; Hong-Kung Chan, associate professor; Pradeep Dubey, professor (with tenure). Leniere Frari, lecturer and director of Math Learning Center, Chi-Ming Ip, visiting associate professor; Mikhail G. Katz, associate professor; Hung-Kung Lui, associate professor; Abraham Newman, professor; Janos Pach, visiting associate professor; Santiago Ramon Smanca Perez, associate professor; Eugene Vinegrad, lecturer (changed from part time full time).

Mechanical Engineering: Meoz Mayouman, associate professor; Hong-sen Yan, associate professor (with tenure).

Music: Timothy Edy, professor; Julius Levine, professor; Judith Lockhead, associate professor; Edward MacLan, associate professor; Amy D. Ruben, lecturer; Arthur Weisbar, performing arts.

Neurobiology and Behavior: David Alan Van Wroch, lecturer.

Philosophy: Anthony E. Weston, associate professor.

Physics: Giovanni Stachel, associate professor; Michael Riesenbeck, associate professor.

Political Science: Evelyn Brodin, associate professor; Charles M. Cameron, lecturer.

Psychology: Jo Ellen H. Vespo, visiting associate professor.

Science, Math and Technology Teaching: Michael Barra, associate professor.

Social Sciences: George E. Fouman, associate professor; Joan Kuchner, lecturer; Frank M. Marlow, lecturer.

Sociology: Karen A. Cervle, associate professor; David Hale, associate professor; Ezevira Zuberbuehl, professor (with tenure).

Theatre Arts: Vivian Petan, visiting professor; Carol Rowe, associate professor.

Theoretical Physics: Peter Forrester, research associate; Andrew Jackson, research associate; James G. McCarty, research associate; Ismail Zahed, research associate.

Health Sciences Center: Allied Health Professors: Kathleen Walsh, clinical instructor.

Anesthesiology: Paul Kolburt, clinical assistant professor.

Anatomical Sciences: Anne B. Demes, visiting associate professor; Carl Potnik, research associate professor.

Biochemistry: Danny Reppinger, assistant professor.

Community and Preventive Medicine: Robert K. Poddubnik, research associate professor.

Endocrinology: Michael Berezowitz, family Medicine: Lucian Capobianco, clinical associate professor.

HSC Library: Colleen Kenetick, senior associate director.

Lab Animal Resources: Charles Middleton, clinical professor.

Medicine: Richard Barnett, instructor; Harold Burger, associate professor; Rocco Caruso, instructor; Lee Kaufman, instructor; Dwight Martin, associate professor; William Schubach, associate professor; Barbara Weaver, associate professor.

Microbiology: Paula Ensetti, research associate professor; Stanley Fields, associate professor; Michael Hayman, professor; Nicholas Muszyczka, associate professor.

Obstetrics and Gynecology: Magdalene Hull, associate professor; Owen Montgomery, associate professor.

Psychiatry and Behavioral Science: Camilla Logue, instructor; Helen Pen, research instructor; Michael Smith, associate professor and assistant director; Ren Wang, lecturer.

Physiology and Biophysics: Richard Maldonado, director.

Radiology: Tea Park, associate professor; Linda I. Okahy, clinical associate professor.

Javits: Return to Detente

Former United States Senator Jacob K. Javits advised this country and the U.S.S.R. to return to the condition of detente which applied in the early 1970's during his lecture Sept. 5 on the upcoming Reagan-Gorbachev summit.

Sen. Javits opened his remarks before more than 250 faculty and students at the Fine Arts Center Recital Hall by noting, "This is my final lecture of the 1985 series. Lord willing, I hope to return in 1986 for more." The comment was greeted with applause.

His lecture is reprinted here in its entirety. "Michail Gorbachev, General Secretary of the Communist Party, USSR, Ronald Reagan, President of the United States, are the epicopes of the leadership of their respective countries. Their summit meeting in November 1985 at Geneva may not result in definitive agreements but will most likely set the course for the remainder of this century and perhaps beyond. The results will be both long- and short-term; short-term in the history of relieving the present tensions which could spark confrontation and war both because of the armaments race and the extent of political and military confrontations, and long-term because of the future of the U.S.S.R. and the U.S. and the U.S.S.R. for the future of the uncommitted nations of the world as well as for all those people who live in indigenous poverty areas of the planet, for two thirds of the world's population. There is need for peaceful competition and coexistence between communist and socialist societies, the reduction of armaments and the peaceful negotiation of issues which can lead to confrontation.

"The first priority must be the reduction of tension and therefore of nuclear arms. The downward of the Korean airliner or aggression against Pakistan, the threat of China or an effort to communize U.S.S.R. to "return to the condition of Cold War" would lead to confrontation.

"The U.S.S.R. and the U.S. have democracy, freedom of speech and culture and it shows sharply in their different social and political systems. It produces also the U.S.S.R.'s paranoia about security and internal conspiracy and the U.S. psychology that the U.S.S.R. cannot be trusted under its present leadership, (and a non-elected government).

"There is no centralized administration and implemented by meetings at the ministerial level in the interim. The U.S. should pay great attention to trade, cultural affairs, sports and tourism as people-to-people connections. On trade we should pay far more attention to the views of our Western European allies. The U.S.S.R. should defuse the Brezhnev doctrine which purports to commit it to so-called wars of national liberation of the world should endeavor to integrate the U.S.S.R. and its satellites into the financial and trade structure of the free world.

"On arms control we must realize that we have not one but two nuclear warheads.

"Beyond all else the competition between the U.S.S.R. and the U.S. should be recognized as a 'long haul' and not a 'short battle.'"

Dick Solo

Editor's note: Richard Solo arrived at Stony Brook in 1962 as a new faculty member in the Department of Chemistry. Stony Brook itself was new, having just made the transition from a State University College located at Oyster Bay. There were 750 students enrolled at the seven-building campus. In 1974 Solo became director of new student orientation. In addition to witnessing the evolution of the Stony Brook student, he has watched the University grow into an institution that added to the original seven.

In 1974 Solo became director of new student orientation. Here recently and asked him to reflect on his experiences at Stony Brook. Here he has watched the new student orientation. In addition to developments throughout society of behaviors.

Dick Solo

in finding the ambiguities of life very difficult to cope with.

CC: What were the issues?
Solo: There was a very enriching—yet painful—preoccupation on the part of the whole campus as to what we as an institution would be saying and doing with our students as we were facing horrendous life decisions. In the midst of all this, there were developments that led to the decision to come to Stony Brook and be the person that the individual wants to be, and to sort their values—national values, personal values.

CC: What was the effect of all this on the campus as a whole?

Humphrey Bogart looks at you, kid, from a Casablanca poster on the wall. On a nearby table lies a pile of manuals offering helpful hints and suggestions. Someone with an outstretched hand and a winning smile invites you into one of four high-ceilinged cubicles.

Which is why the Writing Center changed its name.

Stony Brook's center for writing instruction used to be known as the "Writing Clinic," a name that suggested a narrow, negative view of writing—and friendly atmosphere made it sound like an unapproachable one.

"Clinic" always sounded like someone was sick," said Dr. Pat Belanoff, associate director of Stony Brook's writing program. "It implied that you had to submit to a one-shot treatment. You had to be very ill to get help."

"We changed the name to Writing Center," Dr. Belanoff explained, "because we wanted people to realize that their relationship with us can be ongoing. That relationship is based on communication. Those who visit the Writing Center (open to any member of the campus community—faculty, staff or student) can look forward to a great deal of verbal interaction. Tutors will ask to see a sample of the person's writing, and then talk to them about what they hope to achieve in a particular writing assignment and find out about their past experiences with writing." "We ask the person to explain to us what it is that they are writing about," said Dr. Belanoff. "Having someone listen helps the writer focus. The first step is to get them to know exactly what it is they want to communicate, and then we can have that sort of brainstorm discussion that makes them think a little more about it." One thing tutors don't do, she said, is copy edit. "People can't just drop something off and say, 'Here, fix it up,'" she said. "We will work on mechanics with them, but they have to do the fixing up themselves." In addition to those mechanics—spelling, grammar—the Writing Center stresses the importance of rewriting. "It comes as a revelation to some people that even the best writers rewrite," said writing specialist Dennis Clark. Last spring the Center sponsored a seminar at which members of the University community—including Obie-winning playwright Ann Barbara and Pulitzer Prize-winning poet Louis Simpson—shared their writing strategies. "They all said they rewrite," said Clark. "But some people are afraid to do that; they think they have to get it right the first time."

That reluctance can be just one of the psychological barriers to successful writing. Shoring up a writer's confidence is part of the job of Writing Center tutors. "A large number of people, even faculty who've written a lot, often don't have a lot of confidence about their writing," said Clark. "Or they might tend to think of criticism of their writing as criticism of them. You have to be sensitive to that." "Dignifying the person's ideas," said Dr. Belanoff. "It's the key. You look at a paper and start by saying, 'I know there's good in this; what is it?' If you believe that all writing has some kind of a germ of good in it—which I do—then it's not being phony to do that."

Although most of the writers who come to the Center are undergraduate students, "we're open to all members of the campus community," reminded Dr. Belanoff. Sometimes University staff members come by "to ask for help writing a resume or a letter of application, but we wish more staff people would come in," said Clark. "The ones who do see us, though, leave feeling pleased with what they learned."

One group the Center would like to see more often is faculty members who have given writing assignments to their classes. "We would love it if a faculty member would call us up and say, 'I've given the class this assignment and told the students they can come to you,'" said Belanoff. "It's hard for a professor teaching a large class to talk over a paper with every one of his or her students. We would be delighted to work out an arrangement possible with a faculty member. I think that would really be effective at providing that kind of assistance."

And sometimes such an arrangement ultimately is more beneficial for the student. Clark noted, "Too often students are writing to please the teacher, and they delve inside that person's head instead of their own. We ask them to explain to us what they want to say, not what they think they should say, and it produces better writing."

For the tutors, too, there are benefits. "Tutors can be friends," said Dr. Belanoff. "It's nice when you can relate without feeling responsible for giving the person a grade. You feel it and the students feel it."

Many of the tutors are students themselves. In addition to Clark, a full-time writing specialist, there are six undergraduate "peer" tutors and seven graduate student tutors. The Center now sponsors a training class for undergraduates who want to become tutors. "Some of them don't especially want to teach as a profession," said Clark, "but they just do it because they think they should say, and it being involved with the Center and what we do here." Last semester the Center logged almost 1,000 visits. Many of those were "repeats." "A session can be exhausting work for both writer and tutor," said Clark. "Many times people will come in once a week for several weeks. We talk, they go away and write and come back to show us a first, second or third draft. It works best if you deal with grammar at one session, and maybe a different problem at the next." Though this semester has barely begun, the Center is "open for business." and its tutors are busy. Now that the University has made curriculum changes to ensure that all undergraduates can demonstrate writing proficiency (see accompanying story by Dr. Peter Elbow, director of Stony Brook's writing program) and Dr. Belanoff anticipates an even greater number of visits to the Center. "We're here to help if people need us," said Dr. Belanoff. "Everyone—I don't care how good you are—can benefit from getting a little help with their writing."

The Writing Center is located in Room 198 of the Humanities Building. Walk-ins are accepted, but appointments are preferred. For more information or to schedule an appointment, call (245-5069).
Michele Burnette, Human Resources Manager, OD and Communication.

The Department of Human Resources is announcing its new services in the area of Organization Development and Communication. The task of our OD manager is to help you improve your areas through a planned process of change. The process is fourfold:

• Diagnosis—data is collected from individuals and groups within an area. This is done through a combination of interviews, questionnaires and observation.
• Discussion—of what these data mean and planning the steps that should be taken.
• Action—taking these steps.
• Feedback—after analyzing the channels of communications that the steps were successful—that is, winning—to do it.

Throughout our lives we receive many “Failure messages.” We are told that we are not smart enough, not fast enough, not successful enough, not pretty enough, not good enough. We desperately want to succeed—to win. Good leaders make winners out of their people. Look for ways to make them succeed rather than fail.

**Personnelized** lists employment opportunities as a service to the Stony Brook community. Faculty and professional positions are posted for 30 days. Classified positions are posted for 10 days. "Personnelized” cannot guarantee the availability of any position. Please refer to the most recent “Campus Job Opportunities” or the contact persons indicated above.

For more information, visit Human Resources, Room 390, Administration Building or call 246-8314.

For more information, visit Human Resources, Room 133, third floor, Health Sciences Center or call 444-2525.

**We Like to Think of Ourselves as Winners**

For the most part, employees want their managers to succeed. People want to be a part of a successful—that is, winning—group. When managers have trouble, they either refuse to work with those people. Those who succeed turn to others.

When questioned about what he did when he got into trouble, one very successful manager said, “I simply go to my people, explain my problem and ask for their help. It never fails.”

In a recent study, a group of males were asked to rate themselves on their ability to get along with others. One hundred percent of the people questioned put themselves in the top half of the population. And a full 25 percent said they were in the top 1 percent.

In the same study, 60 percent said they were in the top fourth of the population in athletic ability; and only 6 percent said they were below average. We like to think of ourselves as winners, even when we have to practice a little self-deception to do it.

For more information, visit Human Resources, Room 390, Administration Building or call 246-8314.
Opera Gala Raises $30,000 for 2 AIDS Projects at SB

A gala Labor Day weekend benefit in East Hampton raised more than $110,000 for the battle against AIDS, acquired immune deficiency syndrome. When accounting is complete, more than $30,000 of the total is expected to be donated to the Long Island AIDS Project, administered through Stony Brook's School of Allied Health Professions, and the Department of Infectious Diseases' Retrovirus Laboratory at Stony Brook.

The benefit, held in the East Hampton High School, was organized by the East End Gay Organization for Human Rights and the Linda Leibman Human Rights Fund. The evening featured 14 stars of the Metropolitan and New York City Operas, who donated their talents for the cause, and was attended by prominent people such as New York City Mayor Edward I. Koch.

Many of the performers had interrupted vacations and concert tours to appear in East Hampton. Soprano Kathleen Battle arrived directly from London where she had experienced an airplane bombscare earlier in the day.

Other opera stars who appeared at the concert were Roberta Peters (celebrating a record 35 years with the Met), Rosalind Elias, Brent Ellis, Jerry Hadley, Evelyn Lear, Catherine Malaffano, Aprile Millo, Erie Milis, James Morris, Paul Plishka, Susan Quittmeyer, Alan Titus and Carol Vaness.

Singer-actress-comedienne Madeline Kahn made a surprise appearance on stage and later auctioned a concert poster, designed by Paul Davis, for $1,700. The poster had been signed by all the performers.

24,000 cases by '86

Dr. Rose Walton, benefit co-chair and chairperson of the Department of Allied Health Resources in the School of Allied Health Professions, addressed the audience with some sobering statistics. She said that there are now more than 12,000 reported cases of AIDS, as defined by the Centers for Disease Control in Atlanta. "Of that number," she said, "half are already dead. That 12,000 is expected to be 24,000 next year." She also said that up to two million Americans are believed to have been exposed to AIDS and reminded the audience that it is not known how many of those people—9% to 20% to 100%—will eventually develop the deadly disease, which has killed 38% of those diagnosed prior to 1983.

The opera benefit was unique. Dr. Walton said, not only because of the stellar level of the professional artists enlisted, but because it will assist medical research, patient services, and political action to secure more funding for AIDS, considered by many to be the nation's number one health problem.

500 L.I. calls/month

The Long Island AIDS Project, administered through Stony Brook's School of Allied Health Professions, is a community service organization providing education, information, referrals and direct assistance to people with AIDS, their loved ones, families, friends and others affected by AIDS in Nassau and Suffolk counties. A hot-line is staffed by trained volunteers who are supervised by a professional staff. Volunteers also help provide home and hospital visitation, transportation and support to those in need. The project is coordinated by Ms. Jane Holmes.

The project received more than 500 requests for services and information in July and anticipates an ever-increasing demand for education, information and services. The project is funded by the New York State AIDS Institute and by private contributions.

Seeks ways to treat AIDS

The Retrovirus Laboratory at Stony Brook is involved in AIDS research targeted at understanding the mechanism of the spread of the HTLV-I/III-LAV retrovirus (detected in AIDS patients) and aimed at learning more about the mechanism of the immune system and why some individuals who are infected become ill and others do not. The investigation is designed to develop methods of treatment.

Stony Brook scientists also are conducting research focused on developing treatment regimens for specific infections, including the retrovirus HTLV-I/III-LAV, and some of the "opportunist" infections associated with AIDS (such as toxoplasmosis and cryptosporidiosis). The greatest need, at the moment, is for research equipment.

The Stony Brook team, headed by Dr. Roy T. Steigbigel, M.D., assists the Stony Brook AIDS Project in maintaining a research project screening clinic for people who are concerned about AIDS or AIDS-Related Complex (ARC). The laboratory also accepts referrals to its own infectious disease clinic for individuals who are in need of further evaluation.

In addition to the projects at Stony Brook, the opera gala benefited the Gay Men's Health Crisis and the Retrovirus Laboratory at St. Luke's-Roosevelt Hospital Center, both in New York City.

The benefit's honorary committee, chaired by James Levine, included such notables as Edward Albee, Clive Barnes, Carol Bellamy, Leonard Bernstein, Judith Hope, Marilyn Horne, Arthur Laurents, Joseph Papp, Beverly Sills, Gloria Steinem, Rise Stevens and Lanford Wilson.

### Fall '85 Poses Many Questions for Patriot Football Team

By Steve Kahn

Life is full of questions. The Stony Brook football team faces these questions this fall.

- Can John Ragimierski do as well at quarterbackback this season as he did last fall at linebacker and wide receiver?
- How will Chuck Downey fare this season in kickoff and punt returns after his standout 1984 season?
- How much of an effect will the new defensive coordinator, Jim Steigerwald, have on the defense unit?
- The kicking and punt game last season was not as good as it could have been. Will John Buonora make it better this fall?
- Will standout transfer tight-end Jimmy Hayes perform as well as Stony Brook as he did at Hobart College and St. Anthony's High School in South Huntington?
- The answers to these pressing questions, and to many more, will be answered as the Stony Brook football team plays a schedule filled only with NCAA Division III opponents for the first time. There will be no club opponents this fall.
- Seasons have a way of changing predictions, but here's how the 1985 Patriots looked as they were getting ready for their season's opener.

Offensive running game strong

With the graduation of Ray McKenna, there is a new No. 1 quarterback. Junior John Ragimierski of Mastic, a former all-Long Island player at William Floyd High School, has converted from playing linebacker and wide receiver. Paul Ryan, a junior from Lindenhurst, and Kevin Guihrda, a sophomore from Stonetown Island, were not about to give up the No. 1 spot easily during pre-season, and either one could take over.

The running game should be strong. Halfbacks Jorge Taylor, a senior from Brooklyn, and Ralph Tuckett of West Hempstead, will get help from newcomers Ed Gillett and Ken Dolan of Valley Stream, and Doug Jones.

Defense adds depth

Head Coach Sam Kornhauser considers his secondary as the area with the strongest improvement. He has returning starters Paul Emoran, a senior from Westbury, and Chuck Downey, a sophomore from Deer Park, plus seven newcomers (five freshman prospects, one transfer and one newcomer). Their addition add depth right away, said Coach Kornhauser.

Kornhauser will receive assistance from two new coaches. Defensive coordinator Jim Steigerwald was a 5-year head coach at Hauppauge High School. The linebackers are coached by Dave Calderio, who coached at Nassau Community College last season. Starting at the outside linebacker positions are two 1984 returners: John Pisanio, a senior from Central Islip, and Chris Clay, a junior from Mastic. Backups are freshmen Chris Cassidy from Levittown and Matt Chartrand from West Islip. On the inside, senior Ed Gillett of Long Island Terrace will get help from newcomers Ed Gillett and Ken Dolan of Valley Stream, and Doug Jones.

First Division III Schedule

Stony Brook meets a tough Hofstra University squad in the second week of the season. Wagner College, an equally reputable opponent, is slated for the following week. If the Patriots get by their first three games without much damage, the schedule will not be nearly as difficult, and the team should be able to do well. Having four of their final seven games at home against generally weaker opponents gives "Patriots' fans plenty to look forward to.

### Group Shop Offers 'Small Circles'

With a fall schedule covering everything from stress management to understanding the meaning of dreams, the Group Shop is once again offering a variety of free groups and workshops to the campus community. The Group Shop's philosophy is to provide faculty, staff and students with "small circles" of communication, to help them sense the isolation sometimes experienced on a large campus. The groups are designed to increase awareness of self and others, and to develop more effective coping skills. Style and format of the groups vary depending on the subject matter.

Some of this semester's groups include: "Get It Done Yesterday."

"Post-Divorce Parenting" and "Creative Approach to Decision Making" (billed as a workshop for "overachievers, perfectionists, preprofessional, pregrad, premedical, preprofessional giving workaholics, first borns, yuppies that must carry the family name and superstars").

Pre-registration is required. The registration deadline is Wednesday, Sept. 25. For more information, call the University Counseling Center at (248) 2280.

Coach Sam Kornhauser

Quarterback John Ragimierski

Tight End

Kim Hayes

Suffolk CC
ACADEMIC CALENDAR
Fall Semester 1985
August 26, Monday: Foreign students arrive.
August 26-30, Wednesday-Friday: Undergraduate student orientation for students not having participated previously.
August 31-September 1, Saturday-Sunday: Residence halls open for returning student check-in.
September 3, Tuesday: Classes begin; late registration begins with $20 late fee assessed.
September 5, Thursday: Senior citizen and student assistant program registration (telephone 246-3055 for information).
September 9, Monday: Last day to file for December graduation; undergraduates file application.
September 13, Friday: Last day for graduate students to add or drop a course.
September 16, Monday: September 17; 9 a.m. to 6 p.m. Open to the community (246-6842).
September 19, Thursday: Last day for undergraduate students to drop a course without withdrawing from the University; last day to change courses to or from Pass/No Credit.
September 24: Falls 1985 registration period ends.
September 27, Sunday: Fall quarter housing period ends.
October 1, Monday: Last day for removal of incomplete and NR (No Record) grades from the Spring semester.
October 5, Friday: Advance registration for Spring semester begins (schedule announced prior to registration).
October 9, Tuesday: Middleclass Fund and Student Assistant Jean Ewing. They credit their idea to Tom Matthews of the SUNY Geneseo campus. The Weekly Partners are available at the Barnes & Noble and Stony Brook bookstores for $1.00.

Campus Currents lists events of general, campus-wide interest. Submissions may be sent to: Editor, Campus Currents, 121 Central Hall 2760.

• MONDAY, SEP. 16-THURSDAY, OCT. 17
